With numerous questions for each chapter, these tests help prepare students for SAT-10, ITBS, and TerraNova using chapter concepts. Eliminate one more variable on testing day by exposing students to the standardized test formats all year long.

I have spent the better part of the last 53 years taking well over a thousand multiple choice tests. As

a teenager, I struggled through high school. Armed with an average IQ and some fairly significant learning disabilities, I barely graduating with a 1.4 grade point average. However, I was smart enough to figure out early on that much of academics, and that achieving success in academics, had far more to do with the ability to master multiple choice tests than raw intellect. From there I began a 35 year study on the art and science of passing, mastering and scoring high on multiple choice tests. Despite a very substandard high school GPA, I scored high enough on the SAT and the ACT to be accepted to the University of Michigan, one of the top academic institutions in the Country. Upon graduation from college, I accepted a commission as an officer in the United States Marine Corps. As a Marine Officer, I completed dozens of military and civilian schools, including a Masters Degree from Boston University, and a Juris Doctor Degree from the University of Detroit School of Law. In fact, I earned a full ride military scholarship to law school based primarily on the fact I scored so highly on the Law School Aptitude Test (98th percentile). Upon completion of law school, I passed the Michigan Bar exam on the first attempt, scoring 149 points on the multistate (the multiple choice portion of the exam), which was one question away from automatic passage (at 150 they examiners do not need to grade the essay portion). I have also taken and applied many of the Marine Corps concepts of discipline and mental toughness to the art of preparing for, taking, and passing multiple choice tests. Resigning my commission and leaving the Marine Corps in 1990, I continued both my education as well as honing my test taking skills. I currently hold 12 professional licenses and 5 professional designations, which required me to pass several comprehensive and difficult multiple choice examinations. I have also attended dozens of professional test preparation courses. From those courses I have cherry picked all of the valuable lessons and test taking tips and have included those in this book. One of the professional licenses I hold is a paramedic license. As a paramedic I have gained a much greater understanding of the anatomy and physiology of test taking. Test taking is all about the central nervous system, which of course includes the brain. However, as I explain in this book, it is clear that the sympathetic and parasympathetic nervous systems have as much to do with passing and failing multiple choice tests as does the brain. Accordingly, I have also applied many of those principals in this book.

How to Study for Standardized Tests focuses on the skills and test-taking strategies that students need to master in order to excel on tests. This book is a great resource for high school students preparing for the ACT and SAT; college students preparing for the GRE; professional students preparing to take their licensing or national board examinations; and healthcare practitioners studying for their initial or recertification examinations. How to Study for Standardized Tests focuses on three key variables: the test, you, and important study resources (including study methods and techniques). This detailed guide describes and explains how to take tests effectively and efficiently in a timed environment while helping to reduce the impact of test anxiety. The authors include a discussion of techniques to help you select answers when guessing is your only option. By learning as much as you can about what it takes to prepare for and perform well on standardized tests and by following the advice in this book you can realize your high-scoring potential. Why should you buy a book on How to Study for Standardized Exams? A. You want to increase your test score B. You believe that although you will perform well, you can do better C. You want to learn how to study less and still get a high score D. You are committed to devoting the time and energy necessary to improve your study techniques and test-taking skills E. All of the above!

With four pages of questions for each chapter, these tests help prepare students for SAT-10, ITBS, and TerraNova using chapter concepts. Eliminate one more variable on testing day by exposing students to the standardized test formats all year long.

Contains worksheets that prepare students for standardized tests in the visual arts.
