Steel is often cited as the first of several new areas for industrial mass-production, which are said to characterise a "Second Industrial Revolution", beginning around 1850, although a method for mass manufacture of steel was not invented until the 1860s, when Sir Henry Bessemer invented a new furnace which could convert molten pig iron into steel in large quantities. However, it only became widely available in the 1870s after the process was modified to produce more uniform quality.

Industrial Revolution — Wikipedia

Industrial Revolution, in modern history, the process of change from an agrarian and handicraft economy to one dominated by industry and machine manufacturing. The process began in Britain in the 18th century and from there spread to other parts of the world, driving changes in energy use, socioeconomics, and culture.

Industrial Revolution | Definition, History, Dates ...

The Industrial Revolution was equally significant in increasing the power of social reformers. The middle class (which emerged during the Industrial Revolution when manufacturers and others in similar positions could prosper) had far greater understanding of the plight of the lower-classes, and far more sympathy with them.

economic and technological innovation." "[T] he Protestant Reformation was an important link in the chain of causation that led to the Industrial Revolution, even if it was not the critical link that some have suggested." "[I]t seems more than coincidence that the Industrial Revolution had its beginning in predominantly Protestant nations." (244-45)

The Beloved Myth: Protestantism and the Rise of Industrial ...

In 1530 England was a backward economy. Yet by 1780 she possessed a global empire and was on the verge of becoming the world’s first industrialized power. This book deals with the intervening 250 years, and explains how England acquired this unique position in history. Esteemed historian Christopher Hill recounts a story that begins with the break with Europe before hitting a tumultuous period of war and revolution, combined with a cultural and scientific flowering that made up the early ...

Reformation is a related term of revolution. As a proper noun reformation is the reformation. As a noun revolution is revolution.

In 1530 England was a backward economy, yet by 1780 she possessed a world empire and was just about to become the first industrialized power in the world. This book deals with the intervening 250 years, and tries to explain how England won her unique position in the world. This is a story that opens with the break with Europe and charts the tumultuous period of war, revolutions, and the a cultural and scientific flowering that made up the early modern period. Yet, during this period Britain also become the home to imperial ambitions and economic innovation. Hill excavates the conditions and ideas that underpin this age of extraordinary change, and shows how, and why, Britain became the most powerful nation in the world.

The masterful account of Britain’s reshaping as a modern nation In 1530 England was a backward economy. Yet by 1780 she possessed a global empire and was on the verge of becoming the world’s first industrialized power. This book deals with the intervening 250 years, and explains how England acquired this unique position in history. Esteemed historian Christopher Hill recounts a story that begins with the break with Europe before hitting a tumultuous period of war and revolution, combined with a cultural and scientific flowering that made up the early modern period. It was in this era that Britain became home to imperial ambitions and economic innovation, prefiguring what was to come. Hill excavates the conditions and ideas that underpin this age of extraordinary change, and shows how, and why, Britain became the most powerful nation in the world.
