A brilliant book by Nobel Prize winner Eric R. Kandel, *The Age of Insight* takes us to Vienna 1900, where leaders in science, medicine, and art began a revolution that changed forever how we think about the human mind—our conscious and unconscious thoughts and emotions—and how mind and brain relate to art. At the turn of the century, Vienna was the cultural capital of Europe. Artists and scientists met in glittering salons, where they freely exchanged ideas that led to revolutionary breakthroughs in psychology, brain science, literature, and art. Kandel takes us into the world of Vienna to trace, in rich and rewarding detail, the ideas and advances made then, and their enduring influence today. The Vienna School of Medicine led the way with its realization that truth lies hidden beneath the surface. That principle infused Viennese culture and strongly influenced the other pioneers of Vienna 1900. Sigmund Freud shocked the world with his insights into how our everyday unconscious aggressive and erotic desires are repressed and disguised in symbols, dreams, and behavior. Arthur Schnitzler revealed women's unconscious sexuality in his novels through his innovative use of the interior monologue. Gustav Klimt, Oscar Kokoschka, and Egon Schiele created startlingly evocative and honest portraits that expressed unconscious lust, desire, anxiety, and the fear of death. Kandel tells the story of how these pioneers—Freud, Schnitzler, Klimt, Kokoschka, and Schiele—inspired by the Vienna School of Medicine, in turn influenced the founders of the Vienna School of Art History to ask pivotal questions such as What does the viewer bring to a work of art? How does the beholder respond to it? These questions prompted new and ongoing discoveries in psychology and brain biology, leading to revelations about how we see and perceive, how we think and feel, and how we respond to and create works of art. Kandel, one of the leading scientific thinkers of our time, places these five innovators in the context of today's cutting-edge science and gives us a new understanding of the modernist art of Klimt, Kokoschka, and Schiele, as well as the school of thought of Freud and Schnitzler. Reinvigorating the intellectual enquiry that began in Vienna 1900, *The Age of Insight* is a wonderfully written, superbly researched, and beautifully illustrated book that also provides a foundation for future work in neuroscience and the humanities. It is an extraordinary book from an international leader in neuroscience and intellectual history.

New York Times Bestseller An exciting--and encouraging--exploration of creativity from the author of *When: The Scientific Secrets of Perfect Timing* The future belongs to a different kind of person with a different kind of mind: artists, inventors, storytellers-creative and holistic "right-brain" thinkers whose abilities mark the fault line between who gets ahead and who doesn't. Drawing on research from around the world, Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*) outlines the six fundamentally human abilities that are absolute essentials for professional success and personal fulfillment--and reveals how to master them. *A Whole New Mind* takes readers to a daring new place, and a provocative and necessary new way of thinking about a future that's already here.

"The first definitive book on the science of self-awareness, *Insight* is a fascinating journey into everyone's favorite topic: themselves. Do you understand who you really are? Or how others really see you? We all know people with a stunning lack

of self-awareness--but how often do we consider whether we might have the same problem? Research shows that self-awareness is the meta-skill of the 21st century--the foundation for high performance, smart choices, and lasting relationships. Unfortunately, we are remarkably poor judges of ourselves and how we come across, and it's rare to get candid, objective feedback from colleagues, employees, and even friends and family. Integrating hundreds of studies with her own research and work in the Fortune 500 world, organizational psychologist Tasha Eurich shatters conventional assumptions about what it takes to truly know ourselves--like why introspection isn't a bullet train to insight, how experience is the enemy of self-knowledge, and just how far others will go to avoid telling us the truth about ourselves. Through stories of people who've made dramatic gains in self-awareness, she offers surprising secrets, techniques and strategies to help readers do the same - and therefore improve their work performance, career satisfaction, leadership potential, relationships, and more" -- provided by publisher.

It hardly matters that dinosaurs are extinct, they still form an important part of our lives: they sell movies, fill the school syllabus, provide us with essential scientific knowledge and even chase us in our dreams. The Complete Book of Dinosaurs is the ultimate dinosaur reference guide. Comprehensive and compelling, The Complete Book of Dinosaurs provides an innovative approach to these ancient creatures, identifying the 700 species creature-by-creature, detailing their habits and their individual features, making each one easily recognisable. With The Complete Book of Dinosaurs in hand, the reader can distinguish the masterminds from the politicians and tell the athletes from the aggressors, enjoying a book that provokes, surprises and informs.
