Thoroughly updated and revised—with half of the chapters new to the second edition—Missiology equips the reader with a vast resource on contemporary missions. This graduate-level introduction is divided into five sections (Introduction to the Study of Missiology, Biblical Basis of Missions, Theology of Missions, and Applied Missiology) and offers essays on modern missions issues and methods such as contextualization, spiritual warfare, and orality, as well as chapters on major world religions and cults in North America. A retired missionary and long-time professor of missions, editor John Mark Terry enlists a wide range of evangelical authors, most with significant experience in international or North American missions. Pastors will find helpful information on church planting in North America and on developing a missions-minded church. Students will benefit from the chapters on understanding the call to missions and the current status of world evangelization. All readers will profit from a valuable one-

volume reference work on missions.

David Bosch (1929-1992) was one of the foremost mission theologians of the twentieth century; a prolific scholar, committed church leader and active participant in the global conciliar and evangelical mission movements. His distinctive role in the South African church's struggle against apartheid is less well known, however. After reviewing Bosch's background and exploring key themes in his understanding of mission and evangelism, Livingston explores Bosch's legacy from the perspective of the missionary nature of the church. The church is God's kingdom community, acting as a witness to and instrument of the coming reign of God. The church is God's alternative community, simultaneously set apart from the world but also existing for the sake of the world, exemplifying the radical implications of Christ's new community. It is also God's reconciled and reconciling community, serving as a sign and embodiment of God's love in Christ. For those acquainted with Bosch only as the author of his magisterial *Transforming Mission, A Missiology of the Road* shows how Bosch integrated his theology and practice in a faithful, contextually relevant way within South Africa and the global church.

Science as an instrument to justify religious missions in secular society The relationship between religion and science is complex and continues to be a topical issue. However, it is seldom zoomed in on from both Protestant and Catholic perspectives. By doing so the contributing authors in this collection gain new insights into the origin and development of missiology. Missiology is described in this book as a “project of modernity,” a contemporary

Access Free Rev J Missiology

form of apologetics. "Scientific apologetics" was the way to justify missions in a society that was rapidly becoming secularized. Mission & Science deals with the interaction between new scientific disciplines (historiography, geography, ethnology, anthropology, linguistics) and new scientific insights (Darwin's evolutionary theory, heliocentrism), as well as the role of the papacy and what inspired missionary practice (first in China and the Far East and later in Africa). The renewed missiology has in turn influenced the missionary practice of the twentieth century, guided by apostolic policy. Some "missionary scholars" have even had a significant influence on the scientific discourse of their time.

This fresh perspective on the church explores its essential nature as a community of people governed by the Word and led and taught by the Spirit.

"In this book Nyasulu presents a brief and simple biblical theological account of a study of the spread of the Christian faith to cross geographical, social and cultural boundaries. The book also considers new relevant avenues of doing missions."--Back cover.
