Winner of the Nebula Award for Best Novel • Discover the novel that launched one of science fiction's most beloved, acclaimed, and awarded trilogies: Kim Stanley Robinson's masterly near-future chronicle of interplanetary colonization. "A staggering book . . . the best novel on the colonization of Mars that has ever been written."—Arthur C. Clarke For centuries, the barren, desolate landscape of the red planet has beckoned to humankind. Now a group of one hundred colonists begins a mission whose ultimate goal is to transform Mars into a more Earthlike planet. They will place giant satellite mirrors in Martian orbit to reflect light onto its surface. Black dust sprinkled on the polar caps will capture warmth and melt the ice. And massive tunnels drilled into the mantle will create stupendous vents of hot gases. But despite these ambitious goals, there are some who would fight to the death to prevent Mars from ever being changed.

Dad says because of the army he stood shoulder to shoulder with polar bears and watched the sun rise over the frozen fields of Alaska, which sounds really exciting. And because of the Army he slept in sludge, shoulder to shoulder with snakes and watched the sun set over the swamps of Alabama -- which does not. In a timely, but not politically

charged way, author Alan Madison looks at the way a family copes with having a parent away on a 100 day, 99 night military tour of duty through the eyes of the very loveable Esmerelda (Esme) Swishback McCarthur. Esme wants to be good while her dad is away. In fact, she feels like it's her duty to be good. But being good can be hard, especially if you have a little brother like Ike. By following Esme's story, as she awaits her father's return, readers will see how heroism can translate to every member of a family. Aside from the military families that this book serves, readers who wonder what it would be like if their mother, father, brother, or sister was sent away will relate to Esme's quiet strength and candor and will understand her worry about what could happen. This story has the potential to speak to readers on a personal level and to turn a concept that seems so hard to grasp--war--into one that feels much more personal.

The New York Times bestselling guide to thinking like literature's greatest detective. "Steven Pinker meets Sir Arthur Conan Doyle" (Boston Globe), by the author of The Confidence Game. No fictional character is more renowned for his powers of thought and observation than Sherlock Holmes. But is his extraordinary intellect merely a gift of fiction, or can we learn to cultivate these abilities ourselves, to improve our lives at work and at home? We can, says psychologist and

journalist Maria Konnikova, and in *Mastermind* she shows us how. Beginning with the “brain attic”—Holmes’s metaphor for how we store information and organize knowledge—Konnikova unpacks the mental strategies that lead to clearer thinking and deeper insights. Drawing on twenty-first-century neuroscience and psychology, *Mastermind* explores Holmes’s unique methods of ever-present mindfulness, astute observation, and logical deduction. In doing so, it shows how each of us, with some self-awareness and a little practice, can employ these same methods to sharpen our perceptions, solve difficult problems, and enhance our creative powers. For Holmes aficionados and casual readers alike, Konnikova reveals how the world’s most keen-eyed detective can serve as an unparalleled guide to upgrading the mind.

When he decides to turn his fifth grade teacher's love of the dictionary around on her, clever Nick Allen invents a new word and begins a chain of events that quickly moves beyond his control.

An updated and revised edition of the controversial classic--now more relevant than ever--argues that boys are the ones languishing socially and academically, resulting in staggering social and economic costs. women the attention and assistance that was long overdue. Now, after two major waves of feminism and decades of policy reform, women have made massive strides in education. Today they outperform men in nearly every measure of social, academic, and vocational well-being. Christina Hoff Sommers contends that it's time to take a hard look at present-day realities and recognize that boys need help. Called "provocative and controversial . . . impassioned and articulate" ("The Christian Science Monitor"), this edition of "The War Against Boys" offers a new preface and six radically revised chapters, plus updates on the current status of boys throughout the book. Sommers argues that the problem of male underachievement is persistent and worsening. Among the new topics Sommers tackles: how the war against boys is harming our economic future, and how boy-averse trends such as the decline of recess and zero-tolerance disciplinary policies have turned our schools into hostile environments for boys. As our schools become more feelings-centered, risk-averse, competition-free, and sedentary, they move further and further from the characteristic needs of boys. She offers realistic, achievable solutions to these problems that include boy-friendly pedagogy, character and vocational education, and the choice of single-sex classrooms. "The War Against Boys" is an incisive, rigorous, and heartfelt argument in favor of recognizing and confronting a new reality: boys are languishing in education and the
