Research for Educational Change presents ways in which educational research can fulfill its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research-generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data, collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research-generated insights have a tangible, beneficial impact on what is happening in mathematical classrooms. Combining two discourses – that of researchers speaking to one another, and that of researchers communicating their insights to those responsible for educational practice – the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and undergraduate students interested in educational research.

Kinnear (history, U. of Manitoba) analyzes women's work in Manitoba from 1870 to 1970 and shows it was, in every domain, undervalued. She describes how early pioneers, East European immigrants, and professional women lived, and provides insight into what they thought of the work world, often in their own words. Canadian card order number: C98-900861-4Annotation copyrighted by Book News, Inc., Portland, OR

This book contains revised selected papers from the 26th International Conference on Selected Areas in Cryptography, SAC 2019, held in Waterloo, ON, Canada, in August 2019. The 26 full papers presented in this volume were carefully reviewed and selected from 74 submissions. They cover the following research areas: Design and analysis of symmetric key primitives and cryptosystems, including block and stream ciphers, hash functions, MAC algorithms, and authenticated encryption schemes, efficient implementations of symmetric and public key algorithms, mathematical and algorithmic aspects of applied cryptology, cryptography for the Internet of Things.

Revised second edition aligned for the 2008-2009 testing cycle, with a full index. REA's MCAS Grade 10 Mathematics provides all the instruction and practice students need to excel on this high-stakes exam. The book contains all test components that students will encounter on the official exam: Number Sense and Operations; Data Analysis; Probability and Statistics; Geometry; Measurement; and Patterns, Relations and Algebra. 2 full-length practice tests measure learning and progress, and confidence-building drills boost test-day readiness. DETAILS: -Fully aligned with the official state exam -2 full-length practice tests -Drills help students organize, comprehend, and practice -Lessons enhance necessary mathematics skills -Confidence-building tips reduce test anxiety and boost test-day readiness REA ... Real review, Real practice, Real results.

Assessment and Learning in Knowledge Spaces is a Web-based, artificially intelligent assessment and learning system. ALEKS uses adaptive questioning to quickly and accurately determine exactly what a student knows and doesn't know in a course. ALEKS then instructs the student on the topics she is most ready to learn. As a student works through a course, ALEKS periodically reassesses the student to ensure that topics learned are also retained. ALEKS courses are very complete in their topic coverage and ALEKS avoids multiple-choice questions. A student who shows a high level of mastery of an ALEKS course will be successful in the actual course she is taking.

Study & Master Mathematical Literacy Grade 11 has been especially developed by an experienced author team according to the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Mathematical Literacy. The comprehensive Learner's Book includes: * thorough coverage of the basic skills topics to lay a sound foundation for the development of knowledge, skills and concepts in Mathematical Literacy * margin notes to assist learners with new concepts - especially Link boxes, that refer learners to the basic skills topics covered in Term 1, Unit 1-16 * ample examples with a strong visual input to connect Mathematical Literacy to everyday life.
