Written like a thriller, even though you know the outcome Vulcan 607 keeps you on the edge of your seat as this feat of both airmanship and logistics unfolds. From cannibalising other aircraft for navigation and electronics components, reviving a dormant refuelling system and training the crews how to use it, to organising a relay involving half the RAF's tanker fleet to get just one bomber on target, this is an astonishing operation.

Squadron bounced their revolutionary bombs into the dams of the Ruhr Valley in 1943... When Argentine forces invaded the Falklands in the early hours of 2 April 1982, Britain's military chiefs were faced with a real-life Mission Impossible.

It was to be one of the most ambitious operations since 617 Squadron bounced their revolutionary bombs into the dams of the Ruhr Valley in 1943...When Argentine forces invaded the Falklands in the early hours of 2 April 1982, Britain's military chiefs were faced with a real-life Mission Impossible. Its opening shot, they decided, would be Operation Black Buck: to strike a body blow at the occupying army, and make them realize that nothing was safe - not even Buenos Aires...The idea was simple: to destroy the vital landing strip at Port Stanley. The reality was more complicated. The only aircraft that could possibly do the job was three months from being scrapped, and the distance it had to travel was four thousand miles beyond its maximum range. It would take fifteen Victor tankers and seventeen separate in-flight refuellings to get one Avro Vulcan B2 over the target, and give its crew any chance of coming back alive. Yet less than a month later, a formation of elderly British jets was launched from a remote island airbase to carry out the longest-range air attack in history. At the tip of the spear was a single aircraft, six men, and twenty-one thousand-pound bombs, facing a hornet's nest of modern weaponry: the radar-guided guns and missiles of the Argentine defences. There would be no second chances...It was the end of an era - the last time the RAF flew heavy bombers into combat before they were replaced by their digital, fly-by-wire, laser-guided successors. There were many who believed it couldn't be done. Drawing on extensive interviews with the combatants, Falklands residents and British

High Command, and with unprecedented access to contemporary military records, Rowland White takes us, for the first time, to the beating heart of the legendary raid. Vulcan 607 is a story of ingenuity, courage and sheer bloody-mindedness that's destined to become a classic.

It was to be one of the most ambitious operations since 617 Squadron bounced their revolutionary bombs into the dams of the Ruhr Valley in 1943... When Argentine forces invaded the Falklands in the early hours of 2 April 1982, Britain's military chiefs were faced with a real-life Mission Impossible.

It was to be one of the most ambitious operations since 617 Squadron bounced their revolutionary bombs into the dams of the Ruhr Valley in 1943 . . . April 1982. Argentine forces had invaded the Falkland Islands. Britain needed an answer. And fast. The idea was simple: to destroy the vital landing strip at Port Stanley. The reality was more complicated. The only aircraft that could possibly do the job was three months from being scrapped, and the distance it had to travel was four thousand miles beyond its maximum range. It would take fifteen Victor tankers and seventeen separate in-flight refuellings to get one Avro Vulcan B2 over the target, and give its crew any chance of coming back alive. Yet less than a month later, a formation of elderly British jets launched from a remote island airbase to carry out the longest-range air attack in history. At its head was a single aircraft, six men, and twenty-one thousand-pound bombs, facing the hornet's nest of modern weaponry defending the Argentine forces on the Falkland Islands. There would be no second chances . . .

When Argentinian forces invaded the Falklands Islands in 1982, it took the British government by surprise. They needed a fast response, and military chiefs came up with a plan of action - Operation

Black Buck. This is an account of the last British bomber raid, recalling the long-range attack on Port Stanley that opened the Falklands War.

The dramatic account of the last British bomber raid — the long-range attack on Stanley airfield that opened the Falklands War. Before dawn on May 1st, 1982, a lone RAF Vulcan B2 bomber made its way towards the runway at Port Stanley airport. It was aiming to strike the first blow of Britain's campaign to retake the Falklands. The flight was the culmination of a huge military effort and was the longest-range attack in aviation history. It was also the last time that the RAF flew heavy bombers into combat, before the old techniques and equipment were replaced with the digital, fly-by-wire, precision-guided weaponry of modern warfare. When war broke out, the Vulcan was already facing retirement. The aircraft had to be completely overhauled, and the story of how a seemingly endless list of problems and unexpected difficulties was overcome is a story of true British ingenuity. The mission came perilously close to disaster. Two Vulcan bombers took off in the late evening of April 30th to begin a twelve-hour round trip to the Falklands. Within minutes of take-off, the lead Vulcan was forced to turn back because of mechanical difficulties, leaving Vulcan 607 and her crew alone to undertake a mission. Vulcan 607 is the dramatic retelling of this singular mission. Using extensive interviews with the combatants, residents of Stanley, and military command, Rowland White has reconstructed the flight and its preparation in gripping detail. From the Hardcover edition.

