Discover where faeries and other mythical creatures are hiding in our modern, urban environment with this beautifully illustrated guide to uncovering magical beings. From the musty corners of libraries to the darkest depths of urban sewers, faeries, boggarts, redcaps, and other fantastical species can be found all around us—but only if we know where to look. And like every other being in the modern world, these wonderous creatures have been forced to adapt to the climate, industrial, and cultural changes of the modern era. Many formerly common creatures from akeki to cave trolls have been driven out by the urban sprawl, technological advancements, and climate change while others, including ether sprites and brownies, have been able to thrive in abundance, creating homes within electrical hotbeds and massive landfills. Featuring descriptions of magical creatures from around the globe, this encyclopedic collection details the history and adaptability of more than fifty different species of fae. Describing little-known and fascinating creatures such as the Luck Pigeon of Baltimore, the akaname of Eastern Asia, and the konderong of South Africa, this book will expose readers to fantastical species from a variety of cultures and communities. Combining scholarship with modern lore and environmentalism, and featuring stunning hand-drawn illustrations, Finding Faeries is a captivating look at the fantastical beings that inhabit our world today.

20 felt sewing projects that are quick, easy, stylish, modern and appealing. This book provides a range of fun and attractive felt brooch designs that will appeal to seasoned sewing machine users as well as beginners. The designs include popular motifs such as an owl, a chicken, dogs, cats, cupcakes, fairies and flowers, as well as more quirky subjects such as a beach hut and a seed head. Some designs include organza, beads and other materials as embellishment. A techniques section is included which explains step-by-step all the stitches used, and a template is provided for each design. The author has made the 20 designs in bought felt which are featured in the styled shots. She has then re-made each project using her own handmade felt to showcase the different effects that can be achieved with texture and depth of colour. Each of these alternatives has been photographed in detail.

The Sporty Fairies are in need of Rachel and Kirsty's help. Everyone in Fairyland is preparing for the Fairy Olympics, but Jack Frost and his goblins have stolen the magic sporty items so they can win by cheating! What's more, with the items missing, everyone in the human world is playing sports really badly, and so the human Olympics is in danger of being ruined too! Rachel and Kirsty love playing tennis, but with Alice's Magic Tennis Ball missing, they can't seem to hit one shot! The girls must help Alice find the goblins before it's too late...

A stunning debut about a magician's apprentice and a one-winged princess who must vanquish the mechanical monsters that stalk the streets and threaten the faerie kingdom. Aspiring inventor and magician's apprentice Felix Carmer III would rather be tinkering with his latest experiments than sawing girls in half on stage, but with Antoine the Amazifier's show a tomato's throw away from going under, Carmer is determined to win the cash prize in the biggest magic competition in Skemantis. When fate throws Carmer across the path of fiery, flightless faerie princess Grit (do not call her Grettifrida), they strike a deal. If Carmer will help Grit investigate a string of faerie disappearances, she'll use her very real magic to give his mechanical illusions a much-needed boost against the competition. But Carmer and Grit soon discover they're not the only duo trying to pair magic with machine – and the combination can be deadly. In this story perfect for readers of the Lockwood & Co and Wildwood series, Sarah Jean Horwitz takes readers on a thrilling journey through a magical wooded fairyland and steampunk streets where terrifying automata cats lurk in the shadows and a mad scientist's newest mechanical invention might be more menace than miracle.
