A respected resource for decades, the Guide for the Care and Use of Laboratory Animals has been updated by a committee of experts, taking into consideration input from the scientific and laboratory animal communities and the public at large. The Guide incorporates new scientific information on common laboratory animals, including aquatic species, and includes extensive references. It is organized around major components of animal use: Key concepts of animal care and use. The Guide sets the framework for the humane care and use of laboratory animals. Animal care and use program. The Guide discusses the concept of a broad Program of Animal Care and Use, including roles and responsibilities of the Institutional Official, Attending Veterinarian and the Institutional Animal Care and Use Committee. Animal environment, husbandry, and management. A chapter on this topic is now divided into sections on terrestrial and aquatic animals and provides recommendations for housing and environment, husbandry, behavioral and population management, and more. Veterinary care. The

Guide discusses veterinary care and the responsibilities of the Attending Veterinarian. It includes recommendations on animal procurement and transportation, preventive medicine (including animal biosecurity), and clinical care and management. The Guide addresses distress and pain recognition and relief, and issues surrounding euthanasia. Physical plant. The Guide identifies design issues, providing construction guidelines for functional areas; considerations such as drainage, vibration and noise control, and environmental monitoring; and specialized facilities for animal housing and research needs. The Guide for the Care and Use of Laboratory Animals provides a framework for the judgments required in the management of animal facilities. This updated and expanded resource of proven value will be important to scientists and researchers, veterinarians, animal care personnel, facilities managers, institutional administrators, policy makers involved in research issues, and animal welfare advocates.

The new and updated edition of this accessible text provides a comprehensive overview of the comparative physiology of animals within an environmental context. Includes two brand new chapters on Nerves and Muscles and the Endocrine System. Discusses both comparative systems physiology and environmental physiology. Analyses and integrates problems and adaptations for each kind of environment: marine, seashore and estuary, freshwater, terrestrial and parasitic. Examines mechanisms and responses beyond physiology. Applies an evolutionary perspective to the analysis of environmental adaptation. Provides modern molecular biology insights into the mechanistic basis of adaptation, and takes the level of analysis beyond the cell to the membrane, enzyme and gene. Incorporates more varied material from a wide range of animal types, with less of a focus purely on terrestrial reptiles, birds and

This statutory guidance on injunctions to prevent gang-related violence draws on the experience and knowledge of the police service, local authorities and a wide range of local partners involved in dealing with violent gangs. It has been developed and approved by partners across the Criminal Justice System, as well as local practitioners. It has been produced after consultation with the Lord Chief Justice and the Master of the Rolls, and has been laid before Parliament by the Home Secretary. The Policing and Crime Act 2009 contains provision for injunctions to prevent gang-related violence to be sought against an individual; these were commenced in January 2011. The Crime and Security Act 2010 contains provisions for breach of an injunction to be enforced against 14 to 17 year olds; these will be commenced in January 2012.

Empirical research has clearly demonstrated that animal abuse in childhood is associated with family violence and violent behavior towards humans in general. Such abuse is accordingly of increasing interest within human services and the criminal justice system. This handbook will serve as an ideal resource for therapists in social work, psychology, psychiatry, and allied fields who work with children who have abused animals. It provides step-by-step guidance on how to assess, develop appropriate treatment plans for, and treat children who commit animal abuse, based on the AniCare model developed by the Animals and Society Institute. Exercises cover the identification and expression of

feelings, the development of empathy, self-management skills, and working with parents. Careful consideration is also paid to the effects of witnessing animal abuse. The theoretical framework is eclectic, encompassing cognitive behavioral, psychodynamic, and attachment theories. A number of illustrative case studies are included, along with excerpts from treatment sessions. Accompanying electronic supplementary material demonstrates role-played assessment and treatment and includes workshop presentations of pedagogic material.

Tanzania is one of the most bio diverse countries on the African continent with a long history of conservation. The Tanzanian government remains committed to conserving wildlife resources and their habitats. Legislation on wildlife conservation in Tanzania dates as far back as the 1890 ' s and from that time, it has been transformed to address modern day challenges and changing wildlife conservation methods. Tanzania is also a party to various international instruments including CITES, UNCAC and UNCTOC. These instruments make provisions for parties to enact legislation that will enhance wildlife law enforcement. They include provisions on regulation of wildlife trade, prevention of organized crime and money laundering and addressing corruption. Tanzania has domesticated these provisions by enacting various pieces of legislation including anti money laundering laws, prevention of organized crime laws and anti corruption laws. These laws support the main wildlife legislation in providing harsher penalties for wildlife offences and addressing corruption as a driver of wildlife crimes. Despite all the policy and legislative efforts made by Tanzania to prevent wildlife crime, there has been a worrying loss of wildlife in the recent past. This has been attributed to high demand for wildlife products in Asia, poverty in Tanzania that incentivises wildlife crime, penetration of organised criminal groups into Tanzania and corruption in law enforcement. Tanzania has been working to overcome these challenges and has seen wildlife poaching and trafficking kingpins arrested and handed very hefty penalties which will hopefully deter other wildlife offenders.
