Success in Math helps students with varying learning styles master basic math concepts and prepares them for success on math competency tests. Student Texts This five-book softcover series breaks down core math concepts into short, manageable lessons that assume little background knowledge and are introduced in real-life context. In addition, chapter opener vocabulary lists and a glossary prove valuable for English language learners with below- or at-level math skills. Teacher's resources include answer Keys, as well as error analysis notes, alternative strategies for varied learning styles, problem-solving strategies, ESL notes, cooperative learning strategies, and reproducible masters are provided. Reading Level: 6-7 Interest Level: 8-12

'Thinking Mathematically' seeks to turn this familiar statement into a promise of opportunity and exploration. Blitzers examples provide both a contextual and procedural base that students can easily build upon.

For Business Math, Consumer Math, and Personal Finance (arithmetic-based) courses at the undergraduate level. This top seller continues to offer a comprehensive and effective demonstration of mathematical basic concepts through extensive use of business examples taken from real-world applications in such areas as banking, the hotel/motel industry, retail, and real estate. Strengthening and refining coverage throughout, it encompasses all areas of business mathematics beginning with skill-building sections on whole numbers and decimals; guiding students through fractions, percents, statistics, and equations; then easing them into the specifics of business-related mathematics applications with discussions on payroll, discounts, markup/markdown, interest, credit and more. Direct, friendly, and visually appealing, it keeps both the teacher and students in mind at all times, offering an adaptable self-instructional or teacher-directed format, and myriad motivational tools to stimulate interest and deepen understanding. Perfect for instructors who want to incorporate the teaching of AMATYC and NCTM standards numerous pedagogical features correlate specifically to these standards.

Consumer Mathematics presents basic math skills used in everyday situations--paying taxes, buying food, banking and investing, and managing a household. The full-color text helps learners of all ages become wiser, and more informed.

Bob Blitzer's books are highly acclaimed for their well-conceived, relevant applications and meticulously annotated examples. This highly anticipated revision achieves the difficult balance between coverage and motivation, while helping readers develop strong problem-solving skills. This book provides readers with the skill building and practice that is so crucial as well as the applications and technology necessary to foster an appreciation of the myriad uses of mathematics. This book covers a wide range of topics including set theory, logic, number theory, algebra, consumer mathematics and financial management, geometry, measurement, probability theory and statistics. For anyone interested in refreshing his/her fundamental math skills.

Teach your students to become well-informed consumers Consumer Mathematics presents basic math skills used in everyday situations--paying taxes, buying food, banking and investing, and managing a household. The full-color text helps students and young adults become wiser, more informed consumers. Lexile Level 850 Reading Level 3-4 Interest Level 6-12

This book provides readers with an overview of recent international research and developments in the teaching and learning of modelling and applications from a variety of theoretical and practical perspectives. There is a strong focus on pedagogical issues for teaching and learning of modelling as well as research into teaching and practice. The teaching of applications of mathematics and mathematical modelling from the early years through primary and secondary school and at tertiary level is rising in prominence in many parts of the world commensurate with an ever-increasing usage of mathematics in business, the environment, industry and everyday life. The authors are all members of the International Community of Teachers of Mathematical Modelling and Applications and important researchers in mathematics education and mathematics. The book will be of interest to teachers, practitioners and researchers in universities, polytechnics, teacher education, curriculum and policy.
