The explanation of the formal duality of Kerdock and Preparata codes is one of the outstanding results in the field of applied algebra in the last few years. This result is related to the discovery of large sets of quadriphase sequences over Z_4 whose correlation properties are better than those of the best binary sequences. Moreover, the correlation properties of sequences are closely related to difference properties of certain sets in (cyclic) groups. It is the purpose of this book to illustrate the connection between these three topics. Most articles grew out of lectures given at the NATO Advanced Study Institute on "Difference sets, sequences and their correlation properties". This

workshop took place in Bad Windsheim (Germany) in August 1998. The editors thank the NATO Scientific Affairs Division for the generous support of this workshop. Without this support, the present collection of articles would not have been realized.

Den amerikanske hærs Generalinspektorat er en institution, der begyndte sit virke i 1777. Inspektoratet har haft stor betydning for den amerikanske hærs udvikling og historie. Nærværende bind beskæftiger sig med perioden 1903-1939, hvor USA's hær gennemgik store forandringer bl.a. indførtes en "Generalstab" som i andre stormagtshære og USA deltog i 1. Verdenskrig. KGB har også beskrivelsen af perioden 1777-1903, se X860259314.

After Surrey in 1994, Grenoble in 1996, Cambridge in 1999, Enschede in 2001, Munich in 2003 and Poitiers in 2005, the 7th Workshop, DLES7, will be held in Trieste, again under the auspices of ERCOFTAC. Following the spirit of the series, the goal of this latest workshop is to establish a state-of-the-art of DNS and LES techniques for the computation and modeling of transitional/turbulent flows covering a broad scope of topics such as aerodynamics, acoustics, combustion, multiphase flows, environment, geophysics and bio-medical applications. This gathering of specialists in the field should once again be a unique opportunity for discussions about the more recent advances in the prediction, understanding and control of turbulent flows in academic or industrial situations.

A study of the establishment of inspection practices in the United States Army told chronologically, in large part through the experiences of officers assigned to the inspection service. The record of the inspectorate illustrates those daily concerns that influenced the institutional development of the Inspector General Corps as a whole.

Policies to stimulate innovation at national and local levels must both build on and contribute to the dynamics of innovative clusters. This book presents a series of papers written by policy makers and academic experts in the field, that demonstrate why and how this can be done.
