**Jamesland** Michelle Huneven 2007-12-18 Jamesland, the buoyant second novel by Michelle Huneven, critically acclaimed author of Round Rock, is a witty, sophisticated, and deeply humane comedy of unlikely redemption. When thirty-three-year-old Alice Black discovers a deer in her dining room after fighting with her boyfriend, she wonders if she's going crazy. Pete Ross, forty-six, knows he's crazy. He's wrecked his marriage, slashed his wrists, and done time in a psychiatric institution, and now he's being cared for by his mother, who's a nun. Forty-five-year-old Helen Harland, a spirited Unitarian Universalist minister, is being driven crazy by her hostile church administration. Living in Los Feliz, California, the three meet at Helen's Wednesday midweek services. Though initially incompatible, the sheer force of Helen's idiosyncratic

ministering (her "variety show of religious experience")—paired with Alice's illustrious ancestor William James—proves to be a catalyst for friendship and a kind of transcendence. Generous and compassionate, Michelle Huneven delivers a joyful new novel about love, faith, and a few wayward souls waiting for life to begin.

**Relevant Search** John Berryman 2016-06-19 Summary Relevant Search demystifies relevance work. Using Elasticsearch, it teaches you how to return engaging search results to your users, helping you understand and leverage the internals of Lucene-based search engines. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. About the Technology Users are accustomed to and expect instant, relevant search results. To achieve this, you must master the search engine. Yet for many developers, relevance ranking is mysterious or confusing. About the Book Relevant Search demystifies the subject and shows you that a search engine is a programmable relevance framework. You'll learn how to apply Elasticsearch or Solr to your business's unique ranking problems. The book demonstrates how to program relevance and how to incorporate secondary data sources, taxonomies, text analytics, and personalization. In practice, a relevance framework requires softer skills as well, such as collaborating with stakeholders to discover the right relevance requirements for your business. By the end, you'll be able to achieve a virtuous cycle of provable, measurable relevance improvements over a search product's lifetime.

What's Inside Techniques for debugging relevance? Applying search engine features to real problems? Using the user interface to guide searchers? A systematic approach to relevance? **Search for Wisdom & Enlightenment: Book 4. Mysteries of Life (Where Do We Come From? Is There Life After Death, a God? Who Are the ETs Visiting Earth?)** Tony Kelbrat 2014-04-02 Where do we come from? Is there life after Death? If so, where? I think I figured it out. I will give you my version of the answers here in this book. In any event, you are the master of this life right here, right now. That's all anyone knows for sure, this life on Earth in the physical realm. When I was a kid, they taught me to be a good, little Catholic boy. I was as brainwashed as anyone could be about religion but I gradually realized it was a crutch and a tool of oppression which doesn't make it bad in and of itself. It just means that a lot of people use religion as a tool to control others through guilt, to gain trust, sexual favours, political power, etc. Aside from that, even if there is no God, religion serves a variety of pragmatic purposes. It gives us hope, comfort, inspiration and bonds us as communities and societies.

**In Search of Lost Books** Giorgio van Straten 2017-11-02 The gripping and elegiac stories of eight lost books, and the mysterious circumstances behind their disappearances They exist as a rumour or a fading memory. They vanished from history leaving scarcely a trace, lost to fire, censorship, theft, war or deliberate destruction. Yet those who seek them are convinced they will find them. This is the story of one man's quest for eight mysterious lost books. Taking us from Florence to Regency London, the Russian Steppe to British Columbia, Giorgio van Straten unearths stories of infamy and tragedy, glimmers of hope and bitter twists of fate. There are, among others, the rediscovered masterpiece that he read but failed to save from destruction; the Hemingway novel that vanished in a suitcase at the Gare de Lyon; the memoirs of Lord Byron, burnt to avoid a scandal; the Magnum Opus of Bruno Schulz, disappeared along with its author in wartime Poland; the mythical Sylvia Plath novel that may one day become reality. As gripping as a detective novel, as moving as an elegy, this is the tale of a love affair with the impossible, of the things that slip away from us but which, sometimes, live again in the stories we tell. Giorgio van Straten is director of the Italian Cultural Institute of New York and one of the editors of the literature review *Nuovi Argomenti*. He is the author of several novels, including the prize-winning *My Name a Living Memory*, along with two collections of short stories. He has translated the works of authors such as Kipling, London and Stevenson and has edited several works of non-fiction.

