Knowing the "going" royalty rate for virtually any product is as simple as reaching for the newly published Licensing Royalty Rates, 2013 Edition. This information-packed report details the royalty rates for over 1,500 products and services in ten lucrative licensed product categories--art, celebrity, character and entertainment, collegiate, corporate, designer, event, sports, nonprofit and music. Setting a royalty rate too high can scare away potential licensees, while accepting a lower rate can cost licensors hundreds of thousands of dollars. Licensing Royalty Rates, 2013 Edition provides all the information you need to calculate the right rate every time. The data in Licensing Royalty Rates is compiled using information from the U.S. Patent and Trademark Office. After careful review by a blue-ribbon panel of expert licensing consultants uniquely qualified to know what the appropriate rate range is for specific properties in each licensing category, the information is organized into four time-saving sections that give researchers fast access to comprehensive statistical and analytical data: Royalty rate listing alphabetically by licensed product -- provides a detailed alphabetical listing of products and their suggested rate range across all product categories. Royalty rate listing by international trademark class -- lets you quickly identify subtle royalty rate differences between similar products within specific international trademark classes. Checklist of licensed products and services -- offers a quick-reference to products with a high potential for licensing. Comprehensive list of licensed products and services -- presents a detailed list of all surveyed products and services within a trademark class for preparing intent-to-use trademark applications. This detailed information gives both beginning and more experienced licensing professionals the confidence needed to negotiate the maximum allowable rate regardless of the product, the market and the parameters

The Internet didn't kill TV! It has become its best friend. Americans are watching more television than ever before, and we're engaging online at the same time we're tuning in. Social media has created a new and powerful "backchannel", fueling the renaissance of live broadcasts. Mobile and tablet devices allow us to watch and experience television whenever and wherever we want. And "connected TVs" blend web and television content into a unified big screen experience bringing us back into our living rooms. Social TV examines the changing (and complex) television landscape and helps brands navigate its many emerging and exciting marketing and advertising opportunities. Social TV topics include: Leveraging the "second screen" to drive synched and deeper brand engagement Using social ratings analytics tools to find and target lean-forward audiences Aligning brand messaging to content as it travels time-shifted across devices Determining the best strategy to approach marketing via connected TVs Employing addressable TV advertising to maximize content relevancy Testing and learning from the most cutting-edge emerging TV innovations The rise of one technology doesn't always mean the end of another. Discover how this convergence has created new marketing opportunities for your brand.

This book examines corporate entrepreneurship start-ups in the media industries and provides a timely solution to fill in the gap of academic as well as practical knowledge in this

regard. It brings together new media venturing practices in the west and east and covers new media opportunities in various emerging forms, including gaming, Internet, mobile and webcasting business. The book presents case studies from major transnational media companies, highlights the industry specific characteristics of corporate entrepreneurship, and thus contributes to understanding the links between new business venturing and certain particular industries, so as to further explore the industry specific characteristics of entrepreneurship. This book also suggests a new approach to integrate economic and management theories for the study of media corporate entrepreneurship; while the two sets of theories are conflicting with each other, the book proposes a contingent model to reconcile different theories. This is an innovative approach and will be a valuable starting point to construct an interdisciplinary theoretical framework for new media business studies.

If I Could Just Snap Out of It, Don't You Think I Would? is a nine-month plan for smashing your depression. With a daily calendar as its centerpiece, therapist Cathy Mullin leads you through lifestyle and thought-changing exercises that will allow you to toss your depression into the dust of yesterday. She demonstrates how easy it is to become trapped in the awful things you have learned to say to yourself, and she teaches you how to talk back to your thoughts. You learn to throw out self-defeating behaviors that keep you stuck in your depression, and grab hold of new ones that send you chasing new-found passions. You put into words what it is that you truly want from life and realize that little is impossible. Finally, you set about the business of making for yourself the life you've always wanted to live. Cathy Goldstein Mullin is a therapist on the North Shore of Boston. She has a private practice where she sees children, adolescents, and adults,

many of whom struggle with depression. She is also a staff therapist at a large teaching hospital. For the last several years, she has led workshops and given talks on her areas of expertise. *If I Could Just Snap Out of It, Don't You Think I Would? A Nine-Month Plan for Smashing Your Depression* is her first book. She is presently at work on another book, tentatively titled *The Wicked Sisters Who Live in the Pit: Taming the Beasts of Your Anxiety*. In 2009 she launched a website offering information and treatment for anxiety and depressive disorders.
