The Wide Lens: A New Strategy for Innovation—Ron Adner---

The Wide Lens by Ron Adner is a must read to gain insight into why that might be the case. In his thought provoking book, Adner explains how most innovation initiatives focus solely on managing the "execution" risk i.e. ensuring that a valid customer need exists, vetting the idea, and ensuring appropriate leadership and implementation.

The Wide Lens: A New Strategy for Innovation by Ron Adner

Without getting into the Geopolitical side of the discussion, after reading Mr. Adner's book, The Wide Lens, A New Strategy for Innovation it became crystal clear to me why they are not only failing, but why they will continue to struggle until an ecosystem leader emerges and embraces the full understanding and nature of what ecosystems require in order to be successful.

If you are looking for an ultra-wide angle lens, the XF 8-16mm f/2.8 R LM WR is a real monster. Weighing 805 grams and costing \$2K, it is obviously a very niche lens that is desired by many landscape and architecture photographers. Once again, Fuji put everything it got into this lens, including all the fancy coatings and weather sealing.

Best Fuji X Lenses of 2020—Photography Life

Argues that most business projects fail because their success depends on unanticipated external innovations while revealing the logic of "innovation ecosystems" that can be established to dramatically improve odds of success.

How can great companies do everything right - identify real customer needs, deliver excellent innovations, beat their competitors to market - and still fail? The sad truth is that many companies fail because they focus too intensely on their own innovations, and then neglect the innovation ecosystems on which their success depends. In our increasingly interdependent world, winning requires more than just delivering on your own promises. It means ensuring that a host of partners -some visible, some hidden- deliver on their promises, too. In The Wide Lens, innovation expert Ron Adner draws on over a decade of research and field testing to take you on far ranging journeys from Kenya to California, from transport to telecommunications, to reveal the hidden structure of success in a world of interdependence. A riveting study that offers a new perspective on triumphs like Amazon's e-book strategy and Apple's path to market dominance; monumental failures like Michelin with run-flat tires and Pfizer with inhalable insulin; and still unresolved issues like electric cars and electronic health records, The Wide Lens offers a powerful new set of frameworks and tools that will multiply your odds of innovation success. The Wide Lens will change the way you see, the way you think - and the way you win.

How can great companies do everything right—identify real customer needs, deliver excellent innovations, beat their competitors to market—and still fail? The truth is that many companies fail because they focus too intensely on their own innovations, while neglecting the ecosystems on which their success depends. In our increasingly interdependent world, winning requires more than just delivering on your own promises. It means ensuring that a host of partners—some visible, some hidden—deliver on their promises, too. The Wide Lens offers a powerful new set of frameworks and tools that will multiply your odds of innovation success.

How to succeed in an era of ecosystem-based disruption: strategies and tools for offense, defense, timing, and leadership in a changing competitive landscape. The basis of competition is changing. Are you prepared? Rivalry is shifting from well-defined industries to broader ecosystems: automobiles to mobility platforms; banking to fintech; television broadcasting to video streaming. Your competitors are coming from new directions and pursuing different goals from those of your familiar rivals. In this world, succeeding with the old rules can mean losing the new game. Winning the Right Game introduces the concepts, tools, and frameworks necessary to confront the threat of ecosystem disruption and to develop the strategies that will let your organization play ecosystem offense. To succeed in this world, you need to change your perspective on competition, growth, and leadership. In this book, strategy expert Ron Adner offers a new way of thinking, illustrating breakthrough ideas with compelling cases. How did a strategy of ecosystem defense save Wayfair and Spotify from being crushed by giants Amazon and Apple? How did Oprah Winfrey redraw industry boundaries to transition from television host to multimedia mogul? How did a shift to an alignment mindset enable Microsoft's cloud-based revival? Each was rooted in a new approach to competitors, partners, and timing that you can apply to your own organization. For today's leaders the difference between success and failure is no longer simply winning, but rather being sure that you are winning the right game.

One of the most significant developments in contemporary education is the view that knowing and understanding are anchored in cultural practices within communities. This shift coincides with technological advancements that have reoriented end-user computer interaction from individual work to communication, participation and collaboration. However, while daily interactions are increasingly engulfed in mobile and networked Information and Communication Technologies (ICT), in-school learning interactions are, in comparison, technologically impoverished, creating the phenomenon known as the school-society digital disconnect. This volume argues that the theoretical and practical tools of scientists in both the social and educational sciences must be brought together in order to examine what types of interaction, knowledge construction, social organization and power structures: (a) occur spontaneously in technology-enhanced learning (TEL) communities or (b) can be created by design of TEL. This volume seeks to equip scholars and researchers within the fields of education, educational psychology, science communication, social welfare, information sciences, and instructional design, as well as practitioners and policy-makers, with empirical and theoretical insights, and evidence-based support for decisions providing learners and citizens with 21st century skills and knowledge, and supporting well-being in today's information-based networked society.

