Publisher's description: Many businesses look for candidates who know how to use information systems, making a general understanding of information systems an asset to any business student. Laudon and Laudon continue to define the MIS course for all business majors by emphasizing how business objectives shape the application of new information systems and technologies.

4LTR Press solutions give students the option to choose the format that best suits their learning preferences. This option is perfect for those students who focus on the textbook as their main course resource. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The second edition of Principles of Business Information Systems has been fully updated to reflect the latest developments in business information systems. Cases have been updated, increasing the international content and questions and exercises have also been revised. This new edition is suitable for students studying on any information systems course, helping to prepare them for the corporate world in the twenty-first century.

Management Information Systems provides comprehensive and integrative coverage of essential new technologies, information system applications, and their impact on business models and managerial decision-making in an exciting and interactive manner. The twelfth edition focuses on the major changes that have been made in information technology over the past two years, and includes new opening, closing, and Interactive Session cases.

Using MIS is the book that teaches students how people use information systems to solve business problems. Building on students' experience and knowledge base from personal MIS to workgroup MIS to enterprise MIS, this text stresses the important role of Information Systems in satisfying business objectives. Realistic examples, mini-cases, case applications, and thought-provoking review material with projects promote active learning. This text is beneficial to the business professional interested in a basic understanding of management information systems today.

This book is a comprehensive, E-Engineered revision that integrates E-Business and E-Commerce into every chapter and every case making it the most current and up-to-date MIS text in the market. Managing IT in the E-Business Enterprise, 5E contains 14 chapters (down from 15 chapters and 2 appendixes in 4E) with more case studies and theory throughout, making it most appropriate for upper-level (junior/senior or graduate) business students who are or will become managers, entrepreneurs and business professionals in E-Business enterprises. By including a multitude of real world cases, in-text examples and exercises, organizing chapters into a simple five-area framework, and integrating E-Business concepts into all chapters, the text will help business students learn how to use and manage IT to conduct E-Commerce, improve decision making, and gain competitive advantage in the fast-changing real world of global business.
