A case-based companion study guide to Pharmacotherapy Principles and Practice, 2e – learn how to apply your knowledge to actual patient situations Pharmacotherapy Principles and Practice Study Guide uses 98 cases to help you learn how to apply pharmacotherapeutic concepts to specific patient situations. Each case is presented in a consistent manner, similar to what you would see in a clinical setting and focuses on one primary topic or problem. Patients discussed in these cases will have drug therapy problems requiring identification and management. For each case, you will be asked to develop a Patient Database, Drug Therapy Problem Worksheet, and Pharmacotherapy Care Plan using the forms provided. These forms are adapted from those originally developed by the American Society of Health System Pharmacists Clinical Skills program. Each case includes: Learning Objectives Patient Presentation Targeted Questions followed by a hint that refers you to pages in Pharmacotherapy Principles and Practice, 2e where you can find the information to answer the question Follow-up Global Perspective which highlights an issue related to the case that is important to countries outside of North America or involve different ethnic groups or races Case Summary

100 complex cases illustrate how to ensure safe, effective treatment during transitions between care settings Moving a patient from one healthcare provider or setting to another—a transition of care—increases the risk of medication errors due to inadequate communication and poor coordination of care. While guideline-and evidence-based therapy is important, pharmacists must also address other patient-specific needs and possible barriers to safety, efficacy, and to adherence of therapies. Providing a deep dive into this critical topic, Transitions of Care in Pharmacy Casebook explains how to deliver and optimize complex patient care during transitions between care settings. This essential resource features 100 enlightening clinical cases that illustrate real-world practices. Organized by disease state, each case incorporates clinical knowledge, patient education, effective communication, and social issues. Transition of Care in Pharmacy Casebook includes: An insightful introduction to transitions of care practice models 100 complex clinical cases incorporating specific elements of patient care Concise coverage of various medical conditions commonly encountered in various practice settings Considerations on treating special populations, such as the elderly and homeless patients Bulleted text explaining the theory and rationale for each case Informative charts with lab findings, medication records, provider notes, and diagnostic exams
