The Karma of Brown Folk is arguably a bold foray in dismantling the stereotypes about the Indian subcontinent and South Asians in general. The aura of an inherent Eastern spirituality, the unexplored flexibility of accommodation to the ideals of white supremacy, is replaced with an argument for the start correlations between Western racism and the Indian caste system, and between Civil Rights activism and anti-colonial resistance.

Brown or brown people is a racial and ethnic term. Like black people and white people, it is a term for race based solely on human skin color.. Although according to racialist ideas, the "Brown Man's Land is the Near and Middle East.The brown world stretches in an immense belt clear across southern Asia and northern Africa, from the Pacific to the Atlantic Oceans".

"How does it feel to be a problem?" asked W. E. B. Du Bois of black Americans in his classic The Souls of Black Folk. A hundred years later, Vijay Prashad asks South Asians "How does it feel to be a solution?" In this kaleidoscopic critique, Prashad looks into the complexities faced by the members of a "model minority"—one, he claims, that is consistently deployed as “a weapon in the war against black America.” On a vast canvas, The Karma of Brown Folk attacks the two pillars of the “model minority” image, that South Asians are both inherently successful and pliant, and analyzes the ways in which U.S. immigration policy and American Orientalism have perpetuated these stereotypes. Prashad uses irony, humor, razor-sharp criticism, personal reflections, and historical research to challenge the arguments made by Dinesh D’Souza, who heralds South Asian success in the U.S., and to question the quiet accommodation to racism made by many South Asians. A look at Deepak Chopra and others whom Prashad terms “Godmen” shows us how some South Asians exploit the stereotype of inherent spirituality, much to the chagrin of other South Asians. Following the long engagement of American culture with South Asia, Prashad traces India’s effect on thinkers like Cotton Mather and Henry David Thoreau, Ravi Shankar’s influence on John Coltrane, and such essential issues as race versus caste and the connection between antiracism activism and anticolonial resistance. The Karma of Brown Folk locates the birth of the “model minority” myth, placing it firmly in the context of reaction to the struggle for Black Liberation. Prashad reclaims the long history of black and South Asian solidarity, discussing joint struggles in the U.S., the Caribbean, South Africa, and elsewhere, and exposes how these powerful moments of alliance faded from historical memory and were replaced by Indian support for antiblack racism. Ultimately, Prashad writes not just about South Asians in America but about America itself, in the tradition of Tocqueville, Du Bois, Richard Wright, and others. He explores the place of collective struggle and multiracial alliances in the transformation of self and community—in short, how Americans define themselves. AWARDS Village Voice Favorite Books of 2000

Discusses the South Asian community in America including the history of political activism, an analysis of the shifting ideas of culture, and examines the wave of violence the community experienced right after September 11.

Selected as One of the Village Voice’s Favorite 25 Books of 2001 In this landmark work, historian Vijay Prashad refuses to engage the typical racial discussion that matches people of color against each other while institutionalizing the primacy of the white majority. Instead he examines more than five centuries of remarkable historical evidence of cultural and political interaction between Blacks and Asians around the world, in which they have exchanged cultural and religious symbols, appropriated personas and lifestyles, and worked together to achieve political change.

The world watched as the bud of the Arab Spring was buried under the cold darkness of the Libyan Winter.

Defining and changing perceptions of ethnic identity.

An analysis of three major economic institutions and how they discipline surplus labor of America’s poor.

For immigrants to America, from Europeans in the early twentieth century through later Latinos, Asians, and Caribbeans, gaining social and political ground has generally been considered an exercise in ethnic and racial solidarity. The experience of South Asian Americans, one of the fastest-growing immigrant populations in recent years, tells a different story of inclusion—one in which distinctions within a group play a significant role. Focusing on Indian, Pakistani, and Bangladeshi American communities, Sangay K. Mishra analyzes features such as class, religion, nation of origin, language, caste, gender, and sexuality in mobilization. He shows how these internal characteristics lead to multiple paths of political inclusion, defying a unified group experience. How, for instance, has religion shaped the fractured political response to intensified discrimination against South Asians—Hindus, Muslims, and Sikhs—in the post-9/11 period? How have class and home country concerns played into various strategies for achieving political power? And how do the political engagements of professional and entrepreneurial segments of the community challenge the idea of a unified diaspora? Pursuing answers, Mishra argues that, while ethnoracial mobilization remains an important component of South Asian American experience, ethnoracial identity is deployed differently by particular sectors of the South Asian population to produce very specific kinds of mobilizing and organizational infrastructures. And exploring these distinctions is critical to understanding the changing nature of the politics of immigrant inclusion—and difference itself—in America.

This book grows out of the question, “What is South Asian American writing and what insights can it offer us about living in the world at this particular moment of tense geopolitics and inter-linked economies?” South Asian American literature, with its focus on the multiple geographies and histories of the global dispersal of South Asians, pulls back from a close-up view of the United States to reveal a wider landscape of many nations and peoples. Drawing on the cosmopolitan sensibility of scholars like Anthony Appiah, Vinay Dharwadker, Martha Nussbaum, Bruce Robbins, and Amartya Sen, this book argues that to read the body of South Asian American literature justly, one must engage with the urgencies of places as diverse as Bangladesh, Sri Lanka, India, Burma, Pakistan, and Trinidad. Poets, novelists, and playwrights like Indran Amirthanayagam, Meena Alexander, Amitav Ghosh, Michael Ondaatje, Shani Mootoo, Amitava Kumar, Tahira Naqvi, and Sharbari Ahmed exhort North American residents to envision connectedness with inhabitants of other lands. These writers’ significant contribution to American literature and to the American imagination is to depict the nation as simultaneously discrete and entwined within the fold of other nations. The world out there arrives next door.
