Saving the City: The Great Financial Crisis of 1914 ...

It is therefore no wonder that Greek and Roman political theory is above all else the search for a remedy for the malaise of stasis. Like the great Athenian statesman Solon before them, the philosophers want to save the city from itself, and to create or identify a basis for harmony which will preserve it in unity.

Saving the City provides a detailed analysis of the attempts of ancient writers and thinkers, from Homer to Cicero, to construct and recommend political ideals of statesmanship and ruling, of the political community and of how it should be founded in justice. Malcolm Schofield debates to what extent the Greeks and Romans deal with the same issues as modern political thinkers.

A week before the outbreak of the First World War, an acute financial crisis surged over London: the Stock Exchange closed; money markets worldwide were paralysed. Drawing on diaries, letters, memoirs, press reports, and official archives, this book tells the extraordinary, and largely unknown, story of the first true global financial crisis.

The rise to power of one of Canada's most progressive municipal movements in recent memory. When it was dreamed up in the early 2000s by a transportation bureaucrat with a quixotic dream of bringing tramways back to the streets of Montreal, few expected Projet Montréal to go anywhere. But a decade and a half later, the party was a grassroots powerhouse with an ambitious agenda that had taken power at city hall--after dumping its founder, barely surviving a divisive leadership campaign and earning the ire of motorists across Quebec. Projet Montréal aspired to transform Montreal into a green, human-scale city with few, if any equal in North America. Equal parts reportage, oral history and memoir, *Saving the City* chronicles what the party did right, where it failed, and where it's headed. Written from the perspective of someone who worked for Projet Montréal's administration for almost a decade, Daniel Sanger's book draws on dozens of interviews with other actors in the party and on the municipal scene, past and present. A highly readable history of Montreal municipal politics over the past 30 years, *Saving the City* will also discuss issues of interest to city-dwellers across Canada. Are political parties at the municipal level a good thing? Is Montreal's borough system a model for other big cities? What are the best ways to control urban car use? What is the optimum width for a sidewalk? The best kind of street tree? And why free parking is a terrible idea.

Saving the City provides a detailed analysis of the attempts of ancient writers and thinkers, from Homer to Cicero, to construct and recommend political ideals of statesmanship and ruling, of the political community and of how it should be founded in justice. thinkers.

Biography of Dana Crawford

In this masterful portrait of life in Savannah before, during, and after the Civil War, prize-winning historian Jacqueline Jones transports readers to the balmy, raucous streets of that fabled Southern port city. Here is a subtle and rich social history that weaves together stories of the everyday lives of blacks and whites, rich and poor, men and women from all walks of life confronting the transformations that would alter their city forever. Deeply researched and vividly written, *Saving Savannah* is an invaluable contribution to our understanding of the Civil War years.

Alia takes matters into her own hands when government officials refuse to listen to her concerns about the books in the Baðsrah Central Library.

In *Saving Our Cities*, William W. Goldsmith shows how cities can be places of opportunity rather than places with problems. With strongly revived cities and suburbs, working as places that serve all their residents, metropolitan areas will thrive, thus making the national economy more productive, the environment better protected, the citizenry better educated, and the society more reflective, sensitive, and humane. Goldsmith argues that America has been in the habit of abusing its cities and their poorest suburbs, which are always the first to be blamed for society's ills and the last to be helped. As federal and state budgets, regulations, and

Bookmark File PDF Saving The City The Great Financial Crisis Of 1914

programs line up with the interests of giant corporations and privileged citizens, they impose austerity on cities, shortchange public schools, make it hard to get nutritious food, and inflict the drug war on unlucky neighborhoods. Frustration with inequality is spreading. Parents and teachers call persistently for improvements in public schooling, and education experiments abound. Nutrition indicators have begun to improve, as rising health costs and epidemic obesity have led to widespread attention to food. The futility of the drug war and the high costs of unwarranted, unprecedented prison growth have become clear. Goldsmith documents a positive development: progressive politicians in many cities and some states are proposing far-reaching improvements, supported by advocacy groups that form powerful voting blocs, ensuring that Congress takes notice. When more cities forcefully demand enlightened federal and state action on these four interrelated problems—inequality, schools, food, and the drug war—positive movement will occur in traditional urban planning as well, so as to meet the needs of most residents for improved housing, better transportation, and enhanced public spaces.

A modern-day classic. This highly acclaimed adventure series about two friends desperate to save their doomed city has captivated kids and teachers alike for almost fifteen years and has sold over 3.5 MILLION copies! The city of Ember was built as a last refuge for the human race. Two hundred years later, the great lamps that light the city are beginning to flicker. When Lina finds part of an ancient message, she's sure it holds a secret that will save the city. She and her friend Doon must race to figure out the clues before the lights go out on Ember forever! This book makes the case that several urban technologies contribute to wicked problems such as climate change and vast social and economic inequalities. Such situations often create unfavorable conditions for mental life in cities. These conditions force us to expand the taxonomy of technology to include new designations: "wicked" and "saving" technologies. Epting holds that the latter can support worthwhile goals such as socially just urban sustainability. Along with fleshing out this view, he provides concrete examples of saving technologies, which include cohousing initiatives, ariel cable cars, participatory budgeting, and car-free zones/cities.
