The last thing Paisley Peterson needs is to fall in love. She left her high-stress job in Boston so she could heal in Healing Springs--isn't that what the town is about? She needs her sisters. She does not need a man. Asher has always been the one to take care of the people in his life, so when sexy Paisley strolls in and takes the lead, he finds himself turned on by her independence and confidence in a way he has never been turned on before. But after suffering too many losses in life and with a plate already brimming with family members who need his care and protection, can he handle the truth behind her sudden appearance in Healing Springs? How is he supposed to allow himself to get close to her when he could lose her? Asher and Paisley are from two different worlds with two different life plans. Will their unplanned love affair turn into a dead end? Or will it be just the detour they have both needed all along?

This book consolidates some of the most promising advanced smart grid functionalities and provides a comprehensive set of guidelines for their implementation/evaluation using DIgSILENT Power Factory. It includes specific aspects of modeling, simulation and analysis, for example wide-area monitoring, visualization and control, dynamic capability rating, real-time load measurement and management, interfaces and co-simulation for modeling and simulation of hybrid systems. It also presents key advanced features of modeling and automation of calculations using PowerFactory, such as the use of domain-specific (DSL) and DIgSILENT Programming (DPL) languages, and utilizes a variety of methodologies including theoretical explanations, practical examples and guidelines. Providing a concise compilation of significant outcomes by experienced users and developers of this program, it is a valuable resource for postgraduate

The founder and CEO of Askinosie Chocolate, an award-winning craft chocolate factory, shows readers how he discovered the secret to purposeful work and business - and how we can too, no matter what work we do. Askinosie Chocolate is a small-batch, award winning chocolate company widely considered to be a vanguard in the industry. Known for sourcing 100% of his cocoa beans directly from farmers across the globe, Shawn Askinosie has pioneered direct trade and profit sharing in the craft chocolate industry with farmers in Tanzania, Ecuador, and the Philippines. In addition to developing relationships with smallholder farmers, the company also partners with schools in their origin communities to provide lunch to 1,600 children every day with no outside donations. Twenty-five years ago, Shawn Askinosie was a successful criminal defense lawyer trying his first murder death penalty case that would later go on to become a Dateline special. For many years he found law satisfying, but after several high profile trials he reached a breaking point and found solace in the search for a new career. In this inspiring guide to discovering a vocation that feeds your heart and soul, Askinosie describes his quest to discover more meaningful work – a search that led him to volunteering in the palliative care wing of a hospital, to a Trappist monastery where he became inspired by the monks focus on “ being ” rather than “ doing, ” and eventually traipsing through jungles across the globe in search of excellent cocoa bean farmers to make award winning chocolate. Askinosie shares his hard-won insights into doing work that reflects one ’ s values and purpose in life. He shares with readers visioning tools that can be used in any industry or field to create a work life that is inspired and fulfilling. Askinosie shows us that everyone has the capacity to find meaning in their work and be a positive force for good in the world.

Game Design Foundations, Second Edition covers how to design the game from the important opening sentence, the One Pager document, the Executive Summary and Game Proposal, the Character Document to the Game Design Document. The book describes game genres, where game ideas come from, game research, innovation in gaming, important gaming principles such as game mechanics, game balancing, AI, path finding and game tiers. The basics of programming, level designing, and film scriptwriting are explained by example. Each chapter has exercises to hone in on the newly learned designer skills that will display your work as a game designer and your knowledge in the game industry."
