THE TRAFALGAR ROLL—The Nelson Society

Twenty-seven British ships of the line led by Admiral Lord Nelson aboard HMS Victory defeated thirty-three French and Spanish ships of the line under French Admiral Pierre-Charles Villeneuve off the south-west coast of Spain, just west of Cape Trafalgar. The Franco-Spanish fleet lost twenty-two ships, without a single British vessel being lost.

A reprint of a long out of print title from 1913. An interesting addition to any library of English naval history. Annotation copyrighted by Book News, Inc., Portland, OR

Presents a list of British seamen who fought in various Royal Navy ships under the command of Admiral Lord Nelson at the Battle of Trafalgar on October 21, 1805. The site is sponsored by Manchester Computing at the University of Manchester in England. Lists the 1640 officers and men in alphabetical order. Includes lists of those killed or wounded during the battle. Describes several other historic naval battles, and notes the ships involved in each encounter. Gives the address for the Auckland, New Zealand-based Genealogical Computing Group.

The Trafalgar Roll, originally published in 1913, was intended to record and honor the men who fought at Trafalgar in the same way that earlier publications had done for the soldiers at Blenheim and Waterloo. Over 1250 officers - from Nelson himself to midshipmen, surgeons, clerks, boatswains and carpenters - are listed, with the careers of the majority being chronicled in detail. In addition a brief service history of each ship, down to the little schooner Pickle, is included. A remarkable labor of research at the time it is now an invaluable reference work for anyone with a serious interest in Nelson's navy. A new introduction by the distinguished naval historian Colin White explains the significance of the work and places it in context for the modern historian and enthusiast.

Napoleon s naval plan for 1805 was for the French fleet of the Mediterranean and part of the Spanish fleet to break the British blockade and meet in the Caribbean. They would then return, assist the fleet in Brest to get out of the blockade, and together - about 50 ships of the line - would guarantee a safe passage for the French invasion fleet to Britain. Before the battle, French Admiral Villeneuve himself had expressed his conviction that Nelson would use some kind of unorthodox attack, speculating that he was going to go straight against his line. Imagining something different for the British maneuver is difficult, considering the fame obtained by Nelson. Therefore, we will try to test whether it would have been possible for Villeneuve, together with Gravina, to reverse the historic result, making it more worthy to include his name in the Arc de Triomphe.

A 200th anniversary account of the battle that prevented Napoleon's invasion of Britain presents detailed information on its events and historical impact, describing the command and death of Horatio Nelson, the contributions of women and child crew members, and the events that led to Waterloo. By the author of The Keys of Egypt. 35,000 first printing.
