Accounting 3e provides a very accessible and easy-to-follow introduction to accounting. It is intended as a core textbook for students studying accounting for the first time: either those following an undergraduate degree in a business school, or non-business studies students studying an accounting course. This includes students on both accounting and non-accounting degrees and also MBA students. Designed to be both engaging and accessible to the student, Accounting 3e features: A lively presentational style integrating cartoons and soundbites ‘Company Camera’ boxes presenting financial data from a wide variety of international companies, such as Heineken, Nokia and Volkswagen. ‘Real Life Nuggets’ offering contemporary examples from the business press that give the body of the text a real-life resonance. End of chapter questions of escalating difficulty, together with accompanying answers, enabling the student to develop their understanding of the key concepts discussed in the text. A rich supporting website including solutions, extra question material and powerpoint slides for lecturers, multiple choice quizzes and an online glossary for students.

From the leading accounting author team of Weygandt, Kimmel and Kieso, this new edition of Managerial Accounting gives readers the tools they need to succeed, whether as accountants or in other career paths. The book helps build their decision-making skills and understand how to use accounting information to make quality business decisions. The third edition also continues the tradition of unparalleled accessibility by breaking difficult or complicated processes down into manageable, understandable steps.

Explores computer-intensive probability and statistics for ecosystem management decision making Simulation is an accessible way to explain probability and stochastic model behavior to beginners. This book introduces probability and statistics to future and practicing ecosystem managers by providing a comprehensive treatment of these two areas. The author presents a self-contained introduction for individuals involved in monitoring, assessing, and managing ecosystems and features intuitive, simulation-based explanations of probabilistic and statistical concepts. Mathematical programming details are provided for estimating ecosystem model parameters with Minimum Distance, a robust and computer-intensive method. The majority of examples illustrate how probability and statistics can be applied to ecosystem management challenges. There are over 50 exercises - making this book suitable for a lecture course in a natural resource and/or wildlife management department, or as the main text in a program of self-study. Key features: Reviews different approaches to wildlife and ecosystem management and inference. Uses simulation as an accessible way to explain probability and stochastic model behavior to beginners. Covers material from basic probability

through to hierarchical Bayesian models and spatial/ spatio-temporal statistical inference. Provides detailed instructions for using R, along with complete R programs to recreate the output of the many examples presented. Provides an introduction to Geographic Information Systems (GIS) along with examples from Quantum GIS, a free GIS software package. A companion website featuring all R code and data used throughout the book. Solutions to all exercises are presented along with an online intelligent tutoring system that supports readers who are using the book for self-study.
