Server and Microsoft Access. Microsoft Access databases have certainly become more prevalent over the last 2 years as large corporations break the imposed ban on using the tool. Many of our large corporate clients and government clients have stymied development in Microsoft Access for varying reasons which can include security issues or simply the IT Managements belief that they don't want to support the application. Some of the reasons why IT Departments do not want Microsoft Access in their environments are quite valid. For example, the use of Access Databases in high security areas such as in the Education Department for storing student information, Department of Defence systems, Hospitals storing patient data are all valid reasons why data should not be stored in a MS Access Database.
