What about plants? Don't animals eat other animals? There are no perfect vegans, so why bother? If you're vegan, how many times have you been asked these, and other similarly challenging, questions from non-vegans? Using humor and reason, Sherry F. Colb takes these questions at face value and also delves deeply into the motivations behind them, coming up with answers that are not only intelligent but insightful about human nature. Through examples, case studies, and clear-eyed logic, she provides arguments for everything from why veganism is compatible with the world's major religions to why vegetarianism is not enough. In the end, she shows how it is possible for vegans and non-vegans to engage in a mutually beneficial conversation without descending into counterproductive name-calling, and to work together to create a more hospitable world for human animals and non-human animals alike. "A rare fusion of passion and logic, idealism and pragmatism, style and substance, and--in its measured confrontation of the most challenging questions vegans face--a revolutionary guide for advocates seeking to engage the ethics of eating animals through authentic dialogue rather than bombastic rhetoric. Colb's literary touch is something to behold. She writes in a way that will appeal to non-vegans and vegans alike, building bridges across an all too turbulent divide. This is food writing at its best and food writing as it should be: honest, inclusive, inspirational, and, more than you might imagine, timely."--James McWilliams, Professor of History, Texas State University, San Marcos, and author of *Just Food* and *The Politics of the Pasture* "With compassion, humor, and eloquence, Sherry Colb provides a clear and engaging account of what motivates vegans to eat and live the way we do. A must-read for anyone who has ever wondered (or been asked) 'Why do vegans think it is okay to kill plants but not animals?' or 'Why avoid dairy and eggs?'"--Rory Freedman, New York Times bestselling co-author of *Skinny Bitch* and author of *Beg* "Sherry Colb provides thoughtful, articulate, intelligent answers to the commonly asked questions faced by every vegan. Intertwining information, reason, and her own personal experience, Colb offers an invaluable aid both for those answering the questions and for those posing them. The perfect companion"--Colleen Patrick-Goudreau, bestselling author and creator of *The 30-Day Vegan Challenge* "A powerful, compelling, and thoroughly engaging defense of veganism from an absolutely terrific legal scholar."--Gary L. Francione, Board of Governors Professor of Law and Katzenbach Distinguished Scholar of Law and Philosophy, Rutgers University, author of *Introduction to Animal Rights: Your Child or the Dog?* "With crystal clear logic and an empathic voice, Sherry Colb has written a must-read source for anyone curious, skeptical, or downright antagonistic towards vegan living. This book is destined to be a classic of the emerging vegan oeuvre."--Jonathan Balcombe, Ph.D., author of *The Exultant Ark* "Full of thoughtful analyses of some of the most common, perplexing, and often challenging reactions to vegans and veganism. Any vegan or vegetarian who has wished they'd had a more informed response to a question or challenge about their ideology--and anyone who wants to better understand some of the fundamental concepts of veganism--will benefit from reading Sherry Colb's in-depth exploration of the issues."--Melanie Joy, Ph.D., author of *Why We Love Dogs, Eat Pigs, and Wear Cows*

"The need for scientific knowledge springs from a natural human curiosity to understand our world, but also from a genuine desire to help humanity. The great scientific discoveries have given us incredible knowledge about the natural world, have improved our lives through new technologies, and have taught us a great deal about the capabilities and the limitations of our human perspective." In *The Mind of Science: From Aristotle to Einstein*, author Michael Sidiropoulos takes you on a thought-provoking journey through the history of science from a philosophical standpoint. Beginning with the calculation of the size of the earth by Eratosthenes, chief librarian at the Library of Alexandria, Sidiropoulos for the most part avoids the use of mathematical formulas as he explores the ideas, and ideals, that lie behind scientific advancement throughout the ages. It's a fascinating voyage that will enrich you with a greater awareness of the interplay between science and philosophy-how they're similar, how they're different, and how they complement each other.

Mind Your Thoughts is a book that will help you quiet and focus your thoughts so you speak directly to your unconscious state of being in a language the mind understands. Meditation is nothing more than relaxation, and in a meditative state, your conscious can relax and allow you to speak directly to the unconscious. The unconscious is in charge of your life, even though you allow your conscious to be in control. If you want to experience change in your life, you need to learn to bypass the conscious control which can be described as critical, analytical, and most of all judgmental. Meditating through relaxation is how you reprogram your unconscious with new concepts and information. The unconscious learns by applying this information against the storage of all your memories, experiences, reactions, and emotions. Also, the unconscious is much more accepting of change because it processes information without judgment. You will see both mental and physical changes resulting from this process. Practice with the thoughts in this book; your unconscious will understand even if your conscious seems confused. Mind your thoughts and experience a human metamorphosis from the inside out. The purpose of meditation is to quiet the mind. Meditation removes the clutter of thoughts from everyday life, and also helps you to get in touch with your higher consciousness. It does take practice, so do not become discouraged. Set aside 45 minutes each evening before you go to sleep. Sit in a quiet room, in a comfortable and relaxed position wearing loose clothing. Close your eyes and take a deep breath in through your nose and let it out slowly through your mouth. With each breath in, clear your mind of all thoughts, and feel your body relax. Repeat this 9 times before beginning. This book contains 81 thoughts for you to meditate on. There are 9 sets of 9 thoughts each. Start with Set One and allow 5 minutes of meditation for each thought. After your initial warm up of 9 deep breaths, read the first thought of the first set. Close your eyes and continue your deep breathing as you reflect on the thought and what it may mean to you and your life. Think of nothing else. Repeat this with each thought until you complete Set One. It will take you at least 9 evenings to get through all of the sets in the book. You may want to repeat a set over and over again before moving on to the next set. Eventually, you will have your favorite thoughts that you will want to dedicate your meditations on. Most people enjoy thoughts of wisdom, but rarely take the time to internalize them enough to be life changing. Practice mindfulness in life and create ripples that will forever change your life. This is not an instructional book on the art of meditation.
