In Search of Lost Books Giorgio van Straten

2017-11-02 The gripping and elegiac stories of  
eight lost books, and the mysterious

circumstances behind their disappearances. They exist as a rumour or a fading memory. They vanished from history leaving scarcely a trace, lost to fire, censorship, theft, war or deliberate destruction. Yet those who seek them are convinced they will find them. This is the story of one man's quest for eight mysterious lost books. Taking us from Florence to Regency London, the Russian Steppe to British Columbia, Giorgio van Straten unearths stories of infamy and tragedy, glimmers of hope and bitter twists of fate. There are, among others, the rediscovered masterpiece that he read but failed to save from destruction;

the Hemingway novel that vanished in a suitcase at the Gare de Lyon; the memoirs of Lord Byron, burnt to avoid a scandal; the Magnum Opus of Bruno Schulz, disappeared along with its author in wartime Poland; the mythical Sylvia Plath novel that may one day become reality. As gripping as a detective novel, as moving as an elegy, this is the tale of a love affair with the impossible, of the things that slip away from us but which, sometimes, live again in the stories we tell. Giorgio van Straten is director of the Italian Cultural Institute of New York and one of the editors of the literature review *Nuovi Argomenti*.

He is the author of several novels, including the prize-winning *My Name a Living Memory*, along with two collections of short stories. He has translated the works of authors such as Kipling, London and Stevenson and has edited several works of non-fiction.

*The Search for Why* Bob Raleigh 2021-01-19 A groundbreaking new behavioral model that explains what drives us, and why. From tireless marketers to pandering politicians, the forces of modernity have lulled us into lazy categorizations of people, erasing the natural nuances of being human. We are all now accustomed to being reduced to a demographic—man, woman, black, white, old, young. But while these factors may

inform our lived experience, what if there is something more fundamentally important that determines our behavior? Bob Raleigh, founder of PathSight Predictive Science, argues that biological instincts are the most foundational determinants of our behavior. PathSight has pioneered a new model that draws on the latest findings in neuroscience, data science, and behavioral science to classify people in five distinct groups, depending on what they instinctively care about most: nurturing, fairness, loyalty, authority, or purity. Their data, drawn from large-scale studies with over 50,000 participants,

show that people who share the same instinctual patterns will engage the world in extremely predictable ways, regardless of age, gender, ethnicity, lifestyle, income, and education. Knowing the impact that instinct has on behavior has all kinds of advantages. You can tailor any communication to make it maximally effective for a particular audience. You can strive to empathize with a person you've always found mystifying. And of course, understanding what truly makes you tick is an invaluable step on your journey to self-discovery. In *The Search for Why*, Bob Raleigh offers the missing link that all the big

data in the world can't deliver.

Round Rock Michelle Huneven 2011-03-02 In a small town among the citrus groves in the Santa Bernita Valley, so the locals claim, nothing ever goes according to plan. "It's a great place to live, they say, if you like surprises: it's just like life,

only different." Certainly a number of Rito's inhabitants--fewer than a hundred in all--are surprised to be living here. Red Ray, for instance, a wildly alcoholic lawyer who bought a dilapidated Victorian mansion in an attempt to rehabilitate his marriage and regain the affections of his wife and young son. After destroying those hopes with a spectacular final binge, Red established a drunk farm, Round Rock, on the ruins. There, one day at a time, he follows his new, unexpected calling. Many months after her husband decamped (almost immediately) for Los Angeles, Libby Daw still lives alone in their trailer, and finds herself

even more rooted to the valley she dreams of escaping. And there's Lewis Fletcher, a sometime graduate student whose keen intelligence is sorely tested by his erratic behavior and current predicament. Without exactly knowing why, and entirely against his wishes--or by default and sheer good luck--he finds himself placed in Ray's care at Round Rock. As these people seek out or maintain their various niches in the valley, the peculiar history of the place asserts itself. An heiress descended from the original settlers, Billie Fitzgerald still acts as though she owns it all; devoted to her father and son, she obscures her

mercurial emotions from even her closest friends. The past also returns with David Ibañez, whose family had harvested the groves for generations-- and whose talents and secrets (and thus, he discovers, his future) are inextricably bound to the complex, close-knit town he thought he had left behind. With insight matched with artistry, Michelle Huneven traces the emerging destinies of these characters as each of them struggles for peace and equilibrium, even happiness and love, against hapless, all-too-human frailty and circumstance. A vivid evocation of landscape and community, Round Rock derives great power

from psychological subtlety, and from affection for and profound understanding of lives strained or broken but on the mend. Fresh, remarkably mature, and constantly surprising, this astonishing debut wins both your trust and your heart.

**Jamesland** Michelle Huneven 2007-12-18

Jamesland, the buoyant second novel by Michelle Huneven, critically acclaimed author of Round Rock, is a witty, sophisticated, and deeply humane comedy of unlikely redemption. When thirty-three-year-old Alice Black discovers a deer in her dining room after fighting with her boyfriend, she wonders if she's going crazy. Pete

Ross, forty-six, knows he's crazy. He's wrecked his marriage, slashed his wrists, and done time in a psychiatric institution, and now he's being cared for by his mother, who's a nun. Forty-five-year-old Helen Harland, a spirited Unitarian Universalist minister, is being driven crazy by her hostile church administration. Living in Los Feliz, California, the three meet at Helen's Wednesday midweek services. Though initially incompatible, the sheer force of Helen's idiosyncratic ministering (her "variety show of religious experience")—paired with Alice's illustrious ancestor William James—proves to be a catalyst

for friendship and a kind of transcendence.

