This study guide helps prepare for the ETS Praxis 2 Secondary Math exams, given both on paper and computer. The test code is 5161. The content addressed includes Algebra and Number Theory, Analytic Geometry, Geometry, Trigonometry, Functions and their Graphs, Calculus (first semester), Data Analysis and Statistics, Probability, Discrete Mathematics and Matrix / Vector Algebra. There are 95 practice questions embedded in the content to demonstrate how the content is applied in questions on the exam. As a graphing calculator is required for the exam, there are some instructions for use of the TI-84. This workbook is not a complete tutorial for the calculator.

In the first decade of the twenty-first century, the People's Republic of China experienced dramatic growth and expansion that altered the educational environment of children. Rapid economic development increased prosperity and educational opportunities for children expanded in a wealthier society. Yet, a by-product of rising wealth was rising inequality. While the children of the emerging urban middle and elite classes enjoyed new prosperity, the children of the persistently poor in rural communities continued to experience challenges such as food insecurity, illness, hardships of family separation, and migrant life on the margins of the cities. This time period saw a large resource gap emerge between the home conditions of poor rural children compared with those of their wealthier urban counterparts. This book highlights the complexities China has experienced in seeking to extend full educational access to rural children— including rural- to- urban migrant and ethnic minority children—during a momentous period in China. Chapters delve into the experiences, perceptions, strategies, and difficulties of rural- origin children and their families in the school system, and lay bare the challenges of policy initiatives designed to support rural education. We hope the experiences detailed here will be of interest to students and scholars of rural educational policy and practice in China and worldwide.

From an international comparative perspective, this third book in the prestigious eduLIFE Lifelong Learning series provides a thorough investigation into how social inequalities arise during individuals' secondary schooling careers. Paying particular attention to the role of social origin and prior performance, it focuses on tracking and differentiation in secondary schooling examining the short- and long-term effects on inequality of opportunities. It looks at ways in which differentiation in secondary education might produce and reproduce social inequalities in educational opportunities and educational attainment. The international perspective allows illuminating comparison in light of the different models, rules and procedures that regulate admission selection and learning in different countries.
