Placing an emphasis on global perspectives and current research, this wide praised and adopted sociology textbook introduces the reader to the field of sociology. John Macionis, like many people, took a college course that shaped his life. His first sociology course helped him make sense of the world. John shares his enthusiasm, excitement, and teaching experience through a clear and engaging writing style and emphasis on sociology's relevance to everyday life.

With an emphasis on media, the new *Health: The Basics, Tenth Edition* features robust relatable content, bringing health topics to life and keeping you hooked on learning and living well. Now enhanced with an even more comprehensive package of easy-to-use media and supplements, this edition makes teaching and learning personal health extra dynamic. The Tenth Edition includes new ABC News videos, more online worksheets, new course management and eText options, Tweet Your Health, new student "behavior change video log (vlog)" videos, countless new teacher supplements, and more. These resources bring personal health to life in any form—in the classroom, online, or on the iPad. These tools all motivate students to be more interested in the book content and invest in their health.

An exploration of how design might be led by marginalized communities, dismantle structural inequality, and advance collective liberation and ecological survival. What is the relationship between design, power, and social justice? "Design justice" is an approach to design that is led by marginalized communities and that aims explicitly to challenge, rather than reproduce, structural inequalities. It has emerged from a growing community of designers in various fields who work closely with social movements and community-based organizations around the world. This book explores the theory and practice of design justice, demonstrates how universalist design principles and practices erase certain groups of people—specifically, those who are intersectionally

Access Free Society The Basics 12th Edition Study Guide

disadvantaged or multiply burdened under the matrix of domination (white supremacist heteropatriarchy, ableism, capitalism, and settler colonialism)—and invites readers to “build a better world, a world where many worlds fit; linked worlds of collective liberation and ecological sustainability.” Along the way, the book documents a multitude of real-world community-led design practices, each grounded in a particular social movement. Design Justice goes beyond recent calls for design for good, user-centered design, and employment diversity in the technology and design professions; it connects design to larger struggles for collective liberation and ecological survival.

Seeing Sociology in Everyday Life Society: The Basics is designed to help students view their everyday lives through a sociological lens. With a strong theoretical framework and a global perspective, Society offers students an accessible and relevant introduction to sociology. In Society: The Basics, Eleventh Edition, John J. Macionis shares his enthusiasm and teaching experience with a clear and engaging approach. This is just the standalone book.

An essential guide to designing, conducting, and analyzing event-related potential (ERP) experiments, completely updated for this edition. The event-related potential (ERP) technique, in which neural responses to specific events are extracted from the EEG, provides a powerful noninvasive tool for exploring the human brain. This volume describes practical methods for ERP research along with the underlying theoretical rationale. It offers researchers and students an essential guide to designing, conducting, and analyzing ERP experiments. This second edition has been completely updated, with additional material, new chapters, and more accessible explanations. Freely available supplementary material, including several online-only chapters, offer expanded or advanced treatment of selected topics. The first half of the book presents essential background information, describing the origins of ERPs, the nature of ERP components, and the design of ERP experiments. The second half of the book offers a detailed treatment of the main steps involved in conducting ERP experiments, covering such topics as recording the EEG, filtering the EEG and ERP waveforms, and quantifying amplitudes and latencies. Throughout, the emphasis is on rigorous experimental design and relatively simple analyses. New material in the second edition includes entire chapters devoted to components, artifacts, measuring amplitudes and latencies, and statistical analysis; updated coverage of recording technologies; concrete examples of experimental design; and many more figures. Online chapters cover such topics as overlap, localization, writing and reviewing ERP papers, and setting up and running an ERP lab.

Based on O’Neil, Fields, and Share’s market-leading textbook and casebook, Cases and Concepts in Comparative Politics: An Integrated Approach integrates concepts and cases in one volume. Students get all of the materials in a straightforward, easy-to-use, and cost-effective way.