THE THRILLING #1 BESTSELLING STORY OF ONE OF THE GREATEST COMBAT MISSIONS EVER FLOWN Shoulder to shoulder with Strategic Air Command B-52s throughout the Cold War, the big delta-winged Vulcans of the Britain's V-bomber force faced down the Soviet threat to the West. In

1982 they were just months from retirement when they flew in anger for the first time. It was a to be a record-breaking mission of breathtaking audacity: a single bomber launched from a remote island airbase to carry out what would be the longest-range air attack in history. An eight thousand mile round trip. Her crew of six would be flying into a hornet's nest of modern weaponry: radar-guided anti-aircraft guns and missiles. There would be no second chances. Vulcan 607 tells the gripping true story of that legendary raid for the first time - an operation that many thought would turn out to be a real life Mission Impossible. 'A masterwork of narrative history' Clive Cussler 'Vulcan 607 deserves to become an aviation classic' Len Deighton 'White's gripping narrative reads like a suspense thriller, yet every word is true' Stephen Coonts 'I read the book in one sitting ... an utterly compelling war story, brilliantly written' Simon Winchester, author of The Professor and the Madman

A deadly crash, a government conspiracy, a lone pilot with one chance to uncover the truth. Project Guiding Light is NATO's biggest secret. A system to take long-range bombers deep into the Soviet Union, undetected. There's just one problem. And veteran engineer Chris Milford has found it. A lethal flaw that means aircrew will pay a terrible price. Undermined and belittled by a commanding officer who values loyalty over safety, Milford is forced down a dangerous, subversive path. Even his closest friend, Rob May, the youngest test pilot on the project has turned his back on him. Until the crash that changes everything. James Blatch's page-turning thriller is set in the 1960s world of secret military projects and an establishment that wants victory over communism at almost any price.

Read Free Vulcan 607

January 1972: the tiny outpost of British Honduras is threatened with imminent invasion by battle-hardened, US-trained Guatemalan paratroops. Britain's response must be immediate and decisive. But there is only one deterrent the government can offer: HMS Ark Royal, once the Navy's most powerful warship, now a white elephant on the verge of being scrapped. To save the small colony, she must launch a pair of Buccaneer fighter bombers on an unprecedented long-range mission. But first the old carrier must make a high-speed, 1,500 mile dash across the Atlantic towards the Gulf of Mexico. The odds of arriving in time are very slim indeed... Drawing on extensive first-hand accounts and previously unseen, classified documents, Rowland White has pieced together one of the most audacious and thrilling missions of post-war British military history.

An in-depth look at these Cold War-era bombers, in the words of those who flew them—includes photos. The Vulcan, the second of the three V bombers built to guard the United Kingdom during the Cold War, has become an aviation icon like the Spitfire, its delta shape as instantly recognizable as the howling noise it makes when the engines are opened for takeoff. *Vulcan Boys* is the first book about this bomber recounted completely firsthand by the operators themselves. It tells the story of the aircraft from its design conception through the Cold War, when it played out its most important job as Britain's nuclear deterrent; it also reveals the significant role its bombs and missiles played in liberating the Falkland Islands, for which it gained much celebrity. These individual accounts detail how hours at a time were spent waiting to be scrambled to defend the country in the event of a third world war, and how pilots' aggressive skills were honed by carrying out Lone Ranger sorties flying to the United States and westward around the world, and taking part in Giant Voice and Red Flag, competitive exercises against the US Strategic Air Command. The attacks in the Falklands using Shrike missiles are described

Read Free Vulcan 607

accurately and in great detail for the first time, including the landing at Rio de Janeiro alongside a vivid account of Black Buck 2. Vulcan Boys is a fascinating and completely authentic read reminding us of the Cold War, how it was fought, and the considerable effort required to prevent all-out nuclear war.
