The green beret was the official headdress of the British Commandos of the Second World War. It is still worn by members of the Royal Marines after passing the Commando Course and personnel from other units of the Royal Navy, Army and RAF who serve within 3 Commando Brigade and who have passed the All Arms Commando Course. There are certain other military organizations that also wear the green beret because they have regimental or unit histories that have a connection with the British Commandos

At Ft. Richardson, AK, the 172nd Infantry Brigade began using an olive green beret. In 1975, the Airborne Rangers got approval from the Army Chief of Staff to use the black beret as their official headgear. Over the next few years, the whole thing got out of hand, so in 1979 senior Army officials "put on the brakes."

With the authenticity of Jarhead and Bravo Two Zero and the straight-up narrative of Contact Charlie, this military memoir describes what really goes on in the training of an elite soldier and his tours in Afghanistan. In 2004, Jake Olafsen signed up for the Royal Marines Commandos. He left everything behind at home in Canada on the basis of a spur-of-the-moment decision. The Royal Marines have the toughest and longest basic training of any infantry unit in the world. For Olafson, this meant eight months of wet and cold in England and Wales. It was hell, but he came out with the four Commando qualities that the corps look for: courage, determination, unselfishness, cheerfulness in the face of adversity. Olafsen went on to serve for four years as a Commando in the Royal Marines, an elite military unit based in the United Kingdom. He went to Afghanistan twice: in 2006, he went to confront the Taliban in Helmand Province for six months, and in 2007, he was sent to do it all over again. His story is filled with good experiences, like the sense of accomplishment, patriotism, and camaraderie, and the opportunity to travel the world. But all good things come at a price. The sacrifices he made for the Corps are significant; he has killed the enemy and he has buried his friends. And in telling his story, Olafsen hopes that he can make sense of it all. This is an honest, gutsy story about the mud and the blood, the triumphs and the tragedies. From the Hardcover edition.

The inspiring true story of a US Special Forces soldier who was medically retired after stepping on an IED, and his incredible return to active duty. Sergeant First Class (SFC) Ryan Hendrickson is a brave, determined, and courageous soldier -- a Green Beret clearing the way for his twelve-man team while conducting combat operations against the Taliban. As the "tip of the spear," his role is to insure the route taken by U.S. and Afghan troops are free of IEDs -- improvised explosive devices. Many soldiers do not survive their last step; those who do often lose at least one limb. While rescuing an Afghan soldier outside a mud-hut compound in 2010 -- knowing that he was in "uncleared" territory -- Ryan stepped on an IED with his right foot. The device exploded, leaving his foot dangling at the end of his leg. American soldiers losing a limb is an all-too-common occurrence. But what makes Ryan's story different is that after undergoing two dozen surgeries and a tortuous rehabilitation, he was medically retired but fought to return to active duty. Multiple skin grafts to his lower leg and right foot successfully reattached his lower leg, and he was aided in his recovery by wearing a new prosthetic device known as an IDEO (Intrapid Dynamic Exoskeletal Orthosis). Once he passed a series of crucial physical tests, Ryan was able to rejoin the Green Berets within a year and physically perform his duties, redeploying to Afghanistan in March 2012. In 2016, he volunteered to return to Afghanistan with Bravo Company, 2nd Battalion, 7th Special Forces Group. During a firefight with the Taliban, he risked his life under heavy enemy fire to rescue three Afghan soldiers cut off from friendly forces and return the bodies of two dead Afghan soldiers under the ethos that "no one gets left behind." For his heroic efforts on the battlefield, SFC Ryan Hendrickson was awarded a Silver Star, the nation's third-highest award for valor. An engaging and harrowing account, Tip of the Spear tells the amazing story of one Green Beret's indomitable spirit.

The author of an award-winning memoir about growing up black in Mississippi, Chalmers Archer turns his attention in this book to his experiences as one of the first members of the U.S. Army's Special Forces. His perspective is unique, not only as one of the first to wear the Green Beret but as a black man in the early days of armed forces integration. Archer participated in some of the earliest forays into Laos, long before Southeast Asia was in American headlines, and he was a member of the first U.S. unit to go into Vietnam. He trained the first Special Forces teams of the South Vietnamese army and participated in some of their earliest operations, many of them unknown until now because of their highly classified nature. He saved the lives of the first American and Vietnamese soldiers injured in war and also witnessed the first American combat death in Vietnam, holding the man in his arms as he died. His unit operated alongside the Central Intelligence Agency and helped influence American foreign policy. A self-described soldier-teacher, he developed and spread the early gospel of special warfare while serving in the Philippines, Hawaii, Korea, Taiwan, and Panama, as well as in Southeast Asia. All of these activities are fully chronicled in this book, but Archer's perspective as an African American in an elite unit of the U.S. armed forces in the 1950s gives his memoir additional depth and insight. It is an uplifting--though sometimes harrowing--story of struggle in unfamiliar environments and an eye-opening account of events little known today.

Since their formation by Winston Churchill during the dark days of the Second World War, the Commandos have been regarded as among the most feared amphibious infantry in the world. Lightly equipped, fast, silent and deadly - the Commandos epitomize the modern soldier. They are highly trained, disciplined, tough, determined and efficient, always basing their operations on speed, mobility, surprise and firepower. But who are the Commandos? What qualities do they have beyond those of the normal soldier? There are two ways to join the Royal Marine Commandos: thru the Recruit Troop Course for teenagers; or thru the All Arms Commando Course for volunteers from the other services. This book follows two such courses as the recruits and volunteers pit themselves against the Commando Tests - and against themselves - for the right to wear the coveted Green Beret.

Black Man Green Beret is an American story, a semi-autobiography of a man born in the ghettos of the South Bronx and raised on the mean streets of Harlem, in New York City. Experienced homelessness, became a NCO in the military, graduated the U.S. Army's Special Forces Weapons Sergeant "Q Course," and eventually became a master level military instructor who wrote Infantry Battle Doctrine for the U.S. Army. Traveled to over 30 countries around the world, including sites in the middle east; the Great Pyramids of Egypt, swam the Red Sea, climbed Moses Mountain and saw the actual Burning Bush. A Retired Military Combat Veteran, who then served almost seven more years in Iraq on the U.S. State Department's (DoS) WPPS/WPS HTP program in an extremely high threat environment culminating with his successful service on the U.S. Ambassador to Iraq's Personal Protection Detail (APD).

On a moonless night just weeks after September 11, 2001, a U.S. Special Forces team of Green Berets known as ODA 574 infiltrated the mountains of southern Afghanistan with a seemingly impossible mission: to foment a tribal revolt and force the Taliban to surrender. Armed solely with the equipment they could carry on their backs, shockingly scant intelligence, and their mastery of guerrilla warfare, Captain Jason Amerine and his ten men had no choice but to trust their only ally, a little-known Pashtun statesman named Hamid Karzai. Having returned from exile, Karzai—on the run from the Taliban—was traveling the countryside to raise a militia. The Only Thing Worth Dying For chronicles the most important mission in the early days of the Global War on Terror, when the men on the ground knew little about the enemy—and their commanders in Washington knew even less. With unprecedented access to surviving members of ODA 574, key war planners, and Karzai himself, award-winning author Eric Blehm cuts through the noise of politicians and high-level military officials to narrate for the first time a story of uncommon bravery and terrible sacrifice, intimately exposing the realities of unconventional warfare and nation-building in Afghanistan that continue to shape the region today.

A guide to the face of modern US warfare in the 21st century. The US Special Operations Forces will be at the forefront of every battle that the US will wage against the war on terrorism.
