Turmoil and Triumph isn't just a memoir—though it is that, too—it's a thrilling retrospective on the eight tumultuous years that Schultz worked as secretary of state under President Ronald Reagan. Under Schultz's strong leadership, America braved a nuclear arms race with the Soviet Union, increasingly damaging waves of terrorism abroad, scandals such as the Iran-Contra crisis, and eventually the end of the decades-long Cold War. With the strong convictions and startling candor for which Schultz is known, this personal account takes readers into the heart of the Reagan administration, revealing the behind-the-scenes talks and churning tensions that informed a transitional decade that many Americans now look back on as one of the country's most exalted.

The United States, the People's Republic of China, and Taiwan have danced on the knife's edge of war for more than seventy years. A work of sweeping historical vision, *A World of Turmoil* offers case studies of five critical moments: the end of World War II and the start of the Long Cold War; the almost-nuclear war over the Quemoy Islands in 1954-1955; the détente, deceptions, and denials surrounding the 1972 Shanghai Communiqué; the Taiwan Strait Crisis of 1995-1996; and the rise of postcolonial nationalism in contemporary Taiwan. Diagnosing the communication dispositions that structured these events reveals that leaders in all three nations have fallen back on crippling stereotypes and self-serving denials in their diplomacy. The first communication-based study of its kind, this book merges history, rhetorical criticism, and advocacy in a tour de force of international scholarship. By mapping the history of miscommunication between the United States, China, and Taiwan, this provocative study shows where and how our entwined relationships have gone wrong, clearing the way for renewed dialogue, enhanced trust, and new understandings.

The main theme is how local economic cultures and economic networks in the South and in Eastern Europe are put under strain by global deregulation and how traditional and not so traditional but locally rooted structures of economic life adjust to deregulation or fail to do so. All the contributions, written by different authors, combine a 'flexible specialization in clusters' approach with original empirical data. An Introduction and a concluding chapter by the editors brings out the common issues and conclusions.