**Blame** Michelle Huneven 2009-09 Patsy MacLemoore, a history professor in her late twenties with a brand-new Ph.D. from Berkeley and a wild streak, wakes up in jail--yet again--after another epic alcoholic blackout. However, this time two people are dead, and Patsy had been driving with

**Algorithms of Oppression** Safiya Umoja Noble 2018-02-20 A revealing look at how negative biases against women of color are embedded in search engine results and algorithms Run a Google search for "black girls"--what will you find? "Big Booty" and other sexually explicit terms are likely to come up as top search terms. But, if you type in "white girls," the results are radically different. The suggested porn sites and un-moderated discussions about "why black women are so sassy" or "why black women are so angry" presents a disturbing portrait of black womanhood in modern society. In *Algorithms of Oppression*, Safiya Umoja Noble challenges the idea that search engines like Google offer an equal playing field for all forms of ideas, identities, and activities. Data discrimination is a real social problem; Noble argues that the combination of private interests in promoting certain sites, along with the monopoly status of a relatively small number of Internet search engines, leads to a biased set of search algorithms that privilege whiteness and discriminate against people of color, specifically women of color. Through an analysis of textual and media searches as well as extensive research on paid online advertising, Noble exposes a culture of racism and sexism in the way discoverability is created online. As search engines and their related companies grow in importance--operating as a source for email, a major vehicle for primary and secondary school learning, and beyond--understanding and reversing these disquieting trends and discriminatory practices is of utmost importance. An original, surprising and, at times, disturbing account of bias on the internet, *Algorithms of Oppression* contributes to our understanding of how racism is created, maintained, and disseminated in the 21st century.

**Search and Rescue** April Wilson 2021-10-26 When nature warrior Hannah McIntyre goes missing in the Rocky Mountains, her brother organizes a search and rescue team. Killian Devereaux, a former military special-ops soldier who now works for a private security company, leads the mission. Killian grew up in the Louisiana bayou hunting gators with his Cajun grandpapa. Searching the wilderness for a missing woman is right up his alley. He's determined to find her because one thing is certain - Hannah haunts his dreams, and he's not about to give up on her.

**Search History** Eugene Lim 2021-10-05 Search History oscillates between a wild cyberdog chase and lunch-date monologues as Eugene Lim deconstructs grieving and storytelling with uncanny juxtapositions and subversive satire. Frank Exit is dead--or is he? While eavesdropping on two women discussing a dog-sitting gig over lunch, a bereft friend comes to a shocking realization: Frank has been reincarnated as a dog! This epiphany launches a series of adventures--interlaced with digressions about AI-generated fiction, virtual reality, Asian American identity in the arts, and lost parents--as an unlikely cast of accomplices and enemies pursues the mysterious canine. In elliptical, propulsive prose, Search History plumbs the depths of personal and collective consciousness, questioning what we consume, how we grieve, and the stories we tell ourselves.

**In Search of Climate Politics** Matthew Paterson 2021-08-26 This book addresses the crucial - but oddly neglected - question of what it means to say climate change is political.

