Designed for beginning and experienced birders. David Quady and his nationally acclaimed fellow authors have written text for the over 390 species of birds that are found from Monterey County to the northern border of California in our best-selling format: Description, Similar Species, Seasonal Abundance, Where to Find, Habitat, Diet and Behavior, Voice and Did You Know. More than 500 photographs illustrate species, often in different plumages. The photos have been selected and reviewed by the team of authors for regional accuracy. Two maps illustrate key birding spots and the northern California habitats. A ten page habitat section introduces the sixteen unique geographic regions that support the bird diversity of northern California and highlight the importance of habitat conservation. A Quick Guide to Local Birds, at the front of the book, provides an easy reference to the pages that provide a complete description of the different birds.

The availability and security of many services we rely upon including water treatment, electricity, healthcare, transportation, and financial transactions are routinely put at risk by cyber threats. The Handbook of SCADA/Control Systems Security is a fundamental outline of security concepts, methodologies, and relevant information pertaining to the

Studies of marine ecology have traditionally been approached through lectures and field courses devoted mainly to intertidal and inshore habitats, and it is surprising in these days of increased awareness of man's environmental impact that so little attention has been given to integrated approaches involving the whole coastal zone and including the terrestrial part, which is man's major habitat. The coastal zone has been the subject of extensive investigation, not only because of its biological diversity and accessibility, but also because of its economic and aesthetic importance to man. This book is written with the intention of providing a concise but readable account of coastal ecology for advanced undergraduates and immediate postgraduates. We have adopted a habitat-organismal ap proach because we believe that a knowledge of biota and major features of their environment is the best key to an understanding of both larger-scale processes, such as energy flow and nutrient cycling, and smaller-scale but equally fundamental processes, such as behavioural and physiological ecology. Examples have been selected from polar, temperate and tropical regions of the world. The breadth of the subject has dictated selectivity from sources too numerous to acknowledge individually, but we have included an up-to-date reference list for the main subjects of each chapter.

If you want to master the art and science of reverse engineering code with IDA Pro for security R&D or software debugging, this is the book for you. Highly organized and sophisticated criminal entities are constantly developing more complex, obfuscated, and armored viruses, worms, Trojans, and botnets. IDA Pro's interactive interface and programmable development language provide you with complete control over code disassembly and debugging. This is the only book which focuses exclusively on the world's most powerful and popular took for reverse engineering code. *Reverse Engineer REAL Hostile Code To follow along with this chapter, you must download a file called !DANGER!INFECTEDMALWARE!DANGER!... 'nuff said. *Portable Executable (PE) and Executable and Linking Formats (ELF) Understand the physical layout of PE and ELF files, and analyze the components that are essential to reverse engineering. *Break Hostile Code Armor and Write your own Exploits Understand execution flow, trace functions, recover hard coded passwords, find vulnerable functions, backtrace execution, and craft a buffer overflow. *Master Debugging Debug in IDA Pro, use a debugger while reverse engineering, perform heap and stack access modification, and use other debuggers. *Stop Anti-Reversing Anti-reversing, like reverse engineering or coding in assembly, is an art form. The trick of course is to try to stop the person reversing the application. Find out how! *Track a Protocol through a Binary and Recover its Message Structure Trace execution flow from a read event, determine the structure of a protocol, determine if the protocol has any undocumented messages, and use IDA Pro to determine the functions that process a particular message. *Develop IDA Scripts and Plug-ins Learn the basics of IDA scripting and syntax, and write IDC scripts and plug-ins to automate even the most complex tasks.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

A modern classic for readers of THE BORROWERS - about eleven-year-old Edie Winter and her magical box of winged people that only children can see. When eleven-year-old Edie Winter finds a mysterious shoebox on the London Underground she's amazed to discover that it's home to a family of Flits - tiny winged people. But Impy, Speckle and Nid need Edie's help. Not only do they need supplies (rice crispies, sugar sprinkles, digestive biscuits and raisins) and someone to look after them, but their brother Jot has run away and they need Edie's help to find him. Set against the backdrop of London and its Underground network, EDIE WINTER AND THE BOX OF FLITS is a story about friendship, family and noticing the little things in life. With stunning black and white artwork throughout.

A delicious detective story set on a train from a wonderful new author/illustrator - for readers aged 6+.

'Funny, fast and really inventive' Harriet Whitehorn, author of VIOLET AND THE PEARL OF THE ORIENT A deliciously funny series from sparkling new talent Gianna Pollero, illustrated by the award-winning Sarah Horne Ten-year-old Grace likes doughnuts and cakes as much as the next kid - but they are also her secret weapon. Grace is a monster hunter who owns a bakery - and everyone knows how much monsters LOVE any kind of sweet treat! Just don't tell them about the secret exploding baking powder inside the doughnuts and the cookies ... When Grace's Monster Scanning Machine alerts her to the doughnut-loving, people-eating, board-game-playing cyclops Mr Harris, she realises she's about to face her biggest challenge yet ...
