Marlan maintains, Western

“dark” experiences as purely  
negative, i.e. as

through,” rather than  
experienced and potentially  
valued on their own terms.

sun – relating to eclipse, transfiguration and alchemy – are explored in this beautifully produced publication conceived by artist Shezad Dawood. 'Black sun' is a term with multiple meanings; it represents the eclipse of the day, but is also a symbol of esoteric or occult significance used in various belief systems. It is linked to the metaphor 'dark night of the soul', which is used to describe a phrase in a person's spiritual life, marked by a sense of loneliness and desolation, and which can be experienced in particular by those who are marginalised by ethnicity, sexuality and

displacement. Accompanying a travelling exhibition at Devi Art Foundation, India, and Arnolfini, UK, this catalogue examines structures that look to deconstruct or displace our everyday modes of seeing. Including works by artists Ayisha Abraham, Tino Sehgal and Wolfgang Tillmans, amongst others, the texts and interviews provide an in-depth exploration of the black sun.

Stanton Marlan brings together writings which span the course of his career, examining Jungian psychology and the alchemical

imagination as an opening to the mysteries of psyche and soul. Several chapters describe a telos that aims at the mysterious goal of the Philosophers' Stone, a move replete with classical and postmodern ideas catalysed by prompts from the unconscious: dreams, images, fantasies, and paradoxical conundrums. Psyche and matter are seen with regards to soul, light and darkness in terms of illumination, and order and chaos as linked in the image of chaosmos. In doing so, this volume challenges any tendency to literalism and essentialism, and contributes to an integration between Jung's classical vision of a psychology of alchemy and Hillman's Alchemical Psychology. C.G. Jung and the Alchemical Imagination will be a valuable resource for academics, scholars, and students of Jungian and post-Jungian studies, Jungian analysis, and psychotherapy. It will also be of great interest to Jungian psychologists and Jungian analysts in practice and in training.

Looks at the psychological nature of depression and discusses its portrayal in literature and art

Every human life is made up of the light and the dark, the happy and the sad, the vital and the deadening. How you think about this rhythm of moods makes all the difference. Our lives are filled with emotional tunnels: the loss of a loved one or end of a relationship, aging and illness, career disappointments or just an ongoing sense of dissatisfaction with life.

Society tends to view these “dark nights” in clinical terms as obstacles to be overcome as quickly as possible. But Moore shows how honoring these periods of fragility as periods of incubation and positive opportunities to delve the soul’s deepest needs can provide healing and a new understanding of life’s meaning. Dark Nights of the Soul presents these metaphoric dark nights not as the enemy, but as times of transition, occasions to restore yourself, and transforming rites of passage, revealing an uplifting and inspiring new outlook on such topics as: •

Kabbalistic Visions explores Jung's 1944 Kabbalistic visions, the impact of Jewish mysticism on Jungian psychology, and Jung's archetypal interpretation of Kabbalistic symbolism. National Socialism. It is the first full-length study of Jung and Jewish mysticism in any language, and the first book to present a comprehensive Jungian/archetypal interpretation of Kabbalistic symbolism. In addition to advancing our understanding of Jung and his work, Kabbalistic Visions provides the foundation for a modern psychological interpretation of the Kabbalah. In the process, Kabbalistic Visions raises some disturbing questions about the place of the irrational, the shadow, and the unconscious in both psychology and mysticism.
