Manufacturing Processes for Engineering Materials, Fourth Edition is a comprehensive text, written mainly for students in mechanical, industrial, and metallurgical and materials engineering programs. The text, as well as the numerous examples and case studies in each chapter, clearly show that manufacturing engineering is a complex and interdisciplinary subject. The topics are organized and presented in such a manner that they motivate and challenge students to present technically and economically viable solutions to a wide variety of questions and problems, including product design. Since the
