BS Medical Technology or MedTech is a four-year degree program that provides students with the necessary skills and training in conducting laboratory tests. These tests are used in detecting, diagnosing, preventing, and treating various diseases. Medical Technologists perform lab investigations based on specimens taken from the human body such as urine, blood, stool and other body fluids through the use of medical equipment (e.g., analyzers, microscopes and other precision instruments).

Nuclear Medicine Technology Study Guide presents a comprehensive review of nuclear medicine principles and concepts necessary for technologists to pass board examinations. The practice questions and content follow the guidelines of the Nuclear Medicine Technology Certification Board (NMTCB) and American Registry of Radiological Technologists (ARRT), allowing test takers to maximize their success in passing the examinations. The book is organized by sections of increasing difficulty, with over 600 multiple-choice questions covering all areas of nuclear medicine, including radiation safety; radionuclides and radiopharmaceuticals; instrumentation and quality control; patient care; and diagnostic and therapeutic procedures. Detailed answers and explanations to the practice questions follow. Supplementary chapters will include nuclear medicine formulas, numbers, and a glossary of terms for easy access by readers. Additionally, test-taking strategies are covered.