**Popular Mechanics** 1909-01 Popular Mechanics inspires, instructs and influences readers to help them master the modern world. **Round Rock** Michelle Huneven 2011-03-02 In a small town among the citrus groves in the Santa Bernita Valley, so the locals claim, nothing ever goes according to plan. "It's a great place to live, they say, if you like surprises: it's just like life, only different." Certainly a number of Rito's inhabitants--fewer than a hundred in all--are surprised to be living here. Red Ray, for instance, a wildly alcoholic lawyer who bought a dilapidated Victorian mansion in an attempt to rehabilitate his marriage and regain the affections of his wife and young

son. After destroying those hopes with a spectacular final binge, Red established a drunk farm, Round Rock, on the ruins. There, one day at a time, he follows his new, unexpected calling. Many months after her husband decamped (almost immediately) for Los Angeles, Libby Daw still lives alone in their trailer, and finds herself even more rooted to the valley she dreams of escaping. And there's Lewis Fletcher, a sometime graduate student whose keen intelligence is sorely tested by his erratic behavior and current predicament. Without exactly knowing why, and entirely against his wishes--or by default and sheer good luck--he finds himself placed in Ray's care at Round Rock. As these people seek out or maintain their various niches in the valley, the peculiar history of the place asserts itself. An heiress descended from the original settlers, Billie Fitzgerald still acts as though she owns it all; devoted to her father and son, she obscures her mercurial emotions from even her closest friends. The past also returns with David Ibañez, whose family had harvested the groves for generations--and whose talents and secrets (and thus, he discovers, his future) are inextricably bound to the complex, close-knit town he thought he had left behind. With insight matched with artistry, Michelle Huneven traces the emerging destinies of these characters as each of them struggles for peace and equilibrium, even happiness and love, against hapless, all-too-human frailty and circumstance. A vivid evocation of landscape and community, Round Rock derives great power from psychological subtlety, and from affection for and profound understanding of lives strained or broken but on the mend. Fresh, remarkably mature, and constantly surprising, this astonishing debut wins both your trust and your heart.

**The Book of Atlantis Black: The Search for a Sister Gone Missing** Betsy Bonner 2020-08-04 The Book of Atlantis Black: The Search for a Sister Gone Missing will have you questioning facts, rooting for secrets, and asking what it means to know the truth. A young woman is found dead on the floor of a Tijuana hotel room. An ID in a nearby purse reads "Atlantis Black." The police report states that the body does not seem to match the identification, yet the body is quickly cremated and the case is considered closed. So begins Betsy Bonner's search for her sister, Atlantis, and the unraveling of the mysterious final months before Atlantis's disappearance, alleged overdose, and death. With access to her sister's email and social media accounts, Bonner attempts to decipher and construct a narrative: frantic and unintelligible Facebook posts, alarming images of a woman with a handgun, Craigslist companionship ads, DEA agent testimony, video surveillance, police reports, and various phone calls and moments in the flesh conjured from memory. Through a history only she and Atlantis shared--a childhood fraught with abuse and mental illness, Atlantis's precocious yet short rise in the music world, and through it all an unshakable bond of sisterhood--Bonner finds questions that lead only to more questions and possible clues that seem to point in no particular direction. In this haunting memoir and piercing true crime account, Bonner must decide how far she will go to understand a sister who, like the mythical island she renamed herself for, might prove impossible to find.

**The Search** Geoff Dyer 2014-05-20 "A short, brilliant novel, The Search offers more in 150 pages than most books twice that length." --The Guardian Walker meets Rachel at a glamorous party by the bay. When she turns up at his apartment two days later, there is a hint of erotic promise in the air. But it isn't Walker she wants--at least not yet. Her husband, Malory, has gone missing, and she wants Walker to find him. So begins Walker's quest, as well as this beautiful novel that takes our hard-boiled knight across the vast landscape of an imaginary middle America that begins subtly to morph into something stranger. Walker's search intensifies, and soon it seems that somebody else is searching for him. In *The Search*, his second novel, Geoff Dyer concocts a sophisticated and enthralling narrative puzzle.

