Technique and multicriteria analysis are examined by top researchers. Audience: A wide readership drawn from theoretical and applied mathematicians, such as operations researchers, management scientists, statisticians, computer scientists, bankers, marketing managers, forecasters, and scientific societies such as EURO and TIMS.

This open access book describes how elite studies theoretically and methodologically construct their object, i.e. how particular conceptualizations of elites are turned into research practice using different methods for collecting, dealing with and analyzing empirical data. The first of four sections focuses on what Mills named the power elite and includes Bourdieu ' s field of power. The second section addresses studies of the domain of economic power, whereas the third section centers on

Technique Performance
research on elite education. The fourth and last section highlights research on symbolic power, either within social fields or as a dimension of social structure at large, areas where recognition is essential. All sections comprise empirical case studies of elites and power, whereby each of which makes explicit the various methodological choices made in the research process. Through focusing on methodological approaches for the study of elites and power and on how such approaches relate to each other as well as to the theoretical perspectives that underpin them, this book will be a valuable source for social scientists.

This book presents the latest on the theoretical approach of the contemporary issues evolved in strategic marketing and

Techniques Performance
the integration of theory and practice. It seeks to make advancements in the discipline by promoting strategic research and innovative activities in marketing. The book highlights the use of data analytics, intelligence and knowledge-based systems in this area. In the era of knowledge-based economy, marketing has a lot to gain from collecting and analyzing data associated with customers, business processes, market economics or even data related to social activities. The contributed chapters are concerned with using modern qualitative and quantitative techniques based on information technology used to manage and analyze business data, to discover hidden knowledge and to introduce intelligence into marketing processes. This allows for a focus on innovative applications in all aspects of marketing, of computerized technologies related to data analytics, predictive analytics and

modeling, business intelligence and knowledge engineering, in order to demonstrate new ways of uncovering hidden knowledge and supporting marketing decisions with evidence-based intelligent tools. Among the topics covered include innovative tourism marketing strategies, marketing communications in small and medium-sized enterprises (SMEs), the use of business modeling, as well as reflecting on the marketing trends and outlook for all transportation industry segments. The papers in this proceedings has been written by scientists, researchers, practitioners and students that demonstrate a special orientation in strategic marketing, all of whom aspire to be ahead of the curve based on the pillars of innovation. This proceedings volume compiles their contributions to the field, highlighting the exchange of insights on strategic issues in the science of innovation

The conference proceedings contains contributions to the Logistics Management conference 2019. The objective of the LM conferences is to discuss new ideas and technical developments related to the management of logistic systems. A special focus is put on digitalization of supply chains and decarbonization in the transport industry.

This book is about promoting corporate responsibility in its original meaning: businesses should have a positive impact on society, and society should not only be

Download Ebook Renault Dauphine 1093 49 Ch Fiche

Techniques Performance
a lever of making a profit. When we treat social responsibility as an external function of the core business, we are exposed to the worst. Business for Society seeks to redress the balance and promotes the original idea of corporate responsibility. This first book in the series of the same name sets the scene and presents the key theories across the various management disciplines to answer the following questions: ‘ How, why and under what conditions can business act for society? ’ The book narrows and discusses examples of businesses which are making impressive strides in delivering positive impacts for society as well as their bottom lines; but as the concept of corporate responsibility has become more mainstream in recent years, many organisations have adopted the term and reduced it to a marketing message. Areas covered include a historical perspective on the hijacking of business

Download Ebook Renault Dauphine 1093 49 Ch Fiche

responsibility towards society, management knowledge and value, the Business for Society project against hijacking, accounting for society, finance for society and governance for society and democracy. The book will be of interest for scholars and students in the fields of corporate social responsibility, business ethics and governance.
