The webcam is compatible with most apps, which's great because the company's software is not that great compared to, say, Logitech's programs. What's pretty great though is the clip-on base design that is able to both stand and hang. With the device measuring only 9.8 x 7.6 x 6.4 centimetres, even the thinnest, practically frameless screens will be able to fit this 'cam. There's also this ...

The 5 Best Webcams of 2020 - Lifewire

A webcam with a high resolution is a must. The lower the resolution, the grainier the image looks on the screen. Most modern webcams support only high-definition video capture. Look for a video capture resolution of at least 720p or higher. A 1080p webcam is better, and these are becoming more common and more affordable.

Liars online dating Webcam scam Shira has at least six sponsors, three farang and three Japanese. I was sponsor number four. Two of her sponsors live in Europe. Only one sponsor, who lives in Bangkok, knows that there are other sponsors and he does not care. She gets about 150k a month from her sponsors. She has about 50 baht of gold jewellery (3.5 Baht from me). She has 600k in the bank. Her house in Mindanao was paid for by sponsors money (not a bank loan) and her family have a pickup truck paid for by sponsors money. She has taken several sponsors to her family home. Her ambition is to buy a house in Bangkok and she has found a sponsor for this, she also wants a car and a hairdressing business. Her family are money grabbing just as reported.

WOW! Scammed or Not Scammed! By: Beverly Koribanic Being scammed can be at once financially and emotionally devastating. Beverly Koribanic addresses the issue frankly. Breaking the scamming process down in to easy-to-understand stages, she hopes to empower potential victims of scamming with awareness. Armed with awareness, potential victims can avoid the advances and common tricks of many scammers. The process of being scammed is truly an emotional experience, scammers often employ romance—be it the exploitation of dreams of hitting it big, or simply finding a companion. Beverly Koribanic has learned of this through personal experience and through studies of scamming. She now seeks to share her experiences and knowledge within the pages of WOW! Scammed or Not Scammed!

Now a New York Times bestseller! There is a Threat Lurking Online with the Power to Destroy Your Finances, Steal Your Personal Data, and Endanger Your Life. In Spam Nation, investigative journalist and cybersecurity expert Brian Krebs unmasks the criminal masterminds driving some of the biggest spam and hacker operations targeting Americans and their bank accounts. Tracing the rise, fall, and alarming resurrection of the digital mafia behind the two largest spam pharmacies-and countless viruses, phishing, and spyware attacks—he delivers the first definitive narrative of the global spam problem and its threat to consumers everywhere. Blending cutting-edge research, investigative reporting, and firsthand interviews, this terrifying true story reveals how we unwittingly invite these digital thieves into our lives every day. From unassuming computer programmers right next door to digital mobsters like "Cosma"-who unleashed a massive malware attack that has stolen thousands of Americans' logins and passwords-Krebs uncovers the shocking lengths to which these people will go to profit from our data and our wallets. Not only are hundreds of thousands of Americans exposing themselves to fraud and dangerously toxic products from rogue online pharmacies, but even those who never open junk messages are at risk. As Krebs notes, spammers can-and do-hack into accounts through these emails, harvest personal information like usernames and passwords, and sell them on the digital black market. The fallout from this global epidemic doesn't just cost consumers and companies billions, it costs lives too. Fast-paced and utterly gripping, Spam Nation ultimately proposes concrete solutions for protecting ourselves online and stemming this tidal wave of cybercrime-before it's too late. "Krebs's talent for exposing the weaknesses in online security has earned him respect in the IT business and loathing among cybercriminals... His track record of scoops...has helped him become the rare blogger who supports himself on the strength of his reputation for hard-nosed reporting." -Bloomberg Businessweek

This is a book about what privacy is and why it matters. Governments and companies keep telling us that Privacy is Dead, but they are wrong. Privacy is about more than just whether our information is collected. It's about what we do with that information. And in our modern society, that's pretty much everything we do, from GPS mapping to texting to voting to treating disease. We need to realize that privacy is up for grabs, and we need to craft rules to protect our hard-won, but fragile human values like identity, freedom, consumer protection, and trust. Author Neil Richards shows what privacy is, why privacy matters, and how we can build a better digital future together.
