reflection and editorial provocations, this volume will help students engage critically with a variety of understandings of play, and diverse approaches to harnessing children's natural propensity to play. Considering the role of the learning environment, the practitioner, the wider community, and policy, chapters are divided into four key sections which reflect major influences on practice and pedagogy: Being alongside children Those who educate Embedding families and communities Working with systems Offering in-depth discussion of diverse perceptions, potentials and practicalities of early childhood play, this text will enhance understanding, support self-directed learning, and provoke and transform thinking at both graduate and postgraduate levels, particularly in the field of early childhood education and care, for students, educators, integrated service providers and policy makers.

Is it time to re-think continuous practice in the early years? The world of education is an amazing and rewarding world to be in, but there is a sense among many that work within it that there is something not quite right, that all is not well. In this book, Greg Bottrill explores how he ensures that, in his Early Years setting, continuous provision enables children. He shares his Early Years pedagogy through the '3Ms' and explains how to apply these in the

classroom. Greg also explores the definition of play - what it is and what it isn't - and the challenging role of the Early Years teacher. This book shares good practice in: early reading and the joy of reading early writing development boys writing the nature of outdoor play and how to make this truly 'outdoor' the role of parents in child development mathematics in play when and how to do intervention work with children how to get Headteachers and centre managers on board.

Asking key questions about how policies and systems impact on children's early years and rethinking the ways in which young children's learning and development becomes integral to policy, this insightful text challenges the common misconception that policy development and pedagogical implementation are separate endeavours. Challenging the Intersection of Policy with Pedagogy explores symbiotic dynamics between policy and practice in the early years to consider the implications of policies relating to documentation, professional well-being, mentoring, the role of the family, language development and diversity. Written to provoke group discussion and extend thinking, opportunities for international comparison, points for reflection and editorial provocations will help students, educators, integrated service providers and policy makers engage critically with a variety of understandings of how policy and practice

Rethinking Superhero and Weapon Play offers a fresh and knowledgeable insight into children's fascination with superheroes and weapon play. It explores what lies at the heart of superhero and weapon play and why so many children are drawn to this contentious area of children's play. This innovative book offers: A detailed look at why many early years professionals and teachers are cautious about superhero and weapon play. Does weapon play make children more violent? Do 'goodies versus baddies' stories make children more confrontational? Do superheroes offer positive gender role-models? The book tackles these questions and suggests some alternative perspectives, as well as offering practical advice about keeping children's superhero and weapon play positive and productive. An exploration of how superhero

and weapon play relates to the development of children's moral values, moral principles and moral reasoning; the building of children's cooperation, empathy and sense of community; and the development of children's sense of self and self-esteem. Discussion of the deep moral themes that lie within superhero narratives, and how superhero characters and narratives can be used to enhance and deepen children's understanding of good character, moral responsibility, attachment, prejudice and ill-treatment, and why it is important to be good in the first place. A wealth of learning opportunities and suggestions of ways to use superheroes to advance children's moral, philosophical and emotional thinking This book is an excellent resource for those studying or working in early years or primary education who wish to understand the phenomenon of children's superhero and weapon play and make the most of children's enthusiasm for it. "Warm, funny, smart, and honest, the argument made in Steven Popper's book astutely, and with a sharp eye for detail, teases out many subtle reflections on morality, childhood development and the paradoxes of human nature, through the lens of our much-loved Superhero narratives. He is able, through nuanced and well-supported argument, drawn from both theory and practice, and from pedagogy and real life, to present a compelling and detailed account of the ways in which these stories might interface with the moral development of children. The book offers a

rich, and articulate narrative of its own, which 'aims at the good' in its desire to propose that immersion in such superhero 'narrative play' can teach children about ethics, social responsibility, and what it is to be 'human'. This is also a wonderful contribution to debates around the role of mass media in promoting critical thinking and enquiry among children." Dr. Sheena Calvert, Senior Lecturer, University of Westminster, UK "This book authoritatively assesses the virtues of engaging in superhero play with young children. It argues that far from damaging children and encouraging them to adopt unthinking, aggressive behaviours superhero play is an implicitly moral activity. It encourages children to explore profound moral and ethical thinking. This book is both a well-researched account of the appeal that superhero play has for children of both sexes and a practical guide to how such play can be used imaginatively in early years settings." Rob Abbott, Senior Lecturer in Early Childhood and Education, University of Chichester, UK

Based on extensive research, and grounded in everyday classroom practice, the authors of this book explore important issues surrounding play in the early years curriculum. The book presents children's views on, and response to their role-play environment, alongside examples of good classroom practice, and addresses vital

questions such as: Will structuring role play replace children's own attempts to create scenarios that grow out of their interests and relationships? Has an over-emphasis on subjects like literacy and numeracy eclipsed the important processes inherent in children's social play? How we can ensure that provision for role play fully benefits all young children? Critically, the authors present the child's perspective on play in schools throughout, and argue firmly against a formal, inflexible learning environment for young children. This book will be fascinating to all students on primary education undergraduate courses and early childhood studies. Researchers and course leaders will also find this book a ground-breaking read.

Recognising multiple cultural, ethical and geographical influences which impact on the development of a child's identity, this insightful text explores the role of early childhood practitioners and settings in nurturing and navigating the child's sense of being and belonging. Multiple Early Childhood Identities confronts the diverse factors which influence early identity-formation to emphasise the child's understanding of self, outsiders' projections and the messages communicated by educators, family members and the wider community as critical to a child's identity and wellbeing. Written to provoke group discussion and extend thinking, this text also provides opportunities

Diverse Early Childhood Education Policies and Practices explores issues in early childhood education and teacher preparation in five Asian countries: India, Singapore, China, Sri Lanka, and the Maldives. Some observed classrooms in these countries reflect influences that are simultaneously indigenous and colonial, local and global. By highlighting the diverse and often hybrid classroom pedagogies at work in these 21st century Asian classrooms, the discussions in this book take into consideration the influence of globalization on local policies and practices, and the challenge educators face when they are

expected to reconcile different and sometimes conflicting cultural and pedagogical world views. Through a research-driven analysis of key issues such as recent revisions to national early childhood education policies, perceptions on "play-based and child-centered" pedagogy, curriculum and learning materials, and an emphasis on the teaching of values, this book illuminates the diversity of the observed classrooms as well as current trends in early childhood education in parts of Asia. The cross-national perspective serves to expand and diversify the global discourse of early childhood education and teacher education.

Rethinking Early Childhood Education is alive with the conviction that teaching young children involves values and vision. This anthology collects inspiring stories about social justice teaching with young children. Included is outstanding writing from childcare teachers, early-grade public school teachers, scholars, and parents. Early childhood is when we develop our core dispositions--the habits of thinking that shape how we live. This book shows how educators can nurture empathy, ecological consciousness, curiosity, collaboration, and activism in young children. It invites readers to rethink early childhood education, reminding them that it is inseparable from social justice and ecological education. An outstanding resource for
