The Circulation of Agency in E-Justice: Interoperability ...

How can the circulation of judicial agency across Europe be facilitated? Based on extensive research, the book explores and assesses the complex entanglements between law and technology, and between national and European jurisdictions that emerge when developing even relatively simple e-services such as those supporting the European small claims procedure and European payment orders.

A newspaper's circulation is the number of copies it distributes on an average day. Circulation is one of the principal factors used to set advertising rates. Circulation is not always the same as copies sold, often called paid circulation, since some newspapers are distributed without cost to the reader. Readership figures are usually higher than circulation figures because of the assumption ...

This book contributes to an understanding of the dynamic complexities involved in the design of e-justice applications that enable online trans-border judicial proceedings in Europe. It provides answers to critical questions with practical relevance: How should online trans-border judicial proceedings be designed in

order to deliver effective and timely justice to European citizens, businesses and public agencies? How can the circulation of judicial agency across Europe be facilitated? Based on extensive research, the book explores and assesses the complex entanglements between law and technology, and between national and European jurisdictions that emerge when developing even relatively simple e-services such as those supporting the European small claims procedure and European payment orders. In addition to providing a strong theoretical framework and an innovative approach to e-justice design, this book includes case studies that are based on a common methodology and theoretical framework. It presents original empirical material on the development of e-government systems in the area of European justice. Finally, it introduces the design strategies of Maximum Feasible Simplicity and Maximum Manageable Complexity and, based on them, it proposes architectural and procedural solutions to enhance the circulation of judicial agency.?

Ever since the Gilgamesh epic and Homer's Odyssey, stories of travel and adventure, whether 'fictional', 'factual', or a mix of both, have been crucial to the collective self-definition of human societies. Since the early modern period and the increased frequency of cross-cultural encounters, the literary motif of the journey became a significant ingredient of colonial imagination. The ideology of adventure, crucial to many works of literature, pervades Western discourses of economic expansion and scientific discovery, while anthropologists, seeking to document indigenous story traditions, encountered an oral archive not unlike that of their own. Travelistic texts (by 'culture heroes', explorers, colonial agents, missionaries, scientific explorers, refugees, and foreign visitors) often provide the semantic repertoire for descriptions of 'exotic' spaces and populations. The knowledge gained through physical encounters during journeys to foreign lands often functions to revise inherited ideas about 'cultures' - those of others as well as one's own. The topics 'travel' and 'travel writing' therefore invite us to address questions of reliability and verifiability. This volume brings together experts from diverse disciplines and places around the globe whose work is concerned with the phenomenon and discourse of travel, transculturation, and the cross-cultural production of knowledge. The contributions reflect the recent shift in travel scholarship toward including the study of ideological conflicts within Europe's 'imperial gaze', as well as attempts at tracing the perspective of Europe's 'others', which frequently challenged colonial certainties and claims to intellectual supremacy.

The first comprehensive guide to women's promotion and use of textual culture, in manuscript and print, in Renaissance Italy.

It was widely believed that women in Renaissance and early modern England either did not write, or did not publish their work. It has become clear that instead of using the emerging technology of print, many women writers circulated their works by hand, with friends copying and recopying poems, plays and novels from each other or with the help of professional scribes. Through manuscript publication, women's writing reached wide audiences and was collected and admired by both men and women. Women's Writing and the Circulation of Ideas contributes to the discovery and re-evaluation of women writers by examining the writing and manuscript publication of key authors from 1550 to 1800. The collection's analysis of the range and meaning of women's writing and manuscript publication during the rise of the print industry alters our understanding of the history of the book and early modern British literature alike.

Together with a list of auxiliary and cooperating societies, their officers, and other data.

This book reconstructs the early circulation of penicillin in Spain, a country exhausted by civil war (1936-1939), and oppressed by Franco's dictatorship. Embedded in the post-war recovery, penicillin's voyages through time and across geographies - professional, political and social - were both material and symbolic. This powerful antimicrobial captivated the imagination of the general public, medical practice, science and industry, creating high expectations among patients, who at times experienced little or no effect. Penicillin's lack of efficacy against some microbes fueled the search for new wonder drugs and sustained a decades-long research agenda built on the post-war concept of development through scientific and technological achievements. This historical reconstruction of the social life of penicillin between the 1940s and 1980s - through the dictatorship to democratic transition - explores political, public, medical, experimental and gender issues, and the rise of antibiotic resistance.