In the fourth century, clerics began to distinguish themselves from members of the laity by virtue of their augmented claims to holiness. Because clerical celibacy was key to this distinction, religious authorities of all stripes—patristic authors, popes, theologians, canonists, monastic founders, and commentators—became progressively sensitive to sexual scandals that involved the clergy and developed sophisticated tactics for concealing or dispelling embarrassing lapses. According to Dyan Elliott, the fear of scandal dictated certain lines of action and inaction, the consequences of which are painfully apparent today. In The Corrupter of Boys, she demonstrates how, in conjunction with the requirement of clerical celibacy, scandal-averse policies at every conceivable level of the ecclesiastical hierarchy have enabled the widespread sexual abuse of boys and male adolescents within the Church. Elliott examines more than a millennium's worth of doctrine and practice to uncover the origins of a culture of secrecy and concealment of sin. She charts the continuities and changes, from late antiquity into the high Middle Ages, in the use of boys as sexual objects before focusing on four specific milieus in which boys and adolescents would have been especially at risk in the high and later Middle Ages: the monastery, the choir, the schools, and the episcopal court. The Corrupter of Boys is a work of stunning breadth and disconcerting resonance, as Elliott concludes that the same clerical prerogatives and privileges that were formulated in late antiquity and the medieval era—and the same strategies to cover up the abuses they enable—remain very much in place.

Written over a period of time, in between her busy schedule as a senior Science teacher of a leading Educational Institute of central India, the title 'World Through My Lens', is a collection of short write-ups by Sandhya Deshpande who is an all-rounder with a unique observational skill and a lot of wits. Her creative impulses have tackled multifarious single-handed experiences from a vast career of twenty-five years in the field of education. This book will take readers down the memory lane of their school days, it will also help them cherish the best days of their life. The author's observations are wide-ranging from nature to natural, manual to the digital, classrooms to the haunting backstage, from picnic to panic, from a need to greed, the imposition of unusual expectations to real-life conditions, from an under-confident student to a successful adult, etc. The write-ups can be a guide for parents and teachers to understand minute details and the hidden beauty of this profession. The written language is simple and will help readers relate easily. As said by Rabindranath Tagore Ji, 'It's simple to be happy, but difficult to be simple'.

This book honors the memory of Brian Hesse, a scholar of Near Eastern archaeology, a writer of alliterative and punned publication titles, and an accomplished amateur photographer. Hesse specialized in zooarchaeology, but he influenced a wider range of excavators and ancient historians with his broad interpretive reach. He spent much of his career analyzing faunal materials from different countries in the Middle East-including Iran, Yemen, and Israel, and his publications covered themes particular to animal bone studies, such as domestication, ancient market economics, as well as broader themes such as determining ethnicity in archaeology. The essays in this volume reflect the breadth of his interests. Most chapters share an Old World geographic setting, focusing either on Europe or the Middle East. The topics are diverse, with the majority discussing animal bones, as was Hesse's specialization, but some take a nonfaunal perspective related to the problems with which Hesse grappled. The volume is also broad in temporal scope, ranging from Neolithic Iran to early Medieval England, and it addresses theoretical matters as well as methodological innovations including taphonomy and the history of computers in zooarchaeology. Several of the essays are direct revisits to, inspirations from, or extensions of Hesse's own research. All the contributions reflect his intense interest in social questions about antiquity; the theme of social archaeology informed much of Brian Hesse's thinking, and it is why his work made such an impact on those working outside his own disciplinary research.

A Coherent Pauline Theology of Gender Respected New Testament scholar Cynthia Long Westfall offers a coherent Pauline theology of gender, which includes fresh perspectives on the most controverted texts. Westfall interprets passages on women and men together and places those passages in the context of the Pauline corpus as a whole. She offers viable alternatives for some notorious interpretive problems in certain Pauline passages, reframing gender issues in a way that stimulates thinking, promotes discussion, and moves the conversation forward. As Westfall explores the significance of Paul's teaching on both genders, she seeks to support and equip males and females to serve in their area of gifting.

This book investigates female Muslims pilgrimage practices and how these relate to women's mobility, social relations, identities, and the power structures that shape women's lives. Bringing together scholars from different disciplines and regional expertise, it offers in-depth investigation of the gendered dimensions of Muslim pilgrimage and the life-worlds of female pilgrims. With a variety of case studies, the contributors explore the experiences of female pilgrims to Mecca and other pilgrimage sites, and how these are embedded in historical and current contexts of globalisation and transnational mobility. This volume will be relevant to a broad audience of researchers across pilgrimage, gender, religious, and Islamic studies.
