Designed by Lockheed's legendary engineer Clarence "Kelly" Johnson, the F-80 (first designated P-80) "Shooting Star" was one of the world's first operational jet fighter aircraft. After it missed seeing combat in WWII - four prototype aircraft were in Europe at war's end - the plane drew first blood in Korea in 1950. Variants included a photo recon version and the two-seat T-33, both of which saw heavy service in air forces around the world. Originally printed by Lockheed and the United States Air Force in the 1950s, this F-80 Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Classified "Restricted," the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted and color images appear in black and white. Care has been taken however to preserve the integrity of the text.

This handy resource offers an in-depth look at the substantive aspects of military justice and is designed to help both the experienced practitioner and the novice find his or her way through the punitive articles of the Uniform Code of Military Justice. It covers the myriad aspects of writing the charges and specifications, analyzing possible defenses, and possible instructions to the court members. Each punitive article is presented separately, followed by a detailed analysis and discussion. Coverage for each article focuses first on the official text of the article, then provides a discussion of the offense, including its history, what the prosecution must prove, applicable case law, and a discussion about possible defenses. For each article, the maximum punishment, possible lesser-included offenses, sample specifications, and sample instructions from the Military Judges' Benchbook are included. This guide also includes background on the military justice system, coverage of court-martial jurisdiction, and a chapter on defenses, for an all-in-one source on substantive military law.
