are African American, effectively disenfranchising 8 percent of all African Americans in the United States. In Alabama, Kentucky, and Florida, one in every five adult African Americans cannot vote. Punishment and Inclusion gives a theoretical and historical account of this pernicious practice of felon disenfranchisement, drawing widely on early modern political philosophy, continental and postcolonial political thought, critical race theory, feminist philosophy, disability theory, critical legal studies, and archival research into state constitutional conventions. It demonstrates that the history of felon disenfranchisement, rooted in postslavery restrictions on suffrage and the contemporaneous emergence of the modern “American” penal system, reveals the deep connections between two political institutions often thought to be separate,

showing the work of membership done by the criminal punishment system and the work of punishment done by the electoral franchise. Felon disenfranchisement is a symptom of the tension that persists in democratic politics between membership and punishment. This book shows how this tension is managed via the persistence of white supremacy in contemporary regimes of punishment and governance.

conventions.--Résumé de l'éditeur.

One of the most important problems faced by the United States is addressing its broken criminal justice system. This collection of essays offers a thorough examination of incarceration as a form of punishment. In addition to focusing on the philosophical aspects related to punishment, the volume's diverse group of contributors provides additional background in criminology, economics, law, and sociology to help contextualize the philosophical issues. The first group of essays addresses whether or not our current institutions connected with punishment and incarceration are justified in a liberal society. The next set of chapters explores the negative effects of incarceration as a form of punishment, including its

impact on children and families. The volume then describes how we arrived at our current situation in the United States, focusing on questions related to how we view prisons and prisoners, policing for profit, and the motivations of prosecutors in trying to secure convictions. Finally, *Rethinking Punishment in the Era of Mass Incarceration* examines specific policy alternatives that might offer solutions to our current approach to punishment and incarceration.

How the attorney-client relationship favors the privileged in criminal court—and denies justice to the poor and to working-class people of color The number of Americans arrested, brought to court, and incarcerated has skyrocketed in recent decades. Criminal defendants come from all races and

economic walks of life, but they experience punishment in vastly different ways. *Privilege and Punishment* examines how racial and class inequalities are embedded in the attorney-client relationship, providing a devastating portrait of inequality and injustice within and beyond the criminal courts. Matthew Clair conducted extensive fieldwork in the Boston court system, attending criminal hearings and interviewing defendants, lawyers, judges, police officers, and probation officers. In this eye-opening book, he uncovers how privilege and inequality play out in criminal court interactions. When disadvantaged defendants try to learn their legal rights and advocate for themselves, lawyers and judges often silence, coerce, and punish them. Privileged defendants, who are more likely to trust their defense attorneys, delegate authority

to their lawyers, defer to judges, and are rewarded for their compliance. Clair shows how attempts to exercise legal rights often backfire on the poor and on working-class people of color, and how effective legal representation alone is no guarantee of justice. Superbly written and powerfully argued, *Privilege and Punishment* draws needed attention to the injustices that are perpetuated by the attorney-client relationship in today's criminal courts, and describes the reforms needed to correct them.

Handbook on the Consequences of Sentencing and Punishment Decisions, the third volume in the Routledge ASC Division on Corrections & Sentencing Series, includes contemporary essays on the consequences of punishment

during an era of mass incarceration. The Handbook Series offers state-of-the-art volumes on seminal and topical issues that span the fields of sentencing and corrections. In that spirit, the editors gathered contributions that summarize what is known in each topical area and also identify emerging theoretical, empirical, and policy work. The book is grounded in the current knowledge about the specific topics, but also includes new, synthesizing material that reflects the knowledge of the leading minds in the field. Following an editors' introduction, the volume is divided into four sections. First, two contributions situate and contextualize the volume by providing insight into the growth of mass punishment over the past three decades and an overview of the broad consequences of punishment decisions. The overviews are

then followed by a section exploring the broader societal impacts of punishment on housing, employment, family relationships, and health and well-being. The third section centers on special populations and examines the unique effects of punishment for juveniles, immigrants, and individuals convicted of sexual or drug-related offenses. The fourth section focuses on institutional implications with contributions on jails, community corrections, and institutional corrections.

This book considers the problem of law's physical control of persons and it illuminates competing visions of the law: as both a tool of regulation and as an instrument of coercion or punishment.

its applications, such as how long capital appeals take. Mandery's examination of capital punishment requires the reader to think about some basic philosophical questions, such as would you ever kill? Each chapter begins with a primer of the issue at hand, followed by the data and critical documents necessary to make an educated assessment, and ending with essays offering differing viewpoints by some of the best minds in the country, including Stephen Nathanson, Hugo Adam Bedau, Michael Radelet, Scott Turow, Carol and Jordan Steiker, and Franklin Zimring.

This study focuses on the practice of punishment, as it is inflicted by the state. The author's first-hand experience with penal reform, combined with philosophical reflection, has led

him to develop a theory of punishment that identifies the principles of sentencing and corrections on which modern correctional systems should be built. This new theory of punishment is built on the view that the central function of the law is to reduce the need to use force in the resolution of disputes. Professor Cragg argues that the proper role of sentencing and sentence administration is to sustain public confidence in the capacity of the law to fulfil that function. Sentencing and corrections should therefore be guided by principles of restorative justice. He points out that, although punishment may be an inevitable concomitant of law enforcement in general and sentencing in particular, inflicting punishment is not a legitimate objective of criminal justice. The strength and appeal of this account is that it moves well

beyond the boundaries of conventional discussions. It examines punishment within the framework of policing and adjudication, analyses the relationship between punishment and sentencing, and provides a basis for evaluating correctional practices and such developments as electronic monitoring.