Generous and compassionate, Michelle Huneven delivers a joyful new novel about love, faith, and a few wayward souls waiting for life to begin.

**Search History** Eugene Lim 2021-10-05 Search History oscillates between a wild cyberdog chase and lunch-date monologues as Eugene Lim deconstructs grieving and storytelling with uncanny juxtapositions and subversive satire. Frank Exit is dead—or is he? While eavesdropping on two women discussing a dog-sitting gig over lunch, a bereft friend comes to a shocking realization: Frank has been reincarnated as a dog! This epiphany launches a series of

adventures—interlaced with digressions about AI-generated fiction, virtual reality, Asian American identity in the arts, and lost parents—as an unlikely cast of accomplices and enemies pursues the mysterious canine. In elliptical, propulsive prose, Search History plumbs the depths of personal and collective consciousness, questioning what we consume, how we grieve, and the stories we tell ourselves.

*Algorithms of Oppression* Safiya Umoja Noble 2018-02-20 A revealing look at how negative biases against women of color are embedded in search engine results and algorithms Run a

Google search for “black girls”—what will you find? “Big Booty” and other sexually explicit terms are likely to come up as top search terms. But, if you type in “white girls,” the results are radically different. The suggested porn sites and un-moderated discussions about “why black women are so sassy” or “why black women are so angry” presents a disturbing portrait of black womanhood in modern society. In *Algorithms of Oppression*, Safiya Umoja Noble challenges the idea that search engines like Google offer an equal playing field for all forms of ideas, identities, and activities. Data discrimination is a real social

problem; Noble argues that the combination of private interests in promoting certain sites, along with the monopoly status of a relatively small number of Internet search engines, leads to a biased set of search algorithms that privilege whiteness and discriminate against people of color, specifically women of color. Through an analysis of textual and media searches as well as extensive research on paid online advertising, Noble exposes a culture of racism and sexism in the way discoverability is created online. As search engines and their related companies grow in importance—operating as a source for email, a

major vehicle for primary and secondary school learning, and beyond—understanding and reversing these disquieting trends and discriminatory practices is of utmost importance.

An original, surprising and, at times, disturbing account of bias on the internet, Algorithms of Oppression contributes to our understanding of how racism is created, maintained, and disseminated in the 21st century.

*Mysteries of Life (Where Do We Come From? Is There Life After Death, a God? Who Are the ETs Visiting Earth?)* Tony Kelbrat 2014-04-02 Where do we come from? Is there life after Death? If so, where? I think I figured it out. I will give you my version of the answers here in this book. In any event, you are the master of this life right here, right now. That's all anyone knows for sure, this life on Earth in the physical realm. When I was a kid, they taught me to be a good, little Catholic boy. I was as brainwashed as anyone could be

about religion but I gradually realized it was a crutch and a tool of oppression which doesn't make it bad in and of itself. It just means that a lot of people use religion as a tool to control others through guilt, to gain trust, sexual favours, political power, etc. Aside from that, even if there is no God, religion serves a variety of pragmatic purposes. It gives us hope, comfort, inspiration and bonds us as communities and societies.

*The Book of Atlantis Black: The Search for a Sister Gone Missing* Betsy Bonner 2020-08-04

The Book of Atlantis Black: The Search for a Sister Gone Missing will have you questioning facts, rooting for secrets, and asking what it means to know the truth. A young woman is

found dead on the floor of a Tijuana hotel room. An ID in a nearby purse reads “Atlantis Black.” The police report states that the body does not seem to match the identification, yet the body is quickly cremated and the case is considered closed. So begins Betsy Bonner’s search for her sister, Atlantis, and the unraveling of the mysterious final months before Atlantis’s disappearance, alleged overdose, and death. With access to her sister’s email and social media accounts, Bonner attempts to decipher and construct a narrative: frantic and unintelligible Facebook posts, alarming images of a woman

with a handgun, Craigslist companionship ads, DEA agent testimony, video surveillance, police reports, and various phone calls and moments in the flesh conjured from memory. Through a history only she and Atlantis shared—a childhood fraught with abuse and mental illness, Atlantis’s precocious yet short rise in the music world, and through it all an unshakable bond of sisterhood—Bonner finds questions that lead only to more questions and possible clues that seem to point in no particular direction. In this haunting memoir and piercing true crime account, Bonner must decide how far she will go to understand a

sister who, like the mythical island she renamed herself for, might prove impossible to find.

The Joy of Search Daniel M. Russell 2019-10-01

A Google researcher reveals the art of online searching, offering tips and tricks on how best to use resources like Google and Wikipedia—plus fun facts and fascinating stories We all know how to look up something online by typing words into a search engine. We do this so often that we have made the most famous search engine a verb: we Google it—“Japan population” or “Nobel Peace Prize” or “poison ivy” or whatever we want to know. But knowing how to Google

something doesn't make us search experts; there's much more we can do to access the massive collective knowledge available online. In The Joy of Search, Daniel Russell shows us how to be great online researchers. We don't have to be computer geeks or a scholar searching out obscure facts; we just need to know some basic methods. Russell demonstrates these methods with step-by-step searches for answers to a series of intriguing questions—from “what is the wrong side of a towel?” to “what is the most likely way you will die?” Along the way, readers will discover essential tools for effective online

searches—and learn some fascinating facts and interesting stories. Russell explains how to frame search queries so they will yield information and describes the best ways to use such resources as Google Earth, Google Scholar, Wikipedia, and Wikimedia. He shows when to put search terms in double quotes, how to use the operator (\*), why metadata is important, and how to triangulate information from multiple sources. By the end of this engaging journey of discovering, readers will have the definitive answer to why the best online searches involve more than typing a few words into Google.
