Mexico's relationship with the world during the 1930s is revealed as a fascinating series of calculated responses to domestic political changes and international economic shifts.

Typewritten essay for History 264b, given in the fall term of 1962-1963 by Professor Ernest R. May.

Collection of letters recording strong personal friendship of two politicians.

A century ago, the Theodore Roosevelt administration believed building an American empire was the only way the U.S. could ensure its role in the world, but came to see the occupation of the Philippines as America's "heel of Achilles." Woodrow Wilson, shocked by the failure of American intervention in Mexico and by the outbreak of World War I, came to see imperialism as the underlying cause of war and set about trying to create an international system to eliminate empires. But, the current Bush administration, despite the lessons of the past, has revived the older dreams of American empire--under the guise of democracy--even touting the American experience in the Philippines as a success upon which the United States could build in attempting to transform the Middle East. With The Folly of Empire, John B. Judis shows that history can teach us lessons and allow political leaders, if sensitive to history, to change their strategy in order to avoid past mistakes. Judis shows how presidents from Franklin Roosevelt to Bill Clinton drew upon what Theodore Roosevelt and Woodrow Wilson learned about the pitfalls of using American power unilaterally to carve out a world in America's image. Exercising leadership through international institutions and alliances, the United States was able to win the Cold War and the first Gulf War. But by ignoring these lessons, the Bush administration has created a quagmire of terror and ethnic conflict. By examining America's role in the international community--then and now--The Folly of Empire is a sharp and compelling critique of America's current foreign policy and offers a direct challenge to neo-conservatives.

In the mid-1930s the Mexican government expropriated millions of acres of land from hundreds of U.S. property owners as part of President Lázaro Cárdenas’s land redistribution program. Because no compensation was provided to the Americans a serious crisis, which John J. Dwyer terms “the agrarian dispute,” ensued between the two countries. Dwyer’s nuanced analysis of this conflict at the local, regional, national, and international levels combines social, economic, political, and cultural history. He argues that the agrarian dispute inaugurated a new and improved era in bilateral relations because Mexican officials were able to negotiate a favorable settlement, and the United States, constrained economically and politically by the Great Depression, reacted to the crisis with unaccustomed restraint. Dwyer challenges prevailing arguments that Mexico’s nationalization of the oil industry in 1938 was the first test of Franklin Roosevelt’s Good Neighbor policy by showing that the earlier conflict over land was the watershed event. Dwyer weaves together elite and subaltern history and highlights the intricate relationship between domestic and international affairs. Through detailed studies of land redistribution in Baja California and Sonora, he demonstrates that peasant agency influenced the local application of Cárdenas’s agrarian reform program, his regional state-building projects, and his relations with the United States. Dwyer draws on a broad array of official, popular, and corporate sources to illuminate the motives of those who contributed to the agrarian dispute, including landless fieldworkers, indigenous groups, small landowners, multinational corporations, labor leaders, state-level officials, federal policymakers, and diplomats. Taking all of them into account, Dwyer explores the circumstances that spurred agrarista mobilization, the rationale behind Cárdenas’s rural policies, the Roosevelt administration’s reaction to the loss of American-owned land, and the diplomatic tactics employed by Mexican officials to resolve the international conflict.
