In this brilliant, engrossing work, Jack Turner explores an era—from ancient times through the Renaissance—when what we now consider common condiments were valued in gold and blood. Spices made sour medieval wines palatable, camouflaged the smell of corpses, and served as wedding night aphrodisiacs.

Indispensable for cooking, medicine, worship, and the arts of love, they were thought to have magical properties and were so valuable that they were often kept under lock and key. For some, spices represented Paradise, for others, the road to perdition, but they were potent

Gary Paul Nabhan takes the reader on a vivid and far-ranging journey across time and space in this fascinating look at the relationship between the spice trade and culinary imperialism. Drawing on his own family's history as spice traders, as well as travel narratives, historical accounts, and his expertise as an ethnobotanist, Nabhan describes the critical roles that Semitic peoples and desert floras had in setting the stage for globalized spice trade. Traveling along four prominent trade routes—the Silk Road, the Frankincense Trail, the Spice Route, and the Camino Real (for chiles and

His stories, recipes, and linguistic analyses of cultural diffusion routes reveal the extent to which aromatics such as cumin, cinnamon, saffron, and peppers became adopted worldwide as signature ingredients of diverse cuisines. Cumin, Camels, and Caravans demonstrates that two particular desert cultures often depicted in constant conflictÑArabs and JewsÑhave spent much of their history collaborating in the spice trade and suggests how a more virtuous multicultural globalized society may be achieved in the future. explorers such as Columbus, Vasco da Gama and Magellan dreamt of sailing directly to the Spice Islands.
