Chapters describe innovative, science-based interventions and techniques for

treating common behavioral and emotional problems along a continuum of family involvement and separation, to address issues affecting the family as well as the identified patient. With its accessible ideas and compelling case studies, the book ably demonstrates the critical role of family in adolescent patients' successful transition to post-treatment life. Among the topics covered:

- A parallel process: home therapy while the adolescent or young adult is in residential care.
- Intentional separation of families: increasing differentiation through wilderness therapy.
- Emerging family therapy models utilized in residential settings.
- Engaging families in Outdoor Behavioral Healthcare.
- Research on coping skills used by youth with emotional and behavioral disorders.