*The Search for Why* Bob Raleigh 2021-01-19 A groundbreaking new behavioral model that explains what drives us, and why. From tireless marketers to pandering politicians, the forces of modernity have lulled us into lazy categorizations of people, erasing the natural nuances of being human. We are all now accustomed to being reduced to a demographic—man, woman, black, white, old, young. But while these factors may inform our lived experience, what if there is something more fundamentally important that determines our behavior? Bob Raleigh, founder of PathSight Predictive Science, argues that biological instincts are the most foundational determinants of our behavior. PathSight has pioneered a new model that draws on the latest findings in neuroscience, data science, and behavioral science to classify people in five distinct groups, depending on what they instinctively care about most: nurturing, fairness, loyalty, authority, or purity. Their data, drawn from large-scale studies with over 50,000 participants, show that people who share the same instinctual patterns will engage the world in extremely predictable ways, regardless of age, gender, ethnicity, lifestyle, income, and education. Knowing the impact that instinct has on behavior has all kinds of advantages. You can tailor any communication to make it maximally effective for a particular audience. You can strive to empathize with a person you've always found mystifying. And of course, understanding what truly makes you tick is an invaluable step on your journey to self-discovery. In *The Search for Why*, Bob Raleigh offers the missing link that all the big data in the world can't deliver.

**The Three Weissmanns of Westport** Cathleen Schine 2010-02-15 A New York Times Best Seller A New York Times Book Review Editors' Choice Betty Weissmann has just been dumped by her husband of forty-eight years. Exiled from her elegant New York apartment by her husband's mistress, she and her two middle-aged daughters, Miranda and Annie, regroup in a run-down Westport, Connecticut, beach cottage. In Schine's playful and devoted homage to Jane Austen's *Sense and Sensibility*, the impulsive sister is Miranda, a literary agent entangled in a series of scandals, and the more pragmatic sister is Annie, a library director, who feels compelled to move in and watch over her capricious mother and sister. Schine's witty, wonderful novel *The Three Weissmanns of Westport* "is simply full of pleasure: the pleasure of reading, the pleasure of Austen, and the pleasure that the characters so rightly and humorously pursue....An absolute triumph" (*The Cleveland Plain Dealer*).

**The Joy of Search** Daniel M. Russell 2019-10-01 A Google researcher reveals the art of online searching, offering tips and tricks on how best to use resources like Google and Wikipedia—plus fun facts and fascinating stories We all know how to look up something online by typing words into a search engine. We do this so often that we have made the most famous search engine a verb: we Google it—"Japan population" or "Nobel Peace Prize" or "poison ivy" or whatever we want to know. But knowing how to Google something doesn't make us search experts; there's much more we can do to access the massive collective knowledge available online. In *The Joy of Search*, Daniel Russell shows us how to be great online researchers. We don't have to be computer geeks or a scholar searching out obscure facts; we just need to know some basic methods. Russell demonstrates these methods with step-by-step searches for answers to a series of intriguing questions—from "what is the wrong side of a towel?" to "what is the most likely way you will die?" Along the way, readers will discover essential tools for effective online searches—and learn some fascinating facts and interesting stories. Russell explains how to frame search queries so they will yield information and describes the best ways to use such resources as Google Earth, Google Scholar, Wikipedia, and Wikimedia. He shows when to put search terms in double quotes, how to use the operator (\*), why metadata is important, and how to triangulate information from multiple sources. By the end of this engaging journey of discovering, readers will have the definitive answer to why the best online searches involve more than typing a few words into Google.

**Search Engines** Bruce Croft 2011-11-21 This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. *Search Engines: Information Retrieval in Practice* is ideal for introductory information retrieval courses at the undergraduate and graduate level in computer science, information science and computer engineering departments. It is also a valuable tool for search engine and information retrieval professionals. Written by a leader in the field of information retrieval, *Search Engines: Information Retrieval in Practice*, is designed to give undergraduate students the understanding and tools they need to evaluate, compare and modify search engines. Coverage of the underlying IR and mathematical models reinforce key concepts. The book's numerous programming exercises make extensive use of Galago, a Java-based open source search engine.
