In 1936 athlete Jesse Owens won four gold medals at the Berlin Olympics and, two years later, boxer Joe Louis won a crushing victory to become heavyweight champion of the world. Despite their fame and success, both men would find themselves barred from certain hotels and would have to eat outside restaurants because of the colour of their skin. However, by their example, they gave hope to millions of black people around the world as they became the first black superstars. In Donald McRae's William Hill prize-winning dual biography, he compiles a brilliant portrait of the two men, who became close friends despite their very different career paths: within days of Olympic glory, Owens was banned from competing again, and was forced to spend his days racing against horses to earn a living before becoming a spokesman for the sporting ideal. Meanwhile Louis won and lost a fortune, eventually battling with drug addiction and mental illness. His vivid account of their lives away from the public eye, and the era in which they lived, is compelling and tragic.

“ A convincing case that careful analysis of the history, issues, individuals, and institutions can lead to better decisions—in business as well as in government ” (BusinessWeek). Two noted professors offer easily remembered rules for using history effectively in day-to-day management of governmental and corporate affairs to avoid costly blunders. “ An illuminating guide to the use and abuse of history in affairs of state ” (Arthur Schlesinger).

You read about it every day: How can we create a sustainable, reliable and affordable energy supply? Does a local water supply play a role in this? Why don ’ t we drive hydrogen cars that are powered by the sun and rain? The availability of cheap green energy is increasing. . We have solar and wind power, and even energy derived from ambient heat. At the same time we have very diverse energy needs: fuel for cars, electricity, heat for buildings, feedstock for industrial processes, to name just a few. Energy supply and demand do not match, which means that we have to match resources, storage and consumption in an intelligent way. Solar Power to the People casts a thoughtful vision on sustainable energy. We have to bring the power of the sun to the people. That is what sustainable energy and water is all about. The authors believe we have to act quickly. The matter is urgent.

On Television exposes the invisible mechanisms of manipulation and censorship that determine what appears on the small screen. Bourdieu shows how the ratings game has transformed journalism - and hence politics - and even such seemingly removed fields as law' science' art' and philosophy. Bourdieu had long been concerned with the role of television in cultural and political life when he bypassed the political and commercial control of the television networks and addressed his country's viewers from the television station of the College de France. On Television' which expands on that lecture' not only describes the limiting and distorting effect of television on journalism and the world of ideas' but offers the blueprint for a counterattack.

Adam Gordon is a brilliant, if highly unreliable, young American poet on a prestigious fellowship in Madrid, struggling to establish his sense of self and his relationship to art. What is actual when our experiences are mediated by language, technology, medication, and the arts? Is poetry an essential art form, or merely a screen for the reader's projections? Instead of following the dictates of his fellowship, Adam's "research" becomes a meditation on the possibility of the genuine in the arts and beyond: are his relationships with the people he meets in Spain as fraudulent as he fears his poems are? A witness to the 2004 Madrid train bombings and their aftermath, does he participate in historic events or merely watch them pass him by? In prose that veers between the comic and tragic, the self-contemptuous and the inspired, Leaving the Atocha Station is a portrait of the artist as a young man in an age of Google searches, pharmaceuticals, and spectacle. Born in Topeka, Kansas, in 1979, Ben Lerner is the author of three books of poetry The Lichtenberg Figures, Angle of Yaw, and Mean Free Path. He has been a finalist for the National Book Award and the Northern California Book Award, a Fulbright Scholar in Spain, and the recipient of a 2010-2011 Howard Foundation Fellowship. In 2011 he became the first American to win the Preis der Stadt Münster für Internationale Poesie. Leaving the Atocha Station is his first novel.

What ’ s a Park Avenue working mom to do when her troubled son desperately needs a male role model and her husband is a power workaholic? If she ’ s like the gutsy heroine of Holly Peterson ’ s astute new comedy of manners among the ill-mannered elite, she does what every other woman on the block does. She hires herself a “ manny. ” A solid middle-class girl from Middle America, Jamie Whitfield isn ’ t “ one of them ” but she lives in “ the Grid, ” the wealthiest acre of real estate in Manhattan, where big money and big media collide. And she has most everything they have—a big new apartment, full-time help with her three children, as well as her very own detached Master of the Universe attorney husband. What she doesn ’ t have, however, is a full-time father figure for their struggling nine-year-old son, Dylan. But the rich haven ’ t yet encountered a problem they can ’ t hire someone else to solve. Enter the manny. At first the idea of paying a man to provide a role model for Dylan sounds too crazy to be true. But one look at Peter Bailey is enough to convince Jamie that the idea may not be quite so insane after all. Peter is calm, cool, competent, and so charmingly down-to-earth, he ’ s irresistible. And with the political sex scandal of the decade propelling her career as a news producer into overdrive, and her increasingly erratic husband locked in his study with suspicious files, Jamie is in serious need of some grounding. Peter reminds her of everything she once was, still misses, and underneath all the high-society glitz, still is. But will the new manny in her life put the ground back beneath her feet, or sweep her off them?

A New York Times Notable Book of the Year. Shortlisted for the 2016 Man Booker Prize, Hot Milk moves "gracefully among pathos, danger, and humor † ? (The New York Times). I have been sleuthing my mother's symptoms for as long as I can remember. If I see myself as an unwilling detective with a desire for justice, is her illness an unsolved crime? If so, who is the villain and who is the victim? Sofia, a young anthropologist, has spent much of her life trying to solve the mystery of her mother's unexplainable illness. She is frustrated with Rose and her constant complaints, but utterly relieved to be called to abandon her own disappointing fledgling adult life. She and her mother travel to the searing, arid coast of southern Spain to see a famous consultant--their very last chance--in the hope that he might cure her unpredictable limb paralysis. But Dr. Gomez has strange methods that seem to have little to do with physical medicine, and as the treatment progresses, Sofia's mother's illness becomes increasingly baffling. Sofia's role as detective--tracking her mother's symptoms in an attempt to find the secret motivation for her pain--deepens as she discovers her own desires in this transient desert community. Hot Milk is a profound exploration of the sting of sexuality, of unspoken female rage, of myth and modernity, the lure of hypochondria and big pharma, and, above all, the value of experimenting with life; of being curious, bewildered, and vitally alive to the world.
