Unholy Ghost is a collection of 23 essays by persons who are writers by trade and depressives (or family members of depressives) by fate. In the manner of (and containing an excerpt from) Styron's classic memoir *Darkness Visible*, the book comprises pieces that are unrelated, but not disjointed, as each offers a unique perspective on what the inner life of depression truly is.

### **Unholy Ghost: Writers on Depression**

Unholy Ghost is a ready antidote to such diminutions—a collection of 22 astute and beautifully written essays on depression by writers whose lives carry the imprint of that illness. Editor Nell Casey's choices highlight the variegated textures of depressive symptoms and the reflections to which they have given rise.

Novelist William Styron, who was nearly killed by the disease, wrote *Darkness Visible*, a stunning account of lapse into depression's cold, gray tunnel, which is excerpted in the book. Styron vividly rejects the word "depression" as a lame, impotent, and, at best, clinical approximation of what the disease does and is.

### **Unholy Ghost: Writers on Depression | Psychiatric Services**

As a man who has been depressed all my life, whether I knew it or not, *Unholy Ghosts* expresses so much of what I have felt all these years. It helps me realize that I am not the only one and that there are some who can put depression into words. I recommend it for anyone living with their own depression or living with someone who is depressed.

Unholy Ghost is a unique collection of essays about depression that, in the spirit of William Styron's *Darkness Visible*, finds vivid expression for an elusive illness suffered by more than one in five Americans today. Unlike any other memoir of depression, however, Unholy Ghost includes many voices and depicts the most complete portrait of the illness. Lauren Slater eloquently describes her own perilous experience as a pregnant woman on antidepressant medication. Susanna Kaysen, writing for the first time about depression since *Girl, Interrupted*, criticizes herself and others for making too much of the illness. Larry McMurtry recounts the despair that descended after his quadruple bypass surgery. Meri Danquah describes the challenges of racism and depression. Ann Beattie sees melancholy as a consequence of her writing life. And Donald Hall lovingly remembers the "moody seesaw" of his relationship with his wife, Jane Kenyon. The collection also includes an illuminating series of companion pieces. Russell Banks's and Chase Twichell's essays represent husband-and-wife perspectives on depression; Rose Styron's contribution about her husband's struggle with melancholy is paired with an excerpt from William Styron's *Darkness Visible*; and the book's editor, Nell Casey, juxtaposes her own essay about seeing her sister through her depression with Maud Casey's account of this experience. These companion pieces portray the complicated bond -- a constant grasp for mutual understanding forged by depressives and their family members. With an introduction by Kay Redfield Jamison,

The personal diaries of the noted playwright, screenwriter, and actor offers insight into his evolution as an artist, his conflicted celebrity, and the struggles with depression that culminated in his 2004 suicide.

Depression is a mood disorder that affects one in ten Americans in any given year. At one time too stigmatized to be mentioned in polite conversation, depression is now discussed frankly in the media, and advertisements for drug therapy appear everywhere. The third edition of this widely acclaimed book reflects changes in how mood disorders are thought about, and how they are treated. Dr. Francis Mark Mondimore, author of the best-selling book *Bipolar Disorder: A Guide for Patients and Families*, here explains depression--its causes and symptoms, and its treatment. He discusses depression in all age groups and in both sexes, as well as bipolar disorder, seasonal affective disorders, and depression that accompanies illness. This edition encompasses more than a decade of new research, advances in pharmacology, and changes in public perception. The past ten years

have seen the release of new forms of the major antidepressants as well as other promising new avenues in pharmaceutical treatments. For example "atypical" or "second generation" antidepressants, such as venlafaxine and duloxetine, provide different ways of manipulating the chemical systems in the brain concerned with mood. And there have been significant advances in the use of MAO inhibitors, now available in patch form. Dr. Mondimore reviews these and other pharmacological therapies as part of a comprehensive approach to treatment that includes psychotherapy, family and community support, and lifestyle changes. Full of information compassionately presented, this guide provides hope and help to patients and their families.

We live in an era of depression, a condition that causes extensive suffering for individuals and families and saps our collective productivity. Yet there remains considerable confusion about how to understand depression. *Depression: Integrating Science, Culture, and Humanities* looks at the varied and multiple models through which depression is understood. Highlighting how depression is increasingly seen through models of biomedicine—and through biomedical catch-alls such as "broken brains" and "chemical imbalances"—psychiatrist and cultural studies scholar Bradley Lewis shows how depression is also understood through a variety of other contemporary models. Furthermore, Lewis explores the different ways that depression has been categorized, described, and experienced across history and across cultures.

