Discussion of Cold Damage (Shang Han Lun) Commentaries and Clinical Applications. A major new translation of the Chinese classic Shang Han Lun by scholar and medical doctor Guohui Liu makes this foundational text fully accessible to English speaking clinicians for the first time. Extensive study and research underpins the translation; the author's understanding of both classical and modern Chinese enables him to interpret fully the ancient work within the theory of Chinese medicine.

The Shang Han Lun is widely regarded as one of the most important book in Chinese medicine, yet it is also considered the most difficult to master. This title presents case studies organized around the use of nearly 50 classical formulas, followed by other case studies from the author's extensive clinical experience.

A major new translation of the Chinese classic Shang Han Lun by scholar and medical doctor Guohui Liu makes this foundational text fully accessible to English speaking clinicians for the first time. Extensive study and research underpins the translation; the author's understanding of both classical and modern Chinese enables him to interpret fully the ancient work within the theory of Chinese medicine. An extensive commentary explains the translation, the difficulties with the text, how it has been subsequently translated and expands on the theory laid out in the original text to reach an understanding that can be applied in the clinic for diagnosis and treatment. The value of this classic text lies primarily in its establishment of a basic framework for differentiation and treatment, but it also presents 112 formulas and 88 medicinal substances, which are commonly applied in clinical work for various conditions. In this edition, the 112 formulas are fully explained in the context of the clinical experiences of well-known ancient and modern doctors, and they are also laid out in two appendices, cross referenced to the text.

Internationally renowned Dr. Huang has written over ten herbal textbooks compiling his personal views and clinical experience of indispensable and useful formulas of Chinese medicine. This book compares and analyzes the relative terms from the Discussion on Cold Damage (Shang Han Lun) and the Essential Prescriptions of the Golden Cabinet, (Jin Gui Yao Lue) in combination with the clinical experiences of Dr. Huang. It discusses the clinical applications and indications for 50 medicinals that were frequently used by ancient doctor Zhang Zhong-jing.

Discussion of Cold Damage (Shang Han Lun) and contemporary texts of ancient China form the bedrock of modern Chinese medicine practice, yet these classic texts contain many concepts that are either hard to understand or confusing. Based on over thirty years' medical

practice, and study of the texts, this book explains the concepts involved so that the clinical applications of the ancient texts can be better understood and put into practice. The author looks at the larger context of ancient Chinese culture and philosophy in terms of theoretical knowledge, scholarly approach, and mindset in order to explain the basis for the medical texts. He also discusses the work of later Chinese medical scholars in elucidating the texts. He then goes on to look at more specific issues, such as the six conformations, zang-fu organ theory, the theory of qi and blood, the theory of qi transformation, and how these are understood in the ancient texts. He also discusses shao yang and tai yang theory; the element of time, and its place in understanding six conformations diseases. This remarkable work of scholarship will clarify many questions about the interpretation of the ancient texts for modern use, and will find a place on the bookshelf of every practitioner of Chinese medicine, as well as on those of scholars of Chinese medicine.

Shang Han Lun was written in approx 200 AD and remains a seminal text in Chinese medicine literature and is mandatory study in all accredited courses of Chinese medicine today. It analyses the aetiology and pathogenesis of acute upper respiratory tract infections (the common cold, influenza, bronchitis, asthma) and describes the many permutations as well as subsequent complications. It is not just a study of coughs and colds but lays the groundwork for Chinese medical theory and its strategies of treatment. It also explains the consequences of incorrect treatment and discusses how the omission or addition of even one herb to a formula can affect its efficacy. This is the book that makes understanding a complex classic text easy. Greta Young benefits the reader with her years of expertise in studying and lecturing in the classics and guides us through the myriad clauses elucidating their meaning, citing points of discussion from various sources and illustrating their application with modifications and case studies. Robin Marchment has translated each clause in a way which is faithful to the original Chinese whilst still making the meaning accessible to the English-speaker. The explanations and discussions use clear English in a free-flowing lecturing style which holds the reader's interest. Each chapter or section is introduced with an overview, key points are highlighted and summarised at the end and, in addition, both Ancient Applications and Modern Applications are described. The objective is to make it interesting, readable and of practical clinical significance to today's practitioners.

Miraculous Cures is a clinically-oriented case book based on patients treated by top ancient and contemporary masters. It will offer insights into the formulas that are the basis of Chinese Herbal Medicine, accompanied by Dr. Shima's expert commentary. For those dedicated to the study of the Shang Han Lun, it will provide that essential connection between theoretical understanding and clinical application.

The history of Chinese medicine hinges on three major turning points: the formation of canonical theory in the Han dynasty; the transformation of medicine via the integration of earlier medical theories and practices in the Song dynasty; and the impact of Western medicine from the nineteenth century onwards. This book offers a comprehensive overview of the crucial second stage in the evolution of Chinese medicine by examining the changes in Chinese medicine during the pivotal era of the Song dynasty. Scholars often characterize the Song era as a time of change in every aspect of political, social, intellectual or economic life. More specifically it focuses on three narratives of change: the emperor's interest in medicine elevated the status of medicine in the eyes of the elite, leading to an increased involvement of

intellectuals and the literary elite in medicine government officials systematically revised, printed, and promulgated earlier heterogeneous medical manuscripts belonging to various traditions the government established unique imperially sponsored medical institutions to handle public health and other aspects of medicine. As the first book to study the transformation medicine underwent during the Song period this volume will appeal to Sinologists and scholars of the history of medicine alike.

The Shang Han Lun (On Cold Damage) is among the oldest surviving, the most copiously annotated and the most revered of Chinas traditional medical texts. Of all of Chinas early medical classics, the Shang Han Lun is undoubtedly the one with the greatest relevance to the modern practice of Chinese medicine, and the one most deserving of Western attention. It was the first book to attempt to incorporate medicinal therapy into the medicine of systematic correspondences and channels and network vessels. Far ahead of its time in both theory and practice, it is not surprising that the prescriptions it contains comprise an important part of todays medicinal formulary.

I. Identification of heart failure and its phenotypes.
