My European Family tells the story of Europe and its people through its genetic legacy, from the first wave of immigration to the present day, weaving in the latest archaeological findings. Karin goes deep in search of her genealogy; by having her DNA sequenced she was able to trace the path of her ancestors back through the Viking and Bronze ages to the Neolithic and beyond into prehistory, even back to a time when Neanderthals ran the European show.

Karin Bojs grew up in a small, broken family. At her mother's funeral she felt this more keenly than ever. As a science journalist she was eager to learn more about herself, her family and the interconnectedness of society. After all, we're all related. And in a sense, we are all family. My European Family tells the story of Europe and its people through its genetic legacy, from the first wave of immigration to the present day, weaving in the latest archaeological findings. Karin goes deep in search

of her genealogy; by having her DNA sequenced she was able to trace the path of her ancestors back through the Viking and Bronze ages to the Neolithic and beyond into prehistory, even back to a time when Neanderthals ran the European show.

Travelling to dozens of countries to follow the story, she learns about early farmers in the Middle East and flute-playing cavemen in Germany and France, and a whole host of other fascinating characters. This book looks at genetics from a uniquely pan-European perspective, with the author meeting dozens of geneticists, historians and archaeologists in the course of her research. The genes of this seemingly ordinary modern European woman have a truly fascinating story to tell, and in many ways it is the true story of Europe. At a time when politics is pushing nations apart, this book shows that, ultimately, our genes will always bind us together.

This opening volume of a three-part history of the family in Europe examines the material conditions of family life, housing, diet and domestic organisation, and the economic and social factors that influenced its development.

This four-volume set maps the emerging European family law. It is intended to serve as a resource for anyone interested in this area of law, as well as a basis for teaching on comparative and international family law courses. The first volume examines t

The Impact of Institutions and Organisations on European Family Law looks at the impact that institutions and organisations have had, and continue to have, on European family law. In many ways the chapters in this volume provide the easiest explanation for the existence of a European family law. While there is no European body that could actually legislate definitively on family law – even the European Union has no such mandate – there are still some obvious institutions that have a very direct impact on European family law. These can be divided into two groups; namely those that have a direct impact, such as the European Court of Human Rights and the European Union, and those that have an indirect impact, such as the Commission on European Family Law (CEFL), the Council of Europe and the International Commission on Civil Status (ICCL/CIEC) as well as the private international law instruments of the Hague Conference (HCCH) and the EU. Together, with religion, all of these institutions are contributing to the creation of a European family law. This book, and the others in the set, will serve as an invaluable resource for anyone interested in family law. It will be of particular use to students and scholars of comparative and international family law, as well as family law practitioners.

The Changing Concept of ‘ Family ’ and Challenges for Domestic Family Law explores the changing concept of ‘ family ’, with the current social, political, medical and scientific challenges for domestic family law discussed in over 20 European jurisdictions. National reports describe the current law and legal development for

‘ horizontal ’ (the law of relationships between adults such as marriage, divorce, cohabitation, same-sex relationships), ‘ vertical ’ (the law governing the relationships between adults and children, such as parentage including artificial reproductive techniques and surrogacy, parental responsibility and adoption) and ‘ individual ’ (the law of names and recognition of gender identity) family law. They show that, while considerable legal and societal diversity still exists within Europe, family law, in many areas, is developing along similar lines, with a convergence towards a European family law. This book, and the others in the set, will serve as an invaluable resource for anyone interested in family law. It will be of particular use to students and scholars of comparative and international family law, as well as family law practitioners.

The Present and Future of European Family Law explores the essence of European family law – and what its future may be. It compares and analyses existing laws and court decisions, identifies trends in legislation and jurisprudence, and also forecasts (and in some cases proposes) future developments. It establishes that while there is, at present, no comprehensive European family law, elements of an ‘ institutional European family law ’ have been created through decisions by the European Court on Human Rights and by the Court of Justice of the European Union as well as other EU instruments. At the same time an ‘ organic European family law ’ is beginning to emerge. The laws in many European jurisdictions have developed similarly and have ‘ grown together ’, not only as a result of the aforementioned institutional pressures,

but also as a result of societal developments, and comparable reactions to medical and societal advances and changes. Hence there already is a body of institutional and organic European family law, and it will continue to grow. This book, and the others in the set, will serve as an invaluable resource for anyone interested in family law. It will be of particular use to students and scholars of comparative and international family law, as well as family law practitioners.
