This book describes a particular type of educational provision referred to as 'elite' or 'prestigious' bilingual education, which caters mainly for upwardly mobile, highly educated, higher socio-economic status learners of two or more internationally useful languages. The development of different types of elite bilingual or

multilingual educational provision is discussed and an argument is made for the need to study bilingual education in majority as well as in minority contexts.

This book presents a vision of bilingual education in six South American nations: three Andean countries, Peru, Ecuador, and Colombia, and three 'Southern Cone' countries, Brazil, Argentina and Paraguay. It provides an integrated perspective, including work carried out in majority as well as minority language contexts, referring to developments in the fields of indigeneous, Deaf, and international bilingual and multilingual provision.

Written as an introductory text from a crossdisciplinary perspective, this book covers individual and societal concepts in minority and majority languages.

International Schools have developed since their inception from a largely native English-speaking student body to schools such as the author's, the Vienna International School (VIS), where there are students of 90 nationalities with 65 mother tongues. Maurice Carder proposes a "three-programme model" for addressing the language and curricula needs of these students: a content-based second language programme; a programme of cultural and linguistic training for all staff; and a mother tongue programme for minority

students. The model is based on research findings and practice: at the VIS every year approximately 1/3 of the graduating students gain an IB Diploma (International Baccalaureate) because they are able to take their mother tongue (other than English or German) as Language A1. The book contains insightful chapters not only for school leaders, programme designers and teachers, but also for parents. Inserted boxes of student responses give an authentic voice to the needs of second language learners, and many useful resources and websites are given.

Arguing against a common sense view of bilingualism as the co-existence of two linguistic systems, this volume develops a critical perspective which approaches bilingualism as a wide variety of sets of sociolinguistic practices connected to the construction of social difference and of social inequality under specific historical conditions.

'The editors of the SAGE Handbook of Research in International Education have brought together an impressive array of scholars whose cutting edge research addresses the growing field of international education, from the experiences of K-12 schools around the world to the field of teacher education. This book raises important questions and should be read by a broad audience' - Kenneth Cushner, Executive

'The editors of this admirable handbook have set out to produce a report on international education. Their consummate success in doing so gives those of us working in the field a new and invaluable resource. The editors may be academics but this is a book largely written by, about and for those whose job it is to teach ''internationally''. No-one working in international education will fail to be provoked, challenged or inspired by the compelling arguments advanced within this authoritative volume' - Peter MacKenzie, Principal, Hiroshima International School

'The book is well organized in carefully integrated sections and chapters and the references alone are a valuable bibliographical tool. An indispensable work highly recommended for education reference collections and the libraries of individual researchers' - J.B.Thomas, Emeritus Professor of Educational Studies, Loughborough University

Interest in the field of international education has never been more intense than at present. There are a rapidly increasing number of schools worldwide set up specifically to meet the demands of those parents who, through their own professional activities, wish to have their sons and daughters educated in schools that offer programmes based on international values. Such schools have embraced the promotion of international education as one of their major

goals and, consequently, an increasing number of organisations currently offer curricula that claim to be international in nature. Such global movements have created a parallel increase in the incorporation of forms of international education within national school systems throughout the world. This has resulted in wider forms of collaboration between schools in the public and private sectors, nationally and internationally, generating a much more substantial base of professional experience in the implementation of schemes for international education than had previously existed. This book analyses the origins, contributions and interpretations of international education. The authors identify approaches to research that will progress our knowledge and understanding of the field, and extend and even redraw it, on the basis of the research evidence presented. Content includes: - A historical overview of the ways in which the term "international education" has been interpreted - The theoretical interpretation of international education in its current context - International education in practice: exploration of the issues in terms of students, curricula, pedagogies and organising formal institutions - Conceptual challenges for international education in the future This handbook is an essential resource for those who are involved in the practice and academic study of international education. It will be of particular interest

to researchers and teachers in universities, governmental and private curriculum development agencies, examination authorities, administrators and teachers in schools. 'This volume is another valuable SAGE contribution to the expanding literature on international education. Not all handbooks are described as essential reading but this one will be, and will become an indispensable work of reference highly recommended for education libraries (both academic and governmental) and for the bookshelves of individual researchers and all involved in international education...the three editors and their fellow authors can take a collective pride in having given us an excellent volume which very successfully completes a chronological and theoretical journey through the issues, practices and future questions presented by international research and practice in international education' - Journal of Research in International Education

The fifth edition of this bestselling book provides a comprehensive introduction to bilingualism and bilingual education. In a compact and clear style, its 19 chapters cover all the crucial issues in bilingualism at individual, group and national levels.

It is common for scholarly and mainstream discourses on dual language education in the US to frame these programs as inherently

socially transformative and to see their proliferation in recent years as a natural means of developing more anti-racist spaces in public schools. In contrast, this book adopts a raciolinguistic perspective that points to the contradictory role that these programs play in both reproducing and challenging racial hierarchies. The book includes 11 chapters that adopt a range of methodological techniques (qualitative, quantitative and textual), disciplinary perspectives (linguistics, sociology and anthropology) and language foci (Spanish, Hebrew and Korean) to examine the ways that dual language education programs in the US often reinforce the racial inequities that they purport to challenge.

Bilingual education is one of the fastest growing disciplines within applied linguistics. This book includes the work of 20 specialists working in various educational contexts across Europe, Latin America and North America to create a volume which is both comprehensive in scope and multidimensional in its coverage of current bilingual initiatives. The central themes of this volume, which draws on past experiences of bilingual education, include issues in language use in classrooms at elementary, secondary and tertiary levels; participant perspectives on bilingual education experiences; and the language needs of bi- and multilingual students in monolingual

schools. This collection will be of interest to teachers and administrators in bi- and multilingual education programs, as well as scholars working in the field of language education.
