## High Precision Altimeters

Make your entire meal – start-to-finish – on the grill. With these easy-to-make, time-saving summer recipes, you can whip up delicious side dishes alongside your meat, so you can grill and ...

Some climate change is now inevitable and strategies to adapt to these changes are quickly developing. The question is particularly paramount for low-income countries, which are likely to be most affected. This timely and unique book takes an integrated look at the twin challenges of climate change and development. The book treats adaptation to climate change as an issue of climate-resilient development, rather than as a bespoke set of activities (flood defences, drought plans, and so on), combining climate and development challenges into a single strategy. It asks how the standard approaches to development need to change, and what socio-economic trends and urbanisation mean for the vulnerability of developing countries to climate risks. Combining conceptual thinking with practical policy prescriptions and experience the contributors argue that, to address these questions, climate risk has to be embedded fully into wider development strategies

NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and full text are provided if available.

This fascinating volume brings together leading specialists, who have analyzed the thoughts and records documenting the worldviews of a wide range of pre-modern societies. Presents evidence from across the ages; from antiquity through to the Age of Discovery Provides cross-cultural comparison of ancient societies around the globe, from the Chinese to the Incas and Aztecs, from the Greeks and Romans to the peoples of ancient India Explores newly discovered medieval Islamic materials

NEW YORK TIMES BESTSELLER • In this provocative, startling book, Robert D. Kaplan, the bestselling author of *Monsoon and Balkan Ghosts*, offers a revelatory new prism through which to view global upheavals and to understand what lies ahead for continents and countries around the world. Bestselling author Robert D. Kaplan builds on the insights, discoveries, and theories of great geographers and geopolitical thinkers of the recent and distant past to look back at critical pivots in history and then to look forward at the evolving global scene. Kaplan traces the history of the world's hot spots by examining their climates, topographies, and proximities to other embattled lands. He then applies the lessons learned to the present crises in Europe, Russia, China, the Indian Subcontinent, Turkey, Iran, and the Arab Middle East. The result is a holistic interpretation of the next cycle of conflict throughout Eurasia, a visionary glimpse into a future that can be understood only in the context of temperature, land allotment, and other physical certainties. A brilliant rebuttal to thinkers who suggest that globalism will trump geography, this indispensable work shows how timeless truths and natural facts can help prevent this century's looming cataclysms. Praise for *The Revenge of Geography* "[An] ambitious and challenging new book . . . [The *Revenge of Geography*] displays a formidable grasp of contemporary world politics and serves as a powerful reminder that it has been the planet's geophysical configurations, as much as the flow of competing religions and ideologies, that have shaped human conflicts, past and present."—Malise Ruthven, *The New York Review of Books* "Robert D. Kaplan, the world-traveling reporter and intellectual whose fourteen books constitute a bedrock of penetrating exposition and analysis on the post-Cold War world . . . strips away much of the cant that suffuses public discourse these days on global developments and gets to a fundamental reality: that geography remains today, as it has been throughout history, one of the most powerful drivers of world events."—*The National Interest* "Kaplan plunges into a planetary review that is often thrilling in its sheer scale . . . encyclopedic."—*The New Yorker* "[The *Revenge of Geography*] serves the facts straight up. . . . Kaplan's realism and willingness to face hard facts make *The Revenge of Geography* a valuable antidote to the feel-good manifestoes that often masquerade as strategic thought."—*The Daily Beast*

This volume focuses on the interconnected formations of patrimonialism, colonialism/empire and capitalism. The articles show that patrimonial practices, which often form the backbone of empire,

are present throughout history, including in global capitalist modernity.

Environmental Change explores the nature, causes, rates and directions of environmental change throughout earth history. Huggett introduces the interdependent parts of the natural environment - cosmic, ecological, geological - and the dynamic nature of the environmental system. Integrating a wealth of examples and illustrations from around the world, the book examines evidence and causes of change in life, climate (air and water), soils, sediments and landforms, and the impacts of human-environment interaction.
