tackling the many challenges posed by revision foot and ankle surgery. The book is organized thematically into sections on the forefoot, trauma, sports injuries, and arthritis and reconstruction, with each chapter including key takeaway points, discussions of evaluation, surgical planning, and the cases themselves. Specific revision topics presented include first MTP joint fusion, failed bunion and hammertoe, failed Lisfranc and fifth metatarsal fracture, failed flatfoot and subtalar fusion, and nonunion of ankle fusion and failed total ankle replacement, among others. The challenge of revision foot and ankle surgery is that there are countless ways for a surgery to fail. Therefore, presenting as many different scenarios as possible and techniques to address them is the main advantage of the book. Practical and user-

friendly, Revision Surgery of the Foot and Ankle will prove indispensable to both the young and veteran orthopedic surgeon preparing for these challenging surgical interventions.

Revision spine surgery requires a unique skill set different from performing a primary operation. Understanding when a simple revision is sufficient, when a more complex approach is needed, or when a non-surgical option should be considered is critical to good patient care and outcomes. In this first book to focus exclusively on the complex topic of revision spine surgery, world-renowned Dr. Alex Vaccaro and leading neuro and orthopaedic spine surgeons, navigate physicians through the initial evaluative process and the

worldwide. Divided into five thematic sections, each chapter is a purposeful mix of theory, data, and tips/pearls with detailed illustrations, tables, and references. Appropriately evidence-based, they include bullet points for quick reference and rely heavily on step-by-step intraoperative photographs and radiology. Part I presents the history of TAR, implant considerations (mobile-bearing vs. fixed-bearing), and indications/contraindications for the procedure. The subsequent three sections discuss all aspects of primary TAR, procedures secondary to primary TAR, and revision TAR, respectively, bringing together the most recent evidence, implant options and surgical techniques. The final section covers topics related to limb salvage after failed TAR, including preventive measures, wound healing, and infection
