CMH Publication 70-30. Edited by Frank N. Schubert and TheresaL. Kraus. Discusses the United States Army's role in the Persian Gulf War from August 1990 to February 1991. Shows the various strands that came together to produce the army of the 1990s and how that army in turn performed under fire and in the glare of world attention. Retains a sense of immediacy in its approach. Contains maps which were carefully researched and compiled as original documents in their own right. Includes an index.

The present publication aims to make public a stele, carved with both a relief of the Storm-God and a Luwian inscription, that was discovered in the Euphrates river in 1999 between the modern village of Qubbah and the archaeological site of Tell Ahmar in northern Syria.

Following modern highways that parallel much of the Lewis and Clark Trail, suggests a two-week itinerary for the trek that took the original explorers almost two years. Includes history, sites, sidetrips, lodging, camping, and restaurants. Illustrated with bandw photos, a few maps (travellers will want more detailed ones), and eight pages of color photos. No index.