"There was very fine, an elegant pain, hardly a pain at all, like the swift and fleeting burn of a drop of hot candle wax...Then the blood welled up and began to distort the pure, stark edges of my delicately wrought wound. "The chaos in my head spun itself into a silk of silence. I had distilled myself to the immediacy of hand, blade, blood, flesh." There are an estimated two to three million "cutters" in America, but experts warn that, as with anorexia, this could be just the tip of the iceberg of those affected by this little-known disorder. Cutting has only just begun to enter public consciousness as a dangerous affliction that tends to take hold of adolescent girls and can last, hidden and untreated, well into adulthood. Caroline Kettlewell is an intelligent woman with a promising career and a family. She is also a former cutter, and the first person to tell her own story about living with and overcoming the disorder. She grew up on the campus of a boys' boarding school where her father taught. As she entered adolescence, the combination of a family where frank discussion was avoided and life in what seemed like a fishbowl, where she and her sister were practically the only girls the students ever saw, became unbearable for Caroline. She discovered that the only way to find relief from overpowering feelings of self-consciousness, discomfort, and alienation was to physically hurt herself. She began cutting her arms and legs in the seventh grade, and continued into her twenties. Why would a rational person resort to such extreme measures? How did she recognize and overcome her problem? In a memoir

startling for its honesty, humor, and poignancy, Caroline Kettlewell offers a clear-eyed account of her own struggle to survive this debilitating affliction.

A nuanced psychological portrait of Abraham Lincoln that finds his legendary political strengths rooted in his most personal struggles. Giving shape to the deep depression that pervaded Lincoln's adult life, Joshua Wolf Shenk's *Lincoln's Melancholy* reveals how this illness influenced both the President's character and his leadership. Mired in personal suffering as a young man, Lincoln forged a hard path toward mental health. Shenk draws on seven years of research from historical record, interviews with Lincoln scholars, and contemporary research on depression to understand the nature of Lincoln's unhappiness. In the process, Shenk discovers that the President's coping strategies—among them, a rich sense of humor and a tendency toward quiet reflection—ultimately helped him to lead the nation through its greatest turmoil. A *New York Times* Book Review Editors' Choice SELECTED AS A BEST BOOK OF THE YEAR: *Washington Post* Book World, *Atlanta Journal-Constitution*, *St. Louis Post-Dispatch*, *Pittsburgh Post-Gazette* As Featured on the History Channel documentary *Lincoln* "Fresh, fascinating, provocative."—Sanford D. Horwitt, *San Francisco Chronicle* "Some extremely beautiful prose and fine political rhetoric and leaves one feeling close to Lincoln, a considerable accomplishment."—Andrew Solomon, *New York Magazine* "A profoundly human and psychologically important examination of the melancholy that so pervaded Lincoln's life."—Kay Redfield Jamison, Ph.D., author of *An Unquiet Mind*

In a series of brief, moving vignettes, the author describes her daily life with Obsessive Compulsive Disorder with honesty and humor, reflecting on her colorful family and friends and her deep relationship with her husband. Reprint.

The silent epidemic of depression affects millions of people and takes dozens of lives everyday, while our culture grapples with a stigma against open discussion of mental health issues. Editor Amy Ferris has collected these stories to illuminate the truth behind that stigma and offer compassion, solidarity, and hope for all those who have struggled with depression. Contributors to *Shades of Blue* include: Barbara Abercrombie, Sherry Amatenstein, Regina Anavy, Chloe Caldwell, Jimmy Camp, Debra LoGuercio DeAngelo, Marika Rosenthal Delan, Hollye Dexter, Beverly Donofrio, Beth Bornstein Dunnington, Matt Ebert, Betsy Graziani Fasbinder, Zoe FitzGerald Carter, Pam L. Houston, David Lacy, Patti Linsky, Mark S. King, Caroline Leavitt, Karen Lynch, Lira Maywood, C.O. Moed, Mark Morgan, Linda Joy Myers, Christine Kehl O'Hagan, Jennifer Pastiloff, Ruth Pennebaker, Angela M. Giles Patel, Alexa Rosalsky, Elizabeth Rosner, Kathryn Rountree, Kitty Sheehan, Jenna Stone, judywhite, and Samantha White. *Shades of Blue* brings the conversation around depression and sadness into the open with real, first-hand accounts of depression and mental health

## Download Free Unholy Ghost Writers On Depression Nell Casey

issues, offering empathy to all those who have been affected by these issues. It's time to scream out loud against this silent annihilator: We are not alone.

Have you ever heard of a person who left you wondering, "How could someone be so twisted? So evil?" Prompted by clues in her sister's diary after her mysterious death, author Barbara Oakley takes the reader inside the head of the kinds of malevolent people you know, perhaps all too well, but could never understand. Starting with psychology as a frame of reference, Oakley uses cutting-edge images of the working brain to provide startling support for the idea that "evil" people act the way they do mainly as the result of a dysfunction. In fact, some deceitful, manipulative, and even sadistic behavior appears to be programmed genetically—suggesting that some people really are born to be bad. Oakley links the latest findings of molecular research to a wide array of seemingly unrelated historical and current phenomena, from the harems of the Ottomans and the chummy jokes of "Uncle Joe" Stalin, to the remarkable memory of investor Warren Buffet. Throughout, she never loses sight of the personal cost of evil genes as she unravels the mystery surrounding her sister's enigmatic life—and death. *Evil Genes* is a tour-de-force of popular science writing that brilliantly melds scientific research with intriguing family history and puts both a human and scientific face to evil.
