Being a gearhead matters. Much as we love reading about the latest hypercar or money-no-object custom project, we believe vehicles owned - and loved - by gearheads like us are just as meaningful, if not moreso. Our readers are self-made. We buy vehicles for specific reasons and we learn how to maintain, modify, and repair them ourselves. (With a little help from our friends, of course!) Everyone you meet in an issue of Gearbox Magazine is cool. If you spotted them in a parking lot, you could walk right up to them and strike up a conversation. And chances are you might end up lifelong

Australian from the Baby Boomer era or older can't help but to crack a smile. Murray was best known as the rally driver who in 1954 won the REDEX Round Australia Reliability Trial without the loss of a single point; but Jack's sporting interests and achievements were eclectic and far-ranging. In his own words, at different times throughout his life he was 'engaged in various sports with various successes': cycling; VFL schoolboy football; stock car racing; hill climbing motor races; circuit car racing; car endurance events; Australian and NSW Grand

Prix racing; international and Australian rally driving; wrestling; boxing; crocodile, kangaroo and buffalo hunting; ocean boat racing and waterskiingmdash;to name most, but not all. Oh yesmdash;Jack even raced a bathtub once, plug in. Jack Murray died in 1983. Encounters with those who met him, knew him and loved him now grow fewer and fewer, as the years pass and the Reliability Trials of the 1950s drift into Australian history and folklore. Jackrsquo;s personal and nonpublic life, showing the man behind the derring-do, has never been fully explored or written about. Here for the first time is

Murray's full story as told by his son Phil Murray. Son of the legendary "Gigniter"; Jack Murray, Phil has inherited his father's genes when it comes to adventure, seeking personal challenges and embracing all life has to offer. Just as his father did, Phil believes life is best lived following some pretty simple instructions: "Don't take yourself too seriously". Thus Phil is the perfect person to display to the world a man whom many thought they knew, but who was much more complicated and talented than his racing exploits would lead us to believe.

When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous

trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University. Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry. I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983
